

CONTENTS

Preface		vii
Section 1. Concepts, Problems, and Applications of Social Learning Theory		1
Chapter 1	Observational Learning in Animals <i>Thomas R. Zentall</i>	3
Chapter 2	The Challenges of a Social Learning Phylogeny: Mechanisms, Content and Context Biases and Inter-Individual Differences <i>Erik Gustafsson</i>	35
Chapter 3	Social Learning of Predation Risk: A Review and Prospectus <i>Adam L. Crane and Maud C.O. Ferrari</i>	53
Chapter 4	Social Transmission of Food Preference in Rodents: Neural Substrates and Use in Alzheimer's Models <i>Craige C. Wrenn and Kirsten G. Chatman</i>	83
Chapter 5	Presence of an Audience Alters Mate Choice of Poeciliid Males <i>David Bierbach, Yasmin Konstantin, Stefan Stadler, Denis Schenkel, Amber M. Makowicz, Herbert Nigl, Holger Geupel, Rüdiger Riesch, Ingo Schlupp and Martin Plath</i>	95
Chapter 6	Active Social Learning in Humans and Robots <i>Andrea L. Thomaz and Maya Cakmak</i>	113
Section 2. Emerging Models of Social Learning Theory		129
Chapter 7	Social Learning in Cephalopods: A Natural History Perspective <i>Christine L. Huffard</i>	131
Chapter 8	Modulation of Olfactory and Gustatory Sensitivity Mediated by Sensory Experience in Moths: A Simple Form of Social Learning? <i>Sylvia Anton, Sebastian Minoli, Christophe Gadenne and Peter Anderson</i>	147
Chapter 9	Plant Root Networks and Swarm Rules <i>Marzena Ciszak and Stefano Mancuso</i>	163

Chapter 10	The Mating Judgements of Microbes	173
	<i>Kevin B. Clark</i>	
Chapter 11	Social Learning across the Human-Microbial Interface	201
	<i>Elling Ulvestad</i>	
Section 3. Supplementary Materials		217
