

CONTENTS

Preface		vii
Chapter 1	Advanced Techniques to Detect Protein-Protein Interactions Using Solution Nuclear Magnetic Resonance, Part I: Chemical Shift Perturbation and Residual Dipolar Coupling <i>Young-Ho Lee and Toshihiko Sugiki</i>	1
Chapter 2	Advanced Techniques to Detect Protein-Protein Interactions Using Solution Nuclear Magnetic Resonance, Part II: Cross-Saturation, Paramagnetic Effects, and In-Cell NMR <i>Toshihiko Sugiki and Young-Ho Lee</i>	23
Chapter 3	Identifying Protein-Protein Interactions via Many Learning Methods Based on Protein Sequence Information <i>Yijie Ding, Jijun Tang and Fei Guo</i>	45
Chapter 4	Thermodynamics of Protein-Protein Interactions Examined by Isothermal Titration Calorimetry <i>Ju Yaen Kim, Misaki Kinoshita, Takashi Inui, Genji Kurisu, Yuji Goto, Toshiharu Hase, Koichiro Ishimori and Young-Ho Lee</i>	67
Chapter 5	Molecular Structure of Amyloid Fibrils Revealed by Thermodynamics <i>Tatsuya Ikenoue, Yuxi Lin, Misaki Kinoshita, Kazumasa Sakurai, Yuji Goto and Young-Ho Lee</i>	81

Chapter 6	Protein Self-Interaction in Health and Disease: How Dimerization, Oligomerization and Polymerization Modulate Protein Function	97
	<i>Ailis O'Carroll, Mehdi Moustaqil, Andre D.G. Leita, Yann Gambin and Emma Sierecki</i>	
Index		153
