

CONTENTS

Preface		vii
Chapter 1	Potential of Ecological Infrastructures to Restore Conservation Biological Control: Case Study in Spanish Olive Groves <i>Daniel Paredes, Luis Cayuela and Mercedes Campos</i>	1
Chapter 2	Biological Pest Control of the Tetranychid Mite <i>Oligonychus perseae</i> in Avocado and Challenges to Face in a Climate Change Scenario <i>Celeste Guzmán and Marta Montserrat</i>	21
Chapter 3	Biodiversity of Spiders in Agroecosystems: Community Structure, Conservation and Roles as Biological Control Agents <i>Jacinto Benhadi-Marin, José A. Pereira, Albino Bento, José Paulo Sousa and Sónia A. P. Santos</i>	43
Chapter 4	Tracking the Movement of Pest Predators in Arable Crop Landscapes: Implications in Conservation Biological Control Strategies <i>Filipe Madeira and Xavier Pons</i>	111

Chapter 5	Bioecology of <i>Psytalia concolor</i> (Szépligeti) (Hymenoptera: Braconidae) and Management Strategies to Increase Biological Control of the Olive Fruit Fly	141
	<i>Lara A. Pinheiro, Pilar Medina, Albino Bento, José Alberto Pereira and Sónia A. P. Santos</i>	
Chapter 6	Biological Control Based on Native Parasitoids Associated with <i>Dryocosmus kuriphilus</i> Yasumatsu in Invaded Countries	177
	<i>Ana Santos, José Alberto Pereira, Sónia A. P. Santos, Ambra Quacchia and Albino Bento</i>
