

Contents

Preface	vii
PART I CROP ANATOMY AS A SUBJECT	
1 Origin and Development of Crop Anatomy	1
2 Relevance of Anatomical Studies in Modern Crop Science	6
3 Techniques of Crop Anatomy Study	15
4 General Anatomy of Crop Plants	21
PART II ANATOMY OF MAJOR CROPS	
5 Cereals	44
6 Pulses	95
7 Oil Crops	125
8 Fibre Crops	156
9 Vegetable Crops	206
PART III ANATOMICAL CHANGES IN CROPS UNDER ADAPTATION	
10 Anatomical Adaptation to Defence Against Biotic Stresses	269
11 Anatomical Adaptation for Drought and Waterlogging Stress Tolerance	278
PART IV ANATOMY AND CROP PRODUCTIVITY	
12 Anatomical Adaptation in Crop Plants to Harvest Higher Energy	285
13 Anatomical Adaptation for Better Reproduction Efficiency	293
14 Anatomical Basis of Crop Ideotype for Higher Productivity	300
Index	307
