
Contents

Preface		vii
Chapter I	Glutamate and its Receptors in Controlling Proliferation of Oligodendrocyte Progenitor Cells <i>Maria Kukley</i>	1
Chapter II	The Two Faces of TGF- β in Breast Cancer: Tumour Suppressor and Tumour Promoter <i>Yihao Li, Yvette Drabsch and Peter ten Dijke</i>	21
Chapter III	MicroRNAs and Their Therapeutic Potential for Vascular Smooth Muscle Cell Proliferation in Restenosis <i>Eunmi Choi, Byeong-Wook Song, Il-Kwon Kim, Se-Yeon Lee, Min-Ji Cha, Onju Ham, Eunhyun Choi and Ki-Chul Hwang</i>	41
Chapter IV	Impaired Proliferation as a Component of the Pathogenesis of Follicular Persistence Associated with Cystic Ovarian Disease <i>Natalia R. Salvetti, Florencia Rey, Matías L. Stangaferro, Eduardo J. Gimeno, Ayelen N. Amweg, Pablo U. Diaz and Hugo H. Ortega</i>	53
Chapter V	Extracellular Protein-Induced Plant Cell Proliferation <i>Anis Ben-Amar and Goetz M. Reustle</i>	65
Chapter VI	Cell Proliferation in Drug Discovery and Development <i>Gopalan Soman, Xiaoyi Yang, Steve Giardina and George Mitra</i>	81
Chapter VII	Cell Adhesion and Proliferation on Polymeric Biomaterials for Tissue Engineering <i>Xiangqiong Zeng and Changhong Zhang</i>	113
Index		149
