|                                                                                                                                                                                 |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Preface.....                                                                                                                                                                    | VII |
| Chapter 1 Differential Expression of Rubisco in Sporophytes and Gametophytes of Some Marine Macroalgae.....                                                                     | 1   |
| Chao Wang, Xiaolei Fan, Guangce Wang, Jianfeng Niu, Baicheng Zhou                                                                                                               |     |
| Chapter 2 Adjusted Light and Dark Cycles can Optimize Photosynthetic Efficiency in Algae Growing in Photobioreactors.....                                                       | 13  |
| Eleonora Sforza, Diana Simionato, Giorgio Mario Giacometti, Alberto Bertucco, Tomas Morosinotto                                                                                 |     |
| Chapter 3 Scale-Dependent Effects of Grazing on Plant C: N: P Stoichiometry and Linkages to Ecosystem Functioning in the Inner Mongolia Grassland.....                          | 23  |
| Shuxia Zheng, Haiyan Ren, Wenhui Li, Zhichun Lan                                                                                                                                |     |
| Chapter 4 Fundamental Limits on Wavelength, Efficiency and Yield of the Charge Separation Triad.....                                                                            | 37  |
| Alexander Punnoose, Liza McConnell, Wei Liu, Andrew C. Mutter, Ronald Koder                                                                                                     |     |
| Chapter 5 Interactive Effect of Herbivory and Competition on the Invasive Plant <i>Mikania micrantha</i> .....                                                                  | 48  |
| Junmin Li, Tao Xiao, Qiong Zhang, Ming Dong                                                                                                                                     |     |
| Chapter 6 Enhanced Lipid Productivity and Photosynthesis Efficiency in a <i>Desmodium</i> sp. Mutant Induced by Heavy Carbon Ions.....                                          | 55  |
| Guangrong Hu, Yong Fan, Lei Zhang, Cheng Yuan, Jufang Wang, Wenjian Li, Qiang Hu, Fuli Li                                                                                       |     |
| Chapter 7 Comparison of Photoacclimation in Twelve Freshwater Photoautotrophs (Chlorophyte, Bacillariophyte, Cryptophyte and Cyanophyte) Isolated from a Natural Community..... | 63  |
| Charles P. DeBlois, Axelle Marchand, Philippe Juneau                                                                                                                            |     |
| Chapter 8 Quantum Transport in Networks and Photosynthetic Complexes at the Steady State.....                                                                                   | 77  |
| Daniel Manzano                                                                                                                                                                  |     |
| Chapter 9 Mutations of Photosystem II D1 Protein that Empower Efficient Phenotypes of <i>Chlamydomonas reinhardtii</i> under Extreme Environment in Space.....                  | 85  |
| Maria Teresa Giardi, Giuseppina Rea, Maya D. Lambreva, Amina Antonacci, Sandro Pastorelli, Ivo Bertalan, Udo Johanningmeier, Autar K. Mattoo                                    |     |
| Chapter 10 Does Chloroplast Size Influence Photosynthetic Nitrogen use Efficiency?.....                                                                                         | 95  |
| Yong Li, Binbin Ren, Lei Ding, Qirong Shen, Shaobing Peng, Shiwei Guo                                                                                                           |     |

|            |                                                                                                                                                                           |     |
|------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Chapter 11 | <b>Trait Values, not Trait Plasticity, Best Explain Invasive Species' Performance in a Changing Environment</b> .....                                                     | 105 |
|            | Virginia Matzek                                                                                                                                                           |     |
| Chapter 12 | <b>Economic Analysis of Greenhouse Lighting: Light Emitting Diodes vs. High Intensity Discharge Fixtures</b> .....                                                        | 115 |
|            | Jacob A. Nelson, Bruce Bugbee                                                                                                                                             |     |
| Chapter 13 | <b>An Invasive Clonal Plant Benefits from Clonal Integration more than a Co-Occurring Native Plant in Nutrient-Patchy and Competitive Environments</b> .....              | 125 |
|            | Wenhua You, Shufeng Fan, Dan Yu, Dong Xie, Chunhua Liu                                                                                                                    |     |
| Chapter 14 | <b>Seagrass Proliferation Precedes Mortality during Hypo-Salinity Events: A Stress-Induced Morphometric Response</b> .....                                                | 136 |
|            | Catherine J. Collier, Cecilia Villacorta-Rath, Kor-jent van Dijk, Miwa Takahashi, Michelle Waycott                                                                        |     |
| Chapter 15 | <b>Evaluation of Algal Biofilms on Indium Tin Oxide (ITO) for use in Biophotovoltaic Platforms based on Photosynthetic Performance</b> .....                              | 147 |
|            | Fong-Lee Ng, Siew-Moi Phang, Vengadesh Periasamy, Kamran Yunus, Adrian C. Fisher                                                                                          |     |
| Chapter 16 | <b>Plastic Traits of an Exotic Grass Contribute to its Abundance but are not Always Favourable</b> .....                                                                  | 160 |
|            | Jennifer Firn, Suzanne M. Prober, Yvonne M. Buckley                                                                                                                       |     |
| Chapter 17 | <b>Photosynthesis in <i>Chromera velia</i> Represents a Simple System with High Efficiency</b> .....                                                                      | 172 |
|            | Antonietta Quigg, Eva Kotabová, Jana Jarešová, Radek Kaňa, Jiří Šetlík, Barbora Šedivá, Ondřej Komárek, Ondřej Prášil                                                     |     |
| Chapter 18 | <b>Endophyte-Mediated Effects on the Growth and Physiology of <i>Achnatherum sibiricum</i> are Conditional on both N and P Availability</b> .....                         | 184 |
|            | Xia Li, Anzhi Ren, Rong Han, Lijia Yin, Maoying Wei, Yubao Gao                                                                                                            |     |
| Chapter 19 | <b>Can Physiological Endpoints Improve the Sensitivity of Assays with Plants in the Risk Assessment of Contaminated Soils?</b> .....                                      | 193 |
|            | Ana Gavina, Sara C. Antunes, Glória Pinto, Maria Teresa Claro, Conceição Santos, Fernando Gonçalves, Ruth Pereira                                                         |     |
| Chapter 20 | <b>Latitudinal Patterns in Phenotypic Plasticity and Fitness-Related Traits: Assessing the Climatic Variability Hypothesis (CVH) with an Invasive Plant Species</b> ..... | 205 |
|            | Marco A. Molina-Montenegro, Daniel E. Naya                                                                                                                                |     |
| Chapter 21 | <b>The Response of the Mediterranean Gorgonian <i>Eunicella singularis</i> to Thermal Stress is Independent of its Nutritional Regime</b> .....                           | 213 |
|            | Leila Ezzat, Pierre-Laurent Merle, Paola Furla, Alexandre Buttler, Christine Ferrier-Pagès                                                                                |     |
