

CONTENTS

Preface		vii
Chapter 1	Molecular Signaling in the Arbuscular Mycorrhizal Symbiosis <i>Sara Schaarschmidt and Peter M. Gresshoff</i>	1
Chapter 2	Arbuscular Mycorrhizal Structures in Natural and Disturbed Sites <i>Marcela Claudia Pagano</i>	103
Chapter 3	Functions of Mycorrhizae <i>Tzi Bun Ng and Charlene Cheuk Wing Ng</i>	125
Chapter 4	Study of Nitrogen Assimilation in Ectomycorrhiza by RNAi-Based Gene Silencing: The Role of the Laccaria Bicolor Nitrate Transporter <i>Minna J. Kemppainen and Alejandro G. Pardo</i>	139
Chapter 5	Arbuscular Mycorrhizal Fungi in the Alleviation of Oxidative Stress under Cutting Propagation Management <i>María Josefina Bompadre, Roxana Colombo, María del Carmen Ríos de Molina, Alicia Margarita Godeas and Alejandro Guillermo Pardo</i>	181
Chapter 6	Vesicular-Arbuscular Mycorrhizae in Wastewater Irrigated Agriculture <i>Gabriel Camarena Gutiérrez</i>	203

Chapter 7	Potential of Arbuscular Mycorrhizal Fungi and Non-Pathogenic Fusarium for Tolerance to Fusarium Root Rot and Changes in Antioxidative Ability in Asparagus Decline	233
	<i>J. Liu, A. S. M. Nahiyen and Y. Matsubara</i>	
Index		245
