

CONTENTS

Preface		vii
Chapter 1	Androgen Receptors in Non-Mammalian Vertebrates: Structure and Function <i>P. Pinto, M. D. Estêvão and S. Socorro</i>	1
Chapter 2	Naturally Occurring Androgen Receptor Splice Variants: Impact on Androgen Signaling Pathways <i>J. E. Cavaco, S. Laurentino, S. Correia, P. Pinto and S. Socorro</i>	27
Chapter 3	Structural and Functional Analysis of the Androgen Receptor in Disease <i>N. Gallastegui and E. Estébanez-Perpiñá</i>	53
Chapter 4	Androgen Receptor Signaling in Prostate Cancer: Genetic and Molecular Aspects <i>L. G. A. Chuffa, J. P. A. Amorim and B. A. Fioruci-Fontanelli</i>	83
Chapter 5	The Role of Androgen Receptor-Regulated Genes in Prostate Cancer Progression <i>J. Lu and D. J. Tindall</i>	107
Chapter 6	Computational Prediction of Regulatory Regions of the Androgen Receptor Messenger RNA <i>J. Spence</i>	129

Chapter 7	Androgens and the Ovary	163
	<i>R. Sá and M. Sousa</i>
