

TABLE OF CONTENTS

<i>Preface</i>	<i>xiii</i>
Chapter 1 Ecological Genomics: An Introduction	1
1.1. Introduction.....	2
1.2. Why Ecological Genomics?	2
1.3. Genomics Revolution	3
1.4. Conclusions.....	4
Chapter 2 Biopython: Bioinformatics Analysis	5
2.1. An Introduction	6
2.2. Quick Start	8
2.3. Sequence Objects.....	15
2.4. Sequences and Alphabets	16
2.5. Sequences Act Like Strings.....	18
2.6. Slicing a Sequence.....	19
2.7. Turning Seq Objects Into Strings.....	21
2.8. Concatenating or Adding Sequences.....	22
2.9. Changing Case.....	24
2.10. Nucleotide Sequences and (Reverse) Complements	25
2.11. Transcription.....	26
2.12. Translation	28
2.13. Translation Tables.....	32
2.14. Comparing Seq Objects	34
2.15. MutableSeq Objects	36
2.16. UnknownSeq Objects.....	38
2.17. Working With Strings Directly.....	40
2.18. Conclusions.....	108

Chapter 3	Python For Processing Ecological Data	109
	3.1. DataFrames In Pandas	110
	3.2. Reading CSV Data Using Pandas.....	112
	3.3. So What's a DataFrame?.....	113
	3.4. Exploring Our Species Survey Data.....	114
	3.5. Calculating Statistics From Data in a Pandas DataFrame	115
	3.6. Groups in Pandas.....	116
	3.7. Quickly Creating Summary Counts in Pandas	118
	3.8. Basic Math Functions.....	118
	3.9. Quick & Easy Plotting Data Using Pandas.....	119
	3.10. Indexing and Slicing in Python	120
	3.11. Extracting Range Based Subsets: Slicing.....	121
	3.12. Slicing Subsets of Rows in Python.....	121
	3.13. Copying Objects vs Referencing Objects in Python	122
	3.14. Slicing Subsets of Rows and Columns in Python	123
	3.15. Python Syntax – Summary	125
	3.16. Concatenating DataFrames	127
	3.17. Writing Out Data to CSV	128
	3.18. Joining DataFrames.....	129
	3.19. Identifying Join Keys	130
	3.20. Inner Joins	131
	3.21. Left Joins.....	132
	3.22. Other Join Types	134
	3.23. Conclusions.....	135
Chapter 4	Genomics	137
	4.1. Genes and Genomes	138
	4.2. DNA and Gene Transcription.....	138
	4.3. Gene Translation and the Genetic Code.....	139
	4.4. NGS Analysis of Genomes.....	140
	4.5. Sequence Analysis in R and Bioconductor	141
	4.6. String in R Base.....	142
Chapter 5	NGS Sequence Analysis.....	155
	5.1. Phred Scores.....	156
	5.2. Sequence and Quality Data: Quality Scale X String Set.....	157

5.3. Processing FASTQ Files With ShortRead	160
5.4. Conclusions	187
Chapter 6 Population Genetics – A Computational Approach	189
6.1. Genetic Diversity In A Population – Hardy-Weinberg Principle.....	190
6.2. Genetic Differentiation From SSR Data	197
6.3. Estimation.....	199
6.4. Confidence Intervals	202
6.5. Analysis of Molecular Variance (AMOVA)	204
6.6. Other Implementations	206
6.7. Discriminant Analyzes of Principal Components (DAPC)	207
6.8. Genetic Distances From SNP Data.....	209
6.9. Conclusions.....	215
Chapter 7 Population Genomics	217
7.1. Opening and Examining the Dataset.....	218
7.2. VCF File Structure	219
7.3. The Meta Region.....	220
7.4. The Gt Region.....	224
7.5. vcfr Package.....	225
7.6. Converting VCF Data to a Genlight Object	228
7.7. Using ChromR to Locate Unusual Features in a Genome	231
7.8. Genetic Differentiation	239
7.9. GBS Analysis	243
7.10. Population Genetic Analyzes for GBS Data.....	249
7.11. DAPC	255
7.12. DAPC Analysis of Phytophthora Ramorum From Forests and Nurseries	259
7.13. Conclusions.....	264
References	274
Chapter 8 Populations Strata: Subsetting, Clone Correction and Structure	277
8.1. Working With Stratified Data	278
8.2. Advanced R: Writing Your Own Functions For Analysis by Stratum.....	288
8.3. Locus Stats, Heterozygosity, HWE.....	290

8.4. Hardy-Weinberg Equilibrium	299
8.5. Advanced: Visualization of Population-Wise <i>P</i> -Values.....	307
8.6. Genotypic Richness, Diversity, and Evenness	308
References	331
Index	333
