
Contents

Preface		vii
Chapter 1	Microarray Technology for Category 'A' Bioterrorism Agent Research: Current Status and Perspectives <i>Lauren Huettner and Eric M. Vela</i>	1
Chapter 2	Similarity Threshold Selection Tools for Gene Co-Expression Networks <i>Liliana López-Kleine and Luis Guillermo Leal</i>	23
Chapter 3	Mining Gene Expression Microarrays for Long Non-Coding RNAs <i>L. Zhang, D. R. Wagner and Y. Devaux</i>	37
Chapter 4	An <i>In Situ</i> Electroporation and Flow Device for Mechanotransduction Studies <i>Zoltán Kis, Leila Towhidi, Henry Ip, Emmanuel Drakakis, Anil Bharath and Rob Krams</i>	49
Chapter 5	A New Application for Microarrays: Analysis of Global MicroRNA Expression Profiles in the Extracellular Microvesicles of Human Macrophage-Like Cells <i>Tadayoshi Kagiya and Masayuki Taira</i>	69
Chapter 6	Identification of Reference Genes by Meta-Microarray Analyses <i>Issac H. K. Too, Sean S. J. Heng, Oliver Y. W. Chan, Bryan M. H. Keng, Ching-Yee Chia, Claudia W. X. Lim, Wan-Ting Leong, Qinghao Chu, Ernest J. G. Ang, Yongjie Lin and Maurice H.T. Ling</i>	81
Chapter 7	Invertebrate DNA Chip: Opportunities and Challenges in the Development and Application of Microarrays for Marine Biodiversity Studies <i>Srujana Chitipothu, Alessia Cariani, Fabio Bertasi, Marco Stagioni, Marc Kochzius, Dietmar Blohm, Fausto Tinti and Monica Landi</i>	101

Chapter 8	Using Microarrays to Decipher the Virus-Host Interactions in HCV Infected Patients: Implications for Viral Resistance, Drug Development and Personalized Medicine	135
	<i>Jing Sun, Jianguo Yuan, Bing Liu, Shilin Li, Yujia Li, Xiaoqiong Duan, Chunhui Yang, Peibing Zeng and Limin Chen</i>	
Chapter 9	Microarray Diagnostics for Orthopoxviruses, Filoviruses, Arenaviruses and Type A Influenza Virus	147
	<i>Alexander N. Sinyakov and Vladimir A. Ryabinin</i>	
Chapter 10	Using DNA Microarray Technology to Monitor the Distribution of Antimicrobial Resistance Genes in <i>Escherichia Coli</i> Isolated from Animal Colibacillosis Outbreaks	187
	<i>Pietro Badagliacca, Luke Masson, Alfreda Tonelli, Giacomo Migliorati and Josée Harel</i>	
Chapter 11	Phenotypic Anchoring of Liver Injury in Rats by Gene Expression Profiling	211
	<i>Minjun Chen, Reagan Kelly, Lillian Tong, Jürgen Borlak and Weida Tong</i>	
Chapter 12	Application of Microarray Technology in Toxicology	231
	<i>Abir T. El-Alfy</i>	
Chapter 13	Microarray Analysis of Gene Transcription Profiles in Chronic Rhinosinusitis	251
	<i>Marcin Fraczek, Beata Rostkowska-Nadolska and Malgorzata Kapral</i>	
Chapter 14	Transcriptomic Analysis of Oligomeric Amyloid- β Treated Primary Cortical Neurons Reveals Dysregulation of Genes Involved in the Biosynthesis of Steroids and Cholesterol	269
	<i>Bilal Malik, Cathy Fernandes, Richard Killick, Alessia Usardi, Ritchie Williamson, Stuart Kellie, Brian H. Anderton and C. Hugh Reynolds</i>	
Chapter 15	Application of Microarrays to Cutaneous Chemical Exposures	297
	<i>James V. Rogers and Jennifer A. Price</i>	
Index		315
