

Table of Contents

List of Contributors	VII
Preface	IX
Chapter 1	1
Dominant Selectable Markers for <i>Penicillium</i> spp. Transformation and Gene Function Studies	
Chapter 2	15
Soil Fungal Community Development In A High Arctic Glacier Foreland Follows A Directional Replacement Model, With A Mid-Successional Diversity Maximum	
Chapter 3	36
Ectomycorrhizal Fungal Communities and Enzymatic Activities Vary across an Ecotone between a Forest and Field	
Chapter 4	70
Advances in Molecular Diversity of Arbuscular Mycorrhizal Fungi (Phylum Glomeromycota) in Forest Ecosystems	
Chapter 5	110
Taxonomy Of <i>Penicillium Citrinum</i> And Related Species	
Chapter 6	144
Taxonomy And Phylogeny Of The Brown-Rot Fungi: <i>Fomitopsis</i> And Its Related Genera	
Chapter 7	204
Phylogeny, taxonomy and diversification events in the Caliciaceae	
Chapter 8	241
Gamma Irradiation-Induced Variation in <i>Dendrobium Sonia</i> -28 OrchidProtocorm-Like Bodies (PLBs)	
Chapter 9	272
Linking Molecular Deadwood-Inhabiting Fungal Diversity And Community Dynamics To Ecosystem Functions And Processes In Central European Forests	

Chapter 10	302
Fifty Years Of Oomycetes—From Consolidation To Evolutionary And Genomic Exploration	
Chapter 11	333
Molecular diversity of fungal communities in agricultural soils from Lower Austria	
Chapter 12	355
The Biological Diversity and Production of Volatile Organic Compounds by Stem-Inhabiting Endophytic Fungi of Ecuador	
Citation	372
Index	374
