

CONTENTS

<i>List of Abbreviations</i>	ix
<i>Preface</i>	xiii
<i>About the Authors</i>	xv
1. Molecular Mycology: An Introduction	1
2. Fungal Identification: Conventional Approaches and Current Scenario	15
3. Molecular Tools for Identification of Fungi	23
4. Genetic Improvement of Industrially Important Fungal Strains	45
5. Fungal Strain Improvement through Recombinant DNA Technology	57
6. Molecular Improvement of Fungal Strains	75
7. Bioinformatic Approaches for Identification of Fungal Species and Detection of Secondary Metabolites	95
8. Fungal Biomolecules and Fungal Secondary Metabolites	119
9. Fungal Biomolecules for Degradation of Xenobiotics and Ecosystem Management	127
10. Fungal Secondary Metabolites for Biocontrol and Sustainable Agriculture	153
11. Molecular Interventions in Fungal Studies for Sustainable Development	163
<i>Index</i>	169
