Chapter 1 Vertebrates Ecophysiology: An Overview

Introduction.....	1
Learning Objectives.....	1
1.1 Origin of Vertebrate.....	3
1.1.1 Overview of the Evolution of Vertebrates	5
1.1.2 Sea Squirts and the Lancelet	7
1.1.3 Phylum Hemichordata: Pterobranchs and Acorn Worms.....	9
1.1.4 Deuterostome Relationships	10
1.1.5 Vertebrates and the Head.....	13
1.2 Characteristics of the Vertebrate Animals.....	15
1.2.1 Fishes.....	16
1.2.2 Amphibians (Class Amphibia)	20
1.2.3 Reptiles (Class Reptilia).....	22
1.2.4 Birds (Class Aves).....	26
1.2.5 Mammals (Class Mammalia).....	31
Summary.....	38
Knowledge Check.....	39
Review Questions	40
Check Your Result	40
References	40

Chapter 2 Homeostasis

Introduction.....	41
Learning Objectives.....	41
2.1 Homeostasis: A Fundamental Organizing Paradigm.....	42
2.1.1 The Need to Maintain Homeostasis	43
2.1.2 Antagonistic Effectors and Positive Feedback	48
2.2 Extracellular fluid Concentration in Vertebrates	50
2.2.1 Osmoregulatory Organs.....	53
2.2.2 Evolution of the Vertebrate Kidney	56

2.3	Functions of the Vertebrate Kidney	62
2.3.1	The Mammalian Kidney	63
2.3.2	Transport Processes in the Mammalian Nephron	66
2.3.3	Ammonia, Urea, and Uric Acid	69
2.3.4	Hormones Control Homeostatic Functions.....	70
	Summary	75
	Knowledge Check.....	75
	Review Questions	76
	Check Your Result	77
	References	77

Chapter 3 Physiology of Chordates

	Introduction.....	79
	Learning Objectives	79
3.1	Structure of Chordates.....	80
3.1.1	Membrane of the phylum Chordate.....	81
3.1.2	Nonvertebrate Chordates.....	84
3.1.3	Reproduction and Life Cycle.....	87
3.1.4	Form and Function of Chordates	88
3.2	Origin of Chordates	93
3.2.1	Element and Characteristics of Phylum Chordata	97
3.2.2	Classification of Phylum Chordate	98
3.3	Protochordates	102
3.3.1	Hemichordata	103
3.3.2	Herdmania.....	111
	Summary	119
	Knowledge Check.....	120
	Review Questions	121
	Check Your Result	121
	References	121

Chapter 4 Survival in the Desert

	Introduction.....	123
	Learning Objectives.....	123
4.1	Evolution of Desert Animals.....	125
4.1.1	Adaptations of Desert Animals	127
4.1.2	Animal Species	131

4.2	Vertebrates Survival in Deserts	134
4.2.1	Frogs and Toads in Deserts	135
4.2.2	Lizards survive in the desert	139
4.2.3	Desert Tortoises	141
4.2.4	Environment for Desert Rodents	144
4.2.5	Jackrabbits Life in the Desert	150
	Summary	155
	Knowledge Check	155
	Review Questions	156
	Check Your Result	156
	References	157

Chapter 5 Ecophysiology of Marine Vertebrates

	Introduction	159
	Learning Objectives	159
5.1	Ecophysiology of Marine Mammals	161
5.1.1	Oceanography and Marine Mammal	162
5.1.2	Marine Mammal Identification	164
5.1.3	Diving Physiology of Marine Vertebrates	165
5.1.4	Adaptations to Pressure	166
5.1.5	Lung collapse	166
5.1.6	Diseases Associated with Gases at Pressure	167
5.1.7	Diving Metabolism	169
5.1.8	Redistribution of blood flow	170
5.1.9	Oxygen Stores	171
5.1.10	ADL and the Physiology of Freely Diving Animals	172
5.1.11	Determinants of Diving Behavior	175
5.2	Climate Change and Marine Vertebrates	177
5.2.1	Taxonomic Diversity	178
5.2.2	Phenology	181
5.2.3	Demography	183
5.2.4	Capacity for adaptation	185
	Summary	189
	Knowledge Check	190
	Review Questions	190
	Check Your Result	191
	References	191

Chapter 6 Diversity of Vertebrates

Introduction.....	193
Learning Objectives.....	193
6.1 Vertebrate Diversity and Demography	194
6.1.1 General Characteristics of the Tropical Region.....	195
6.1.2 Factors that Cause Diversity	197
6.1.3 Demography and Tropical Ecosystem	202
6.2 Microevolution and the Genetic Basis of Vertebrate Diversity.....	205
6.2.1 Sticklebacks (Family Gasterosteidae)	207
6.2.2 Armor Plate Variation	209
6.2.3 Reduction and Loss of the Pelvic Fin Complex	211
6.2.4 Body Shape Variation	213
6.3 Diversity of Vertebrate Feeding Systems	213
6.3.1 Morphology of the Feeding Apparatus	214
6.3.2 Speciation in the Tropical Rainforests	220
Summary.....	227
Knowledge Check.....	228
Review Questions	228
Check Your Result	229
References	229
