

CONTENTS

Preface		vii
Chapter 1	Fluid –Mosaic Cell Membrane Structure: From Cellular Control and Domains to Extracellular Vessicles <i>Garth L. Nicolson</i>	1
Chapter 2	Lipid Rafts in Binary Lipid/Cholesterol Bilayers <i>Richard J. Alsop and Maikel C. Rheinstädter</i>	17
Chapter 3	Membrane Assembly and Lipid Rafts in the Cell and Artificial Membranes: Effect of Lipid Peroxidation <i>Angel Catalá</i>	43
Chapter 4	Drugs, Delivery Systems and Membrane Organization in Model and Cell Membranes <i>Ana E. Ventura, Tânia Santos, Ana C. Carreira, Nuno M. Martinho, J. Conriot, Ana R. P. Varela, Rogério Gaspar, Helena F. Florindo and Liana C. Silva</i>	53
Chapter 5	Role of Sphingomyelin in Membrane-Domain Formation and the Influence on Protein Interaction: Focusing on the Nanometer Scale <i>Sabina Maté, Vanesa Herlax, Romina Vázquez and Laura Bakás</i>	89
Chapter 6	Lipid Rafts and Cell Adhesion: Mutual Modulators of Cell Signaling <i>Andrew M. Overmiller, Donna M. Brennan-Crispi and Mý G. Mahoney</i>	113
Chapter 7	Roles of Glycosphingolipids in the Regulation of the Membrane Organization and Cell Signaling in Lipid Rafts <i>Koichi Furukawa, Yuhsuke Ohmi, Yuki Ohkawa, Noboru Hashimoto, Yuji Kondo, Orié Tajima and Keiko Furukawa</i>	129
