

Contents

Preface		vii
Chapter 1	Late Diagnosis in Multiple X and Y Chromosome Disorders: Role of Learning Disabilities and Behavioural Disorders <i>Annapia Verri, Anna Cremante, Federica Clerici and Anna Mauri</i>	1
Chapter 2	Design and Cloning Strategies of Recombinant Allergens for Diagnosis and Specific Immunotherapy <i>Milica Grozdanovic, Milica Popovic and Marija Gavrovic-Jankulovic</i>	19
Chapter 3	Advances in Molecular Cloning Directing the Production of Plant Proteins and their Applications in Pathogens Control <i>Liliane Souza Conceição Tavares, Sávio Pinho dos Reis, Diego Tuloza da Silva, Aline Medeiros Lima and Cláudia Regina Batista de Souza</i>	47
Chapter 4	Genetic Basis of Congenital Heart Disease <i>Jing-bin Huang, Jian Liang and Xiao-fang Zhao</i>	63
Chapter 5	The Large-Scale Evolution by Generating New Genes from Gene Duplication and the Divergence Pattern of Organisms <i>Jinya Otsuka</i>	85
Chapter 6	Characteristics of MX Gene that Shows Resistance to Vesicular Stomatitis Virus from Avians to Mammals <i>Keisuke Sasaki, Manabu Kawahara and Tomomasa Watanabe</i>	117
Chapter 7	Vertebrate Fatty Acid and Retinoid Binding Protein Genes and Proteins: Evidence for Ancient and Recent Gene Duplication Events <i>Roger S. Holmes</i>	131

Chapter 8	Clonal Evolution and Cytogenetic Changes in Chronic Myeloid Leukemia	181
	<i>Leandro Gutiérrez, Carolina Belli, Cristian Ferri and Irene B. Larripa</i>	
Index		201
