|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Preface</b>   |                                                                                                                                                                                                                                                                                   | <b>vii</b> |
| <b>Chapter 1</b> | Development of Multifunctional Plasmids for Diverse Biotechnological Applications<br><i>Christopher D. Krause, Lara S. Izotova and Sidney Pestka</i>                                                                                                                              | <b>1</b>   |
| <b>Chapter 2</b> | Fragile X Syndrome-Associated Language Phenotypes<br><i>Katalin Csiszar and Adam Szalontai</i>                                                                                                                                                                                    | <b>23</b>  |
| <b>Chapter 3</b> | Study of the FMR1 Gene Structure among Women with Ovarian Dysfunction from the Basque Country<br><i>Maitane Barasoain, Gorka Barrenetxea, Iratxe Huerta, Mercedes Télez, Eduardo Ortiz-Lastra, Javier González, Begoña Criado, Paula Jorge, Isabel Marques and Isabel Arrieta</i> | <b>43</b>  |
| <b>Chapter 4</b> | Chromatin Structure and Epigenetics<br><i>Vichithra R. B. Liyanage, Robby M. Zachariah, Geneviève P. Delcuve, James R. Davie and Mojgan Rastegar</i>                                                                                                                              | <b>57</b>  |
| <b>Chapter 5</b> | The Evolution of Mammalian X Chromosomes and X Chromosome Inactivation<br><i>Claudia L. Rodríguez Delgado and Janine E. Deakin</i>                                                                                                                                                | <b>89</b>  |
| <b>Chapter 6</b> | Modifying Effect of Smoking on the Association between SLE and the Genetic Polymorphisms Involved in ROS Production<br><i>Chikako Kiyohara, Masakazu Washio and Takahiko Horiuchi</i>                                                                                             | <b>131</b> |
| <b>Chapter 7</b> | Therapeutic Approaches to Fragile X Syndrome<br><i>Patricio Barros-Núñez, Mónica Alejandra Rosales-Reynoso, and Clara Ibet Juárez-Vázquez</i>                                                                                                                                     | <b>155</b> |
