

CONTENTS

Preface		xxiii
Chapter 1	Chance for Plants: Wider Possibilities and Capabilities <i>Károly Bóka and Norbert Orbán</i>	1
Chapter 2	Daughter Cells Self-Renew through Asymmetric Division <i>V. V. Terskikh, V. A. Vasiliev and E. A. Vorotelyak</i>	3
Chapter 3	Daughter Cells and Stem Cells: Properties and Characteristics <i>Chiara Bianchini, Andrea Ciorba, Roberta Piva, Stefano Pelucchi and Antonio Pastore</i>	5
Chapter 4	Unique Behavior of Daughter Cells in Chlorarachniophytes <i>Shuhei Ota</i>	7
Chapter 5	Dendritic Cells: Subtypes, Life Cycle, Activation, Biological Functions and Their Exploitation in Cancer Immunotherapy <i>Karine Breckpot, Aude Bonehill, Joeri L Aerts and Kris Thielemans</i>	9
Chapter 6	Regulation of the Immune Response by Innate Lymphocyte and Dendritic Cell Cross Talk <i>Anca Reschner, Inge Langers, Virginie Renoux, Philippe Delvenne and Nathalie Jacobs</i>	11
Chapter 7	Toll-Like Receptor 2 Mediated Dendritic Cell Activation – Key Target for Lipopeptide Vaccines Design <i>Mehfuz Zaman, Mariusz Skwarczynski and Istvan Toth</i>	13
Chapter 8	Generation of Dendritic Cells: a Critical Comparison of Different Methodological Approaches <i>Ilaria Mucci, Annalisa Legitimo and Rita Consolini</i>	15

Chapter 9	Spleen as a Distinct Site for Dendritic Cell Haematopoiesis <i>Jonathan K. H. Tan and Helen C. O'Neill</i>	17
Chapter 10	Age-Associated Changes in Dendritic Cells and Implications for Infectious Diseases, Cancer and Inflammation <i>Yuping Deng</i>	19
Chapter 11	Phenotypes and Distributions of Dendritic Cells in Peripheral Blood and Tissues in Cattle <i>Kohtaro Miyazawa, Takashi Kanaya, Sachi Tanaka, Haruki Kitazawa, Michael T. Rose, Takahiro Yamaguchi and Hisashi Aso</i>	21
Chapter 12	Scavenger Receptors and Their Roles in the Maturation of Human Peripheral Blood Dendritic Cells <i>Jong-Young Kwak, Jun-O Jin and Joo-In Park</i>	23
Chapter 13	Evaluation of the Immunomodulatory Activity of Herbal Medicines Using Dendritic Cells <i>Jia-Ming Chang, Yi-Ru Lee and Chia-Hui Tsai</i>	25
Chapter 14	Role of Dendritic Cells in HIV Infection: DC-SIGN and Novel Therapeutic Approaches <i>Marisela Agudelo, Zainulabedin Saiyed, Thangavel Samikkannu, Pradnya Khatavkar, Nimisha Gandhi, Narayanan Nair and Madhavan Nair</i>	27
Chapter 15	Dendritic Cell-Based Immunotherapy of Cancer: Current Pitfalls and Challenges <i>Guido Ferlazzo and Lorenzo Moretta</i>	29
Chapter 16	DNA Instability in Premature Ageing <i>Lynne S. Cox and Ivan Boubriak</i>	31
Chapter 17	Recent Advances on DNA Damage, its Repair and Genomic Stability of Green Algae <i>Chlamydomonas Reinhardtii</i> and Other Photoautotrophic Eukaryotes <i>Andrea Sevcovicova and Alena Hercegova</i>	33
Chapter 18	Intra S-Phase Checkpoint <i>Deborah Ruth Tasat and Juan Sebastian Yakisich</i>	35
Chapter 19	Multiplex Cell Free Assays to Apprehend DNA Repair Responses: Application to Ageing Study <i>Sylvie Sauvaigo, Anne-Laure Raffin, Jean-François Millau, Alex Nkengne and Thierry Oddos</i>	37
Chapter 20	Involvement of the Cell Cycle Inhibitor p21 ^{CDKN1A} in DNA Repair <i>Micol Tillhon, Ornella Cazzalini, Lucia A. Stivala, A. Ivana Scovassi and Ennio Prosperi</i>	39

17	Chapter 21	7, 8-Dihydro-8-Oxoguanine, A Major form of Oxidative DNA Damage, and its Repair System <i>Takeshi Hirano</i>	41
19	Chapter 22	Participation of Heat Shock Proteins in DNA Repair Mechanisms in Cancer <i>Silvina Nadin and Daniel R. Ciocca</i>	43
21	Chapter 23	DNA Damage Repair in Testicular Germ Cells of Ageing Men <i>Moetaz El – Domyati, Hasan El- Fakahany and Denny Sakkas</i>	45
23	Chapter 24	Nucleotide-Excision Repair Deficiency: A Causative Factor for Accelerated Aging Diseases in Humans? <i>Ming Yin and Qingyi Wei</i>	47
25	Chapter 25	Historical Development of Uncaria Preparations and Their Related Bioactive Components <i>Ronald W. Pero</i>	49
27	Chapter 26	DNA Damage Response and Repair: Mechanisms in Aging and Cancer <i>Panagiotis J. Vlachostergios and Ioannis A. Voutsadakis</i>	51
29	Chapter 27	DNA Repair Gene XPC Codon 939 Polymorphism and AFB1-Related Hepatocellular Carcinoma Risk in Guangxi Population, China <i>Xi Dai Long, Yuan-Feng Zhou, Jin-Guang Yao, Pinhu Liao, Yu-Jin Tang, Zan-Song Huang, Bing-Pu Chen, Xiao-Ying Huang, Chao Wang, Ai-Ming Ma, Yun Yi, Qiu-Xiang Liang and Yun-Long Lu</i>	53
31	Chapter 28	Influence of Age on Expression of DNA Repair Genes in Arabidopsis <i>Megan J. Osmond and Bernard A. Kunz</i>	55
33	Chapter 29	Trafficking and Endocytosis of Alzheimer Amyloid Precursor Protein <i>Ritva Tikkanen, Antje Banning and Melanie Meister</i>	57
35	Chapter 30	The Na/K-ATPase Endocytosis and Signaling <i>Jiang Liu and Joseph I. Shapiro</i>	59
37	Chapter 31	Endocytosis in Urothelial Umbrella Cells: Endocytic Vesicles Traffic <i>Ernesto J. Grasso and Reyna O. Calderon</i>	61
39	Chapter 32	Need to Endocytose? Abl to Help <i>M. Jacob</i>	63

Chapter 33	Cellular Uptake Mechanism of Inorganic Nanovehicles for Drug Delivery: Structural Features and Endocytic Pathway <i>Jin-Ho Choy, Soo-Jin Choi and Jae-Min Oh</i>	65
Chapter 34	LIM Kinase 1/Cofilin Signaling Pathway Plays a Pivotal Role in Regulating EGF Receptor Endocytosis in Invasive Human Breast Cancer Cells <i>Yukio Nishimura, Kiyoko Yoshioka and Kazuyuki Itoh</i>	67
Chapter 35	Sialic Acids as Modulators of Endocytosis: The Case of Dendritic Cells <i>M. Guadalupe Cabral, Hélio J. Crespo, A. Rita Piteira, Dário Ligeiro and Paula A. Videira</i>	69
Chapter 36	Macropinocytosis: Possible Mechanisms of Cellular Entry of Arginine-Rich Intracellular Delivery Peptides <i>Betty Revon Liu, Ching-Yi Chen, Rong-Long Chen, Huey-Jenn Chiang, Yue-wern Huang and Han-Jung Lee</i>	71
Chapter 37	Syndapin and Synaptic Endocytosis <i>Lennart Brodin, Joel Jakobsson, Frauke Ackermann, Fredrik Andersson and Peter Löw</i>	73
Chapter 38	Endocytosis: A Promising Approach for Gene Transfer Technology <i>Chiaki Hidai</i>	75
Chapter 39	Rab5 Mediated Caveolae Endocytosis <i>Yuji Yamamoto, Tadahiro Tadokoro and Makoto Hagiwara</i>	77
Chapter 40	Endocytic Dysfunction and Alzheimer's Disease <i>Nobuyuki Kimura</i>	79
Chapter 41	Techniques in Cancer Epigenetics <i>Michele Cummings and Laura Smith</i>	81
Chapter 42	Melatonin: Epigenetic Mechanisms in Cancer Inhibition <i>Ahmet Korkmaz and Russel J. Reiter</i>	83
Chapter 43	The Epigenetic (Re)Programming of Phenotypic Differences in Behavior <i>Patrick O. McGowan, Michael J. Meaney and Moshe Szyf</i>	85
Chapter 44	Role of H3 Phosphorylation in Different Biological Processes in Normal and Disease States <i>Geneviève P. Delcuve, Paula S. Espino and James R. Davie</i>	87
Chapter 45	The Role of DNA Methylation in Colorectal Cancer <i>Ivana Fridrichova</i>	89

	Chapter 46	Epigenetic Clues to Arthritic Diseases <i>Helmtrud I. Roach and Emma L. Williams</i>	91
65	Chapter 47	Evolution of the Fpg/Nei Family of DNA Glycosylases <i>Dorothy E. Pumo, Ramiro Barrantes-Reynolds, Scott Kathe, Susan S. Wallace and Jeffrey P. Bond</i>	93
67	Chapter 48	95The Clinical and Etiological Relevance of <i>MLH1</i> Promoter Hypermethylation in Ovarian Tumors <i>Tuya Pal and O. Thomas Mueller</i>	95
69	Chapter 49	Epigenetic Role in Longevity Echoes Conserved Stress Survival Strategies <i>Joan Smith Sonneborn</i>	97
71	Chapter 50	Epigenetics and Neurodegeneration: A Connection Overlooked <i>Sueli C. F. Marques, Cláudia M. F. Pereira and Tiago F. Outeiro</i>	99
73	Chapter 51	DNA Methylation Changed by 5-Azacytidine Can Affect Normal Fetal and Placental Development <i>Ljiljana Serman, Maja Vlahovic, Nino Sincic, Floriana Bulic- Jakus, Gordana Juric-Lekic, Alan Serman and Ana Katusic</i>	101
75	Chapter 52	Epigenetic Analysis in Breast Cancer Progression <i>Frank A. Orlando, Lisa M. Dyer and Kevin D. Brown</i>	103
77	Chapter 53	Cancer Epigenetics <i>Frank A. Orlando, Berna Demircan and Kevin D. Brown</i>	105
79	Chapter 54	Golgi Organization and Stress Sensing <i>Suchismita Chandran and Carolyn Machamer</i>	107
81	Chapter 55	Functional Relationships between Golgi Dynamics and Lipid Metabolism and Transport <i>Asako Goto and Neale Ridgway</i>	109
83	Chapter 56	Signaling Pathways Controlling Mitotic Golgi Breakdown in Mammalian Cells <i>Inmaculada López-Sánchez and Pedro A. Lazo</i>	111
85	Chapter 57	Golgi Apparatus and Hypericin-Mediated Photodynamic Action <i>Chuanshan Xu, Xinshu Xia, Hongwei Zhang and Albert Wingnang Leung</i>	113
87	Chapter 58	Role of the Trans-Golgi Network (TGN) in the Sorting of Nonenzymic Lysosomal Proteins <i>Maryssa Canuel, Libin Yuan and Carlos R. Morales</i>	115
89			

Chapter 59	Golgi Apparatus Functions in Manganese Homeostasis and Detoxification <i>Richard Ortega and Asunción Carmona</i>	117
Chapter 60	Molecular Chaperones of the Endoplasmic Reticulum <i>Martin Schröder</i>	119
Chapter 61	Type III Secretion Chaperones: A Molecular Toolkit for All Occasions <i>Matthew S. Francis</i>	121
Chapter 62	Advances in Heat Shock Proteomics: Towards a Better Understanding of the Physiology and Pathophysiology of Molecular Chaperones <i>Roberto Scatena, Patrizia Bottoni and Bruno Giardina</i>	123
Chapter 63	System Specific Chaperones for Membrane Redox Enzyme Maturation in Bacteria <i>Raymond J. Turner, Tara M. L. Winstone, Vy A. Tran and Cathy S. Chan</i>	125
Chapter 64	Role of Molecular Biology in Molecular Imaging <i>Archana Mukherjee and Mathew L. Thakur</i>	127
Chapter 65	Yeast Protein Aggregates, Containing Chaperones and Glucose Metabolism Enzymes <i>O. V. Nevzglyadova, A. V. Artemov, A. G. Mittenberg, E. V. Mikhailova, I. M. Kuznetsova, K. K. Turoverov and T. R. Soidla</i>	129
Chapter 66	Structure and Multiple Functions of Cyclophilin 40: A Divergent Loop Cyclophilin <i>Thomas Ratajczak, Bryan K. Ward, Carmel Cluning and Rudi K Allan</i>	131
Chapter 67	Free-Living Protists as a Model for Studying Heat Shock Proteins in the Cell <i>Andrew V. Goodkov, Alexei O. Smurov and Yulia I. Podlipaeva</i>	133
Chapter 68	Quality Control in the Secretory Pathway <i>Joanna Jung, Helen Coe, Jody Groenendyk and Marek Michalak</i>	135
Chapter 69	Structure, Properties and Multiple Functions of Human Small Heat Shock Protein HspB8 (Hsp22, H11 Protein Kinase or E2IG1) <i>Anton A. Shemetov, Evgeny V. Mymrikov, Alim S. Seit-Nebi and Nikolai B. Gusev</i>	137
Chapter 70	Small Stress Proteins and Their Therapeutic Potential <i>Scott Houck, Joy G. Ghosh and John I. Clark</i>	139

117	Chapter 71	The Eukaryotic Chaperonin CCT (TRiC): Structure, Mechanisms of Action and Substrate Diversity <i>Julie Grantham</i>	141
119	Chapter 72	The Role of Molecular Chaperones in Plant Stress Response <i>Youko Oono, Yuhya Wakasa, Lijun Yang and Fumio Takaiwa</i>	143
121	Chapter 73	Chaperone Activity of Intrinsically Disordered Proteins <i>Denes Kovacs and Peter Tompa</i>	145
123	Chapter 74	Fluorescence Study on Aggregation of α -Crystallin and Insulin <i>N. L. Vekshin</i>	147
125	Chapter 75	The Induction of Hepatic Heat Shock Protein 27 and 70 by an Anti-Hepatitis Drug-Bicyclol and Its Role in Protection against Liver Injury <i>Geng-Tao Liu and Xiu-Qi Bao</i>	149
127	Chapter 76	Plant Heat Shock Proteins as Molecular Chaperones in Normal and Stress Conditions <i>Biliana Grigorova</i>	151
129	Chapter 77	Different Mechanisms Responsible for Stress Resistance Operate in the Same Insect Order (Diptera) <i>D. G. Garbuz, O. G. Zatsepina, I. Yushenova, A. Przhiboro and M. B. Evgen'ev</i>	153
131	Chapter 78	Bi-Directional Hsp Response in Homeothermic Livestock <i>Ariel Shabtay</i>	155
133	Chapter 79	The Chaperonin Containing T-Complex Polypeptide: Do Monomeric Subunits Have Discrete Individual Functions? <i>Sandeep Kathju and Latha Satish</i>	157
135	Chapter 80	Evidence for <i>In Vivo</i> Phosphorylation of Hsp26 from <i>Saccharomyces Cerevisiae</i> <i>D. N. Peixoto, R. M. Ferreira, V. M. F. Paschoalin and J. T. Silva</i>	159
137	Chapter 81	Cryopreservation of Pluripotent Stem Cells: From Slow Cooling Protocols to Slow Cooling Protocols <i>Hinako Ichikawa and Katsunori Sasaki</i>	161
139	Chapter 82	Bone Tissue Engineering Approaches and Challenges Using Bioactive Ceramic Scaffolds <i>Manitha B. Nair</i>	163

Chapter 83	Induced Pluripotent Stem Cell-Derived Hepatocytes as an Alternative to Human Adult Hepatocytes <i>Takeshi Katsuda, Yasuyuki Sakai and Takahiro Ochiya</i>	165
Chapter 84	Production of Cells with the Patient's Genotype by Induced Pluripotent Stem Cell Technique <i>Stina Simonsson, Dzeneta Vizlin-Hodzcic, Lars Enochson, Cecilia Borestrom and Anders Lindahl</i>	167
Chapter 85	Induced Pluripotent Stem Cell Technology for the Study of Neurodegenerative Diseases <i>Shiho Kitaoka, Hiroshi Kondoh and Haruhisa Inoue</i>	169
Chapter 86	Generation of Human Induced Pluripotent Stem Cells from Cord Blood Cells <i>Naoki Nishishita, Chiemi Takenaka, Noemi Fusaki and Shin Kawamata</i>	171
Chapter 87	Focus in Andrology and Male Infertility <i>Fotios Dimitriadis and Motoaki Saito</i>	173
Chapter 88	Neutrophils: Markers of Biological Age and Predictors of Longevity <i>Patricia Alonso-Fernández, Ianire Maté and Mónica De la Fuente</i>	175
Chapter 89	Neutrophils: Phagocytes and Gate Keepers of Inflammation <i>Inga Wessels, Judith Jansen, Lothar Rink and Peter Uciechowski</i>	177
Chapter 90	Neutrophil Activation Induced by Plant Lectins <i>Gabriela Pereira-da-Silva and Maria Cristina Roque-Barreira</i>	179
Chapter 91	Natural Agents Against Neutrophil Involvement in <i>H.pylori</i> Induced Chronic Gastritis <i>S. Pendas, F. Kottakis, A. Asiminas, M. Kontou, Ch. Befani, G. Koliakos and T. Choli-Papadopoulou</i>	181
Chapter 92	The Role of Neutrophils and TRAIL in BCG Immunotherapy for Bladder Cancer <i>Mark P. Simons, Kevin G. Leidal, Sally J. McCormick, Thomas S. Griffith and William M. Nauseef</i>	183
Chapter 93	Regulation of Neutrophil Homeostasis by Spontaneous Apoptotic Death <i>Hongbo R. Luo and Besnik Bajrami</i>	185

165	Chapter 94	Modulation of Neutrophil Function by Short Chain Fatty Acids <i>Marco A. R. Vinolo, Hosana G. Rodrigues, Elaine Hatanaka and Rui Curi</i>	187
167	Chapter 95	Roles of Flagellin of Enteropathogenic <i>Escherichia Coli</i> in Neutrophil Functions <i>Jung Mogg Kim</i>	189
169	Chapter 96	The Effect of <i>Rhodobacter Capsulatus</i> Lipopolysaccharide on Human Blood Phagocytes: A Functional Response and Protection from the Endotoxin-Induced Apoptosis <i>M. G. Vinokurov, M. M. Yurinskaya, I. R. Prokhorenko and S. V. Grachev</i>	191
171	Chapter 97	Neutrophil Responsiveness and Proinflammatory Activity of Bronchoalveolar Lavage Fluid in Patients on Exacerbation of Pulmonary Tuberculosis <i>O. P. Makarova, L. N. Shishkina, A. P. Ogirenko and V. A. Shkurupiy</i>	193
173	Chapter 98	The Respiratory Oxidative Burst and its Clinical Manifestations <i>Paul T. King</i>	195
175	Chapter 99	Role of Neutrophils in Acute Myocardial Infarction <i>Fabrizio Montecucco, Alessandra Quercioli and François Mach</i>	197
177	Chapter 100	Neutrophil Activation in Behçet's Disease: Implications for Mucocutaneous Conditions <i>Toshiyuki Yamamoto and Yasunobu Kato</i>	199
179	Chapter 101	Functions of the Phagocyte NADPH Oxidase and Chronic Granulomatous Disease (CGD) <i>Akira Yamauchi and Futoshi Kuribayashi</i>	201
181	Chapter 102	Neutrophil-Derived Defensin in Ulcerative Colitis <i>Toshio Sakiyama, Hirofumi Uto, Shuji Kanmura and Hirohito Tsubouchi</i>	203
183	Chapter 103	Redox State and Oncogenes in Breast Cancer <i>E. A. Ostrakhovitch</i>	205
	Chapter 104	Regulating c-Myb in Real Time <i>Anita M. Quintana and Scott A. Ness</i>	207
185	Chapter 105	Cell Surface Oncoproteomics: Cancer Biomarker Discovery and Clinical Applications <i>K. L. Kaufman, S. Mactier, P. Kohnke and R. I. Christopherson</i>	209

Chapter 106	Finding for New Site Specific References for Oncoprotein Tumor Markers: An Example from Thai Context <i>Viroj Wiwanitkit</i>	211
Chapter 107	Oncogenic Activity of Epstein-Barr Virus Encoded Latent Membrane Protein 1 in Undifferentiated Nasopharyngeal Carcinoma <i>Thian-Sze Wong, Jimmy Yu-Wai Chan, Victor Shing-Howe To, Raymond King-Yin Tsang, Wai-Kuen Ho and William Ignace Wei</i>	213
Chapter 108	Oncoprotein in Tropical Infection: A Story in Tropical Medicine <i>Viroj Wiwanitkit</i>	215
Chapter 109	False Positive in Laboratory Investigation for Oncoprotein: A Diagnostic Pitfall <i>Viroj Wiwanitkit</i>	217
Chapter 110	E7 Oncoprotein of Human Papillomavirus: Functions and Strategies of Inactivation for the Treatment of HPV-Associated Cancer <i>Maria Gabriella Donà</i>	219
Chapter 111	Oncogene Proteins as Tumor Markers <i>Viroj Wiwanitkit</i>	221
Chapter 112	Cyclopentenone Prostaglandins: Signalling Mechanisms and Opportunities for Drug Discovery <i>Dolores Pérez-Sala</i>	223
Chapter 113	Prostaglandins Regulate Growth and Transport in Cultured Renal Cells <i>Mary Taub, E. James Springate and Facundo Cutuli</i>	225
Chapter 114	Comparative Effects of PGE ₂ on Different Types of Immune Cells in Holothurian <i>Eupentacta Fraudatrix</i> <i>L. S. Dolmatova and O. A. Zaika</i>	227
Chapter 115	Pharmacological Differentiation of Bimatoprost and Latanoprost Induced Ocular Hypotension by a Second Generation Prostanoid Antagonist (AGN 211336) <i>F. David Woodward, Yanbin Liang, W. Jenny Wang, Chen Li, M. Victor Guzman, B. Alexander Kharlamb, A. Larry Wheeler, E. Michael Garst, W. C. Robert Carling, L. Clive Cornell, G. Hans Fliri, L. Jose Martos, N. Simon Pettit, L. David Hopper, Vincenzo DiMarzo and Giorgio Ortar</i>	229

211	Chapter 116	Regulation of Myeloid Derived Phagocytes by Phosphatidylserine-Containing Liposomes: Possible Involvement of Prostaglandin E ₂ and the Potential Therapeutic Application <i>Zhou Wu and Hiroshi Nakanishi</i>	231
213	Chapter 117	Cross Talk between the Receptors of Insulin and Prostacyclin on Platelets Membrane in the Enhancement of Antithrombotic Effect of Insulin <i>A. K. Sinha and M. Bhattacharyya</i>	233
215	Chapter 118	Is mPGES-1 an Ideal Target for Counteracting Inflammation and Escaping Cardiovascular Side Effects Associated with COX-2 Inhibitors? A Brief Overview <i>Mohit Kapoor, Jean-Pierre Pelletier and Johanne Martel-Pelletier</i>	235
217	Chapter 119	Investigation of Kinetics of Behavior of Structures of Prostaglandins of Groups A ₁ , A ₂ , B ₁ , B ₂ and E ₁ , E ₂ in Ethanol. Prostaglandin Interchange <i>S. V. Isay, T. V. Kafanova and N. U. Kim</i>	237
219	Chapter 120	Roles of Prostaglandin E ₂ and its Receptors in Inflammation-Related Cardiovascular Diseases <i>Jun-ichi Suzuki, Masahito Ogawa, Keiichi Hishikari, Kiyoshi Takayama and Mitsuaki Isobe</i>	239
221	Chapter 121	Regulation of Proinflammatory Transcription Factors by Cyclopentenone Prostaglandins: Involvement of Direct and Indirect Mechanisms <i>Eva Cernuda-Morollón and Dolores Pérez-Sala</i>	241
223	Chapter 122	Effects of Prostaglandins and Prostamides Analogues on Ocular Blood Flow <i>Michele Vetrugno, Nicola Cardascia and Carlo Sborgia</i>	243
227	Chapter 123	T Helper 17 Cells Interplay with CD4 ⁺ CD25 ^{high} Foxp3 ⁺ Regulatory T cells in Regulating Autoimmune Inflammation <i>Jietang Mai, Anthony Virtue, Hong Wang and Xiao-Feng Yang</i>	245
229	Chapter 124	Human CD8 Tregs as Contender in Chronic Persisting Infections <i>Simone A. Joosten and Tom H. M. Ottenhoff</i>	247
	Chapter 125	Role of Regulatory T Cells in the Treatment of Multiple Sclerosis <i>K. Szklany, T. C. Koehler and W. van Eden</i>	249

Chapter 126	Immunoregulatory Cells and Mechanisms of Immune Response <i>Carol Aristimuño, Roseta Teijeiro, Clara de Andrés and Silvia Sánchez-Ramón</i>	251
Chapter 127	Roles of Regulatory T Cells in Oral Tolerance and Food Allergy <i>Yusei Ohshima</i>	253
Chapter 128	The Role of Regulatory T Cells in GVL and GVHD <i>Abdullah Alsuliman, Paula Garland and Katayoun Rezvani</i>	255
Chapter 129	Regulatory T Cells and Hepatocellular Carcinoma: Implication of the Regulatory T Lymphocytes in the Control of the Immune Response <i>Nadira Delhem, Céline Miroux and Thibaut Vausselin</i>	257
Chapter 130	Regulatory T Cells and Tumor Immunity in the Tumor Microenvironment <i>Lisong Shen, Matthew R. Thompson and Dakang Xu</i>	259
Chapter 131	Advantages and Disadvantages of and Cooperation between CD8 ⁺ and CD4 ⁺ Regulatory T Cells <i>Haruhiko Suzuki, Yusuke Okuno and Agustina Tri Endharti</i>	261
Chapter 132	Regulatory T Cells in Arthritis: Why Do They Fail? <i>Halima Moncrieffe and Lucy R. Wedderburn</i>	263
Chapter 133	Immune Homeostasis Maintained by Tregs <i>Myoung-Ho Jang, Yun-Jae Jung, Hyung-Ran Kim, Byung-In Moon and Ju-Young Seoh</i>	265
Chapter 134	Regulating Foxp3 by Cis Elements <i>Peter C. J. Janson and Ola Winqvist</i>	267
Chapter 135	Genetic Engineering of Antigen-Specific Regulatory T Cells <i>Eran Elinav and Zelig Eshhar</i>	269
Chapter 136	Regulatory T Cells in Allergic Disorders and Immunomodulation <i>Kei-ichi Yamanaka</i>	271
Chapter 137	The Number of Regulatory T Cells: Pursuit of the Golden Mean <i>Alexander Pukhalsky, Galina Shmarina and Vladimir Alioshkin</i>	273
Chapter 138	Telomerase beyond Telomeres: New Roles for an Old Enzyme <i>Gabriele Saretzki</i>	275

251	Chapter 139	Telomerase and Telomeric Proteins: A Life Beyond Telomeres <i>Ilaria Chiodi, Cristina Belgiovine and Chiara Mondello</i>	277
253	Chapter 140	Histone Deacetylase Inhibition as an Anticancer Telomerase- Targeting Strategy <i>Ruman Rahman</i>	279
255	Chapter 141	Telomerase Role in Pituitary Adenomas <i>A. Ortiz-Plata</i>	281
257	Chapter 142	Regulations of Telomerase Activity and WRN Gene Expression <i>Fumiaki Uchiumi, Yoshikazu Higami and Sei-ichi Tanuma</i>	283
259	Chapter 143	Telomerase and Telomere Dynamics in Cancer: Clinical Application for Cancer Diagnosis <i>Eiso Hiyama and Keiko Hiyama</i>	285
261	Chapter 144	Aflatoxin B ₁ and Acetaldehyde Mutational Patterns in the Tumour Suppressor Gene <i>TP53</i> : Experimental Fingerprints Using a Functional Assay and Relevance to Human Cancer Aetiology <i>Vincent Paget, Mathilde Lechevrel and François Sichel</i>	287
263	Chapter 145	Curative Therapy for Terminal Cancer? <i>Doug Dix</i>	289
265	Chapter 146	Breast Cancer Screening by Methylation Analysis of Tumor Suppressor Genes in Breast Fluid <i>J. S. de Groot, K. P. M. Suijkerbuijk, P. J. van Diest and E. van der Wall</i>	291
267	Chapter 147	Rab GTPases as Potential Tumor Suppressors <i>Christelle En Lin Chua, Yishan Lim, Ee Ling Ng and Bor Luen Tang</i>	293
269	Chapter 148	Regulation of Neutrophil Function by Tumor Suppressor PTEN <i>Subhanjan Mondal and Hongbo R. Luo</i>	295
271	Chapter 149	Wnt Pathway-Independent Activities of the APC Tumor Suppressor <i>Jenifer R. Prosperi and Kathleen H. Goss</i>	297
273	Chapter 150	Emerging Roles of BRIT1/MCPH1 in Genome Maintenance and Tumor Suppression <i>Guang Peng and Shiaw-Yih Lin</i>	299
275			

Chapter 151	The Role of Histone Deacetylase (HDAC) and EZH2 in Oncogenesis: Epigenetic Silencing of Tumor Suppressors <i>Junpei Yamaguchi, Motoko Sasaki and Yasuni Nakanuma</i>	301
Chapter 152	Functions of Kank1 and Carcinogenesis <i>Naoto Kakinuma, Yun Zhu, Takunori Ogaeri, Jun-ichiro Suzuki and Ryoiti Kiyama</i>	305
Chapter 153	The Relationship Between MicroRNA and Tumor Suppressors <i>Douglus Wu and Mary Waye</i>	305
Chapter 154	Biomarkers for Radiosensitivity and Radiosensitization Targets in Prostate Cancer <i>WeiWei Xiao, Peter Graham, Carl Power and Yong Li</i>	307
Chapter 155	Molecular Functions of the p53 Tumor Suppressor in the Apoptotic Response to DNA Damage <i>Kiyotsugu Yoshida</i>	309
Chapter 156	How does Tumor Suppressor FHIT Modulate Oxidative Stress and DNA Damage Checkpoints in Early Cancer? <i>Hideshi Ishii and Toshiyuki Saito</i>	311
Chapter 157	Role of the Tumor Suppressor PDCD4 in the Differentiation of the Skin <i>Sachiko Matsushashi, Takeshi Okawa and Yutaka Narisawa</i>	313
Chapter 158	Analytical Methods of the Determination of Arginine Amino Acid <i>R. M. Callejon, C. Ubeda, A. M. Troncoso and M. L. Morales</i>	315
Chapter 159	Alternative Metabolic Pathways of Arginine and their Pathophysiological Roles <i>András Hrabák and Zoltán Kukor</i>	317
Chapter 160	Free Amino Acid Analysis in Natural Matrices <i>Graciliana Lopes, Patrícia Valentão and Paula B. Andrade</i>	319
Chapter 161	Discovery of Argininosuccinate Synthetase and Argininosuccinate Lyase <i>Dr. Olivier Levillain</i>	321
Chapter 162	Expression and Localization of Argininosuccinate Synthetase and Argininosuccinate Lyase in the Female and Male Rat Kidneys <i>Olivier Levillain and Heinrich Wiesinger</i>	323

301	Chapter 163	Arginine-Based Surfactants. Chemical Structure and Toxicity	325
303		<i>Aurora Pinazo, Lourdes Pérez, María Rosa Infante, María Pilar Vinardell, Montserrat Mitjans, María del Carmen Morán and Verónica Martínez</i>	
305	Chapter 164	Arginine: Physico-Chemical Properties, Interactions with Ion-Exchange Membranes, Recovery and Concentration by Electrodialysis	327
307		<i>T. Eliseeva, E. Krisilova, G. Oros and V. Selemeney</i>	
309	Chapter 165	Central Functions of L-Arginine and its Metabolites for Stress Behavior	329
311		<i>Shozo Tomonaga, D. Michael Denbow and Mitsuhiro Furuse</i>	
313	Chapter 166	Arginine Requirement and Metabolism in Marine Fish Larvae - Review of Recent Findings	331
315		<i>Margarida Saavedra</i>	
317	Chapter 167	Arginine-Rich Cell-Penetrating Peptides in Cellular Internalization	333
319		<i>Betty Revon Liu, Huey-Jenn Chiang and Han-Jung Lee</i>	
321	Chapter 168	Effects of Deep Sea Water on Changes in Free Amino Acids and Tolerance to Fusarium Root Rot in Mycorrhizal Asparagus Plants	335
323		<i>Abu Shamim Mohammad Nahyan, Mika Yokoyama and Yoichi Matsubara</i>	
	Chapter 169	Influence of Arginine-Containing Peptides on the Haemostasis System	337
		<i>Maria Golubeva and Marina Grigorjeva</i>	
	Chapter 170	Newly Identified Transcriptional Regulation by Mcm1p at ARG1 Promoter	339
		<i>Sungpil Yoon</i>	
	Chapter 171	Zinc, Copper or Magnesium Supplementation against Cadmium Toxicity: An Experimental Study	341
		<i>Vesna Matović, Zorica Plamenac Bulat, Danijela Djukić-Čosić and Danilo Soldatović</i>	
	Chapter 172	Nickel: Molecular Diversity, Application, Essentiality and Toxicity in Human Health	343
		<i>Kusal K. Das, Swastika N. Das and Salim A. Dhundasi</i>	
	Chapter 173	Redox-Active Antimicrobial Metal Complexes with Sterically Hindered O-Diphenol and O-Aminophenol Derivatives	345
		<i>N. V. Loginova, T. V. Koval'chuk, G. I. Polozov, N. P. Osipovich A. A. Chernyavskaya, V. L. Sorokin and O. I. Shadyro</i>	

Chapter 174	Copper as a Biometal: An Insight on Transport, Toxicity and Tolerance in Photosynthetic Organisms <i>G. S. Shekhawat, Dinesh Kumar, Kusum Verma, Kusum Singh, Sonali Jana, Preeti Teotia and Saroj Yadav</i>	347
Chapter 175	Beneficial and Adverse Effects of Phytic Acid Extract from Sweet Potato (<i>Ipomoea Batatas</i>) <i>Felix O. Omoruyi</i>	349
Chapter 176	Fur (Ferric Uptake Regulation) Proteins in Cyanobacteria <i>María F. Fillat</i>	351
Chapter 177	Pentavalent Antimonials: Chemistry, Biochemistry and Therapeutic Perspectives <i>Cynthia Demicheli, Frédéric Frézard and Cláudio dos Santos Ferreira</i>	353
Chapter 178	Methods for the Detection and Quantitation of Phytochelatins, a Class of Heavy Metal-Binding Peptides Produced by Higher Plants, Algae, and Some Fungi <i>Etsuro Yoshimura</i>	355
Chapter 179	Comparative Analysis of Metal Transportomes in <i>Helicobacter</i> Species: Modeling the Molecular Structures of Nickel Transporters <i>P. Kiranmayi, V. Swathi Sireesha and N. Nageswara Rao Reddy</i>	357
Chapter 180	Copper, Silver and Bacteria: Does Resistance Pose a Threat to Our Health Care System? <i>Sylvia Franke McDevitt</i>	359
Chapter 181	Regulation During Adaptation of Cyanobacteria to Changes in Iron Availability: A Case Study of Responses to Iron Limitation in <i>Fremyella Diplosiphon</i> <i>Beronda L. Montgomery and Bagmi Pattanaik</i>	361
Chapter 182	Important Biometals in Humans: Transporters and Transporter Receptors <i>Viroj Wiwanitkit</i>	363
Chapter 183	Important Biometals in Humans: Transporters and Transporter Receptors <i>Viroj Wiwanitkit</i>	365
Chapter 184	Metallomics: A New Tool for Studying Biometals <i>Viroj Wiwanitkit</i>	367

347	Chapter 185	Molecular Recognition of Carboxylic Acids and Carboxylate Anions by Synthetic Receptor <i>Ivan I. Stoikov, Maria N. Agafonova, Luidmila S. Yakimova, Igor S. Antipin and Alexander I. Konovalov</i>	369
349	Chapter 186	Next Generation Molecular Imprinted Polymers: Examples of Liquid Crystalline Materials and Hydrogels for Protein Recognition <i>Mingotaud Anne-Françoise, Fitremann Juliette, Mauzac Monique, Rodriguez Vilches Seila, Doucet Jean-Baptiste, Séverac Childérick, Laurent Elisabeth, Binet Corinne, Marty Jean-Daniel, Palaprat Guillaume and Weyland Marie</i>	371
353	Chapter 187	Molecular Recognition and Crystal Growth <i>J. S. Redinha and A. J. Lopes Jesus</i>	373
	Chapter 188	Spectroscopic and Microscopic Examination of Chiral Recognition at the Molecular Level <i>Marek Graff</i>	375
355	Chapter 189	Molecular Imprinting: State of the Art and Applications <i>Nada F. Atta, Ahmed Galal and Ali M. Abdel-Mageed</i>	377
	Chapter 190	Recent Advances in DNA-Ligand Molecular Recognition and Allosteric Interactions <i>Jonathan T. B. Huang, Robin C. K. Yang, Wei-Kang Hung, Michael J. Waring and Leung Sheh</i>	379
357	Chapter 191	Molecular Recognition of Odorant-binding Proteins in Insect Olfaction <i>Xin Jin and Long Zhang</i>	381
359	Chapter 192	The Proteomic Code: A Molecular Recognition Code for Proteins <i>Jan C. Biro</i>	383
361	Chapter 193	'On/Off'-Switched Molecular Recognition by a Smart Aminopurine-Imprinted Polymer <i>Songjun Li, Ashutosh Tiwari and Mani Prabakaran</i>	385
