

Contents

	Preface	VII
Section 1	Machines that Drive DNA Replication	1
Chapter 1	DNA Replication in Archaea, the Third Domain of Life Yoshizumi Ishino and Sonoko Ishino	3
Chapter 2	Pulling the Trigger to Fire Origins of DNA Replication David Stuart	39
Chapter 3	Replicative Helicases as the Central Organizing Motor Proteins in the Molecular Machines of the Elongating Eukaryotic Replication Fork John C. Fisk, Michaelle D. Chojnacki and Thomas Melendy	64
Chapter 4	The MCM and RecQ Helicase Families: Ancient Roles in DNA Replication and Genomic Stability Lead to Distinct Roles in Human Disease Dianne C. Daniel, Ayuna V. Dagdanova and Edward M. Johnson	93
Chapter 5	Proposal for a Minimal DNA Auto-Replicative System Agustino Martinez-Antonio, Laura Espindola-Serna and Cesar Quiñones-Valles	124
Chapter 6	Intrinsically Disordered Proteins in Replication Process Apolonija Bedina Zavec	142
Chapter 7	Extending the Interaction Repertoire of FHA and BRCT Domains Lindsay A. Matthews and Alba Guarné	163

Section 2	Mechanisms that Protect Chromosome Integrity During DNA Replication	186
Chapter 8	Preserving the Replication Fork in Response to Nucleotide Starvation: Evading the Replication Fork Collapse Point Sarah A. Sabatino and Susan L. Forsburg	188
Chapter 9	The Role of WRN Helicase/Exonuclease in DNA Replication Lynne S. Cox and Penelope A. Mason	213
