|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| Preface                                                                                                                                                                                                                                                                              | VII        |
| <b>Part 1 Adaptations and Responses to Environmental Extremes</b>                                                                                                                                                                                                                    | <b>1</b>   |
| Chapter 1 Drought and Desiccation-Tolerance and Sensitivity in Plants<br>Tobias M. Ntuli                                                                                                                                                                                             | 3          |
| Chapter 2 Flooding Stress on Plants: Anatomical, Morphological and Physiological Responses<br>Gustavo Gabriel Striker                                                                                                                                                                | 35         |
| Chapter 3 Review on Some Emerging Endpoints of Chromium (VI) and Lead Phytotoxicity<br>Conceição Santos and Eleazar Rodriguez                                                                                                                                                        | 61         |
| <b>Part 2 Economic Botany</b>                                                                                                                                                                                                                                                        | <b>83</b>  |
| Chapter 4 A Mini-Review on Smut Disease of Sugarcane Caused by <i>Sporisorium scitamineum</i><br>A. Ramesh Sundar, E. Leonard Barnabas, P. Malathi and R. Viswanathan                                                                                                                | 85         |
| Chapter 5 Physico-Chemical, Biochemical and Microbiological Phenomena of the Medicinal and Aromatic Plants Extract Used in the Preparation of <i>Tassabount</i> Date Juice in Morocco<br>Hasnaâ Harrak, Marc Lebrun, Moulay Mustapha Ismaïli Alaoui, Samira Sarter and Allal Hamouda | 107        |
| <b>Part 3 Morphogenesis and Genetics</b>                                                                                                                                                                                                                                             | <b>129</b> |
| Chapter 6 The Secretory Glands of <i>Asphodelus aestivus</i> Flower<br>Thomas Sawidis                                                                                                                                                                                                | 131        |

|            |                                                                                                                             |     |
|------------|-----------------------------------------------------------------------------------------------------------------------------|-----|
| Chapter 7  | <b>Microsporogenesis, Pollen Mitosis and <i>In Vitro</i> Pollen Tube Growth in <i>Leucjum aestivum</i> (Amaryllidaceae)</b> | 163 |
|            | Nuran Ekici and Feruzan Dane                                                                                                |     |
| Chapter 8  | <b><i>Ardisia crenata</i> Complex (Primulaceae) Studies Using Morphological and Molecular Data</b>                          | 181 |
|            | Wang Jun and Xia Nian-He                                                                                                    |     |
| Chapter 9  | <b>Plant Special Cell - Cotton Fiber</b>                                                                                    | 191 |
|            | Ling Fan, Wen-Ran Hu, Yang Yang and Bo Li                                                                                   |     |
| Chapter 10 | <b>Hybrid Lethality in the Genus <i>Nicotiana</i></b>                                                                       | 207 |
|            | Takahiro Tezuka                                                                                                             |     |
