

Contents

Preface	VII
Part 1 Epigenetics Technology and Bioinformatics	1
Chapter 1 DNA Methylation Profiling from High-Throughput Sequencing Data Michael Hackenberg, Guillermo Barturen and José L. Oliver	3
Chapter 2 Modelling DNA Methylation Dynamics Karthika Raghavan and Heather J. Ruskin	29
Chapter 3 Inheritance of DNA Methylation in Plant Genome Tomoko Takamiya, Saeko Hosobuchi, Kaliyamoorthy Seetharam, Yasufumi Murakami and Hisato Okuizumi	55
Chapter 4 GC₃ Biology in Eukaryotes and Prokaryotes Eran Elhaik and Tatiana Tatarinova	79
Chapter 5 MethylMeter®: A Quantitative, Sensitive, and Bisulfite-Free Method for Analysis of DNA Methylation David R. McCarthy, Philip D. Cotter, and Michelle M. Hanna	93
Part 2 Human and Animal Health	117
Chapter 6 DNA Methylation and Trinucleotide Repeat Expansion Diseases Mark A. Pook	119
Chapter 7 DNA Methylation in Mammalian and Non-Mammalian Organisms Michael Moffat, James P. Reddington, Sari Pennings and Richard R. Meehan	135

Chapter 8	Aberrant DNA Methylation of Imprinted Loci in Male and Female Germ Cells of Infertile Couples Takahiro Arima, Hiroaki Okae, Hitoshi Hiura, Naoko Miyauchi, Fumi Sato, Akiko Sato and Chika Hayashi	167
Chapter 9	Could Tissue-Specific Genes be Silenced in Cattle Carrying the Rob(1;29) Robertsonian Translocation? Alicia Postiglioni, Rody Artigas, Andrés Iriarte, Wanda Iriarte, Nicolás Grasso and Gonzalo Rincón	177
Chapter 10	Epigenetic Defects Related Reproductive Technologies: Large Offspring Syndrome (LOS) Makoto Nagai, Makiko Meguro-Horike and Shin-ichi Horike	193
Part 3	Methylation Changes and Cancer	209
Chapter 11	Investigating the Role DNA Methylations Plays in Developing Hepatocellular Carcinoma Associated with Tyrosinemia Type 1 Using the Comet Assay Johannes F. Wentzel and Pieter J. Pretorius	211
Chapter 12	DNA Methylation and Histone Deacetylation: Interplay and Combined Therapy in Cancer Yi Qiu, Daniel Shabashvili, Xuehui Li, Priya K. Gopalan, Min Chen and Maria Zajac-Kaye	227
Chapter 13	DNA Methylation in Acute Leukemia Kristen H. Taylor and Michael X. Wang	289
Chapter 14	The Importance of Aberrant DNA Methylation in Cancer Koraljka Gall Trošelj, Renata Novak Kujundžić and Ivana Grbeša	317
Chapter 15	Effects of Dietary Nutrients on DNA Methylation and Imprinting Ali A. Alshatwi and Gowhar Shafi	345
Chapter 16	Epigenetic Alteration of Receptor Tyrosine Kinases in Cancer Anica Dricu, Stefana Oana Purcaru, Raluca Budiu, Roxana Ola, Daniela Elise Tache, Anda Vlad	359
