

CONTENTS

Preface		vii
Chapter 1	Evolution, Biology and Ecological Effects of Arbuscular Mycorrhiza <i>José-Miguel Barea and Concepción Azcón-Aguilar</i>	1
Chapter 2	Recent Developments in the Internal Regulation of Symbiotic Nodule Number by Legume Plants <i>Karel Novák</i>	35
Chapter 3	Legumes: Properties and Symbiosis <i>Corina Carranca</i>	67
Chapter 4	Symbiosis of Sea Anemones and Hermit Crabs in Temperate Seas <i>Chryssanthi Antoniadou, Anna-Maria Vafeiadou and Chariton Chintiroglou</i>	95
Chapter 5	Membrane Components are Determinants in the Response of Legume-Rhizobia Symbiosis at the Environmental Stresses <i>Natalia S. Paulucci, Daniela B. Medeot, Yanina B. Reguera, Marta S. Dardanelli and Mirta B. García de Lema</i>	119
Chapter 6	Behavioral, Physiological and Ecological Effects of Organisms in Symbiotic Associations <i>W. Randy Brooks</i>	143
Chapter 7	New Insights in the Actinorhizal Symbiosis <i>Didier Bogusz and Claudine Franche</i>	159
Chapter 8	The Role of Legumes for Sustainability: Research Needs for Future Prospects <i>Corina Carranca</i>	177

Chapter 9	Models of Symbiotic Associations in Food Chains	189
	<i>Elena Caccherano, Samrat Chatterjee, Lucia Costa Giani, Luigi Il Grande, Tiziana Romano, Giuseppe Visconti and Ezio Venturino</i>	
Chapter 10	The Bistable Brain: A Neuronal Model with Symbiotic Interactions	235
	<i>Ricardo Lopez-Ruiz and Daniele Fournier-Prunaret</i>	
Index		255
