

Contents

Preface		vii
Chapter I	Mechanism of Transcription in Prokaryotes <i>Runa Sur and Jayanta Mukhopadhyay</i>	1
Chapter II	How Noisy Is RNA Production in Escherichia Coli When Seen <i>in Vivo</i> , One Event at a Time <i>Andre S. Ribeiro</i>	13
Chapter III	The Biochemistry of F ₄₂₀ Cofactor Biosynthesis <i>Tijani Osumah, Cuong Q. Le, Tony D. Nguyen and Kayunta Johnson-Winters</i>	47
Chapter IV	Regulation of Gene Expression through mRNA Stability: Implications in Cancer Development and Therapeutics <i>Rania Indu, Alina Chakraborty, Sumita Sengupta and Tapas K. Sengupta</i>	75
Chapter V	Roles of Small RNAs in Regulation of Signaling and Adaptive Responses in Plants <i>Shree P. Pandey, Taraka Ramji Moturu and Priyanka Pandey</i>	107
Chapter VI	Nuclear Organization of Cancer Cells <i>Devika Ranade and Kundan Sengupta</i>	133
Chapter VII	Insect Lipid Metabolism: Insights Into Gene Expression Regulation <i>David Majerowicz and Katia C. Gondim</i>	147
Chapter VIII	Blood Based Gene Expression: Useful Biomarkers for Alzheimer's and Parkinson's Diseases <i>Anders Lönneborg, Line Røed and Magnus Sjögren</i>	191
Chapter IX	Microarray-based Whole Transcriptome Expression Profiling As a Tool to Understand Human Ageing <i>A. D. Fellows, A. C. Holly, L. C. Pilling, D. Melzer and L. W. Harries</i>	209

Chapter X	Lessons from the Gene Expression Studies of Immunocompetent Cells in Relationship to Type 1 Diabetes Development	221
	<i>K. Stechova, M. Kolar and D. Filipp</i>	
Chapter XI	Current Technologies for Assessing Epigenetic Marks and Their Utilization in the Study of Metal Carcinogenesis	239
	<i>Adriana Arita and Max Costa</i>	
Chapter XII	Chromium(III): Bio-significant or Bio-Toxic?	259
	<i>H. Yamini Shrivastava, V. G. Vaidyanathan and Balachandran Unni Nair</i>	
Chapter XIII	RMP: From Transcription to Oncogenesis	309
	<i>Shaomu Chen and Wenxiang Wei</i>	
Index		315
