

Contents

1. The role of plant viroids in diseases – new developments <i>F. Di Serio, E. M. Torchetti, R. Flores and B. Navarro</i>	1
2. Antioxidant properties <i>in vitro</i> and <i>in vivo</i>: realistic assessments of efficacy of plant extracts <i>Rong Tsao and Hongyan Li</i>	11
3. Seed orchard genetics <i>Tomas Funda and Yousry A. El-Kassaby</i>	21
4. Perennial herbaceous crops with potential for biofuel production in the temperate regions of the USA <i>T. B. Voigt, D. K. Lee and G. J. Kling</i>	45
5. Using near-infrared spectroscopy to predict postharvest quality <i>José Antonio Cayuela Sánchez</i>	59
6. Influence of climate change on plant disease infections and epidemics caused by viruses and bacteria <i>Roger A. C. Jones and Martin J. Barbetti</i>	73
7. Aromatic plant species in agricultural production systems based on marginal soils <i>E. V. S. Prakasa Rao</i>	105
8. Bioenergy: a potential for developing countries? <i>Laurens Landeweerd, Robin Pierce, Julian Kinderlerer and Patricia Osseweijer</i>	115
9. Appropriate precision agriculture with site-specific cropping system management for marginal and small farmers <i>Dhananjoy Mandal, Partha Pratim Ghosh and M. K. Dasgupta</i>	121
10. Increasing the vitamin E content of food by in-plant production <i>Gemma Farré, Uxue Zorrilla, Judit Berman, Changfu Zhu, Paul Christou and Teresa Capell</i>	137
11. REDD reckoning: a review of research on a rapidly moving target <i>F. Seymour</i>	147
12. Olives and olive oil: diet and health impacts <i>S. Lopez, B. Bermudez, L. M. Varela, A. Ortega, S. Jaramillo, R. Abia and F. J. G. Muriana</i>	161
13. Biofuels: the food versus fuel debate <i>Govinda R. Timilsina</i>	171
14. Switchgrass – practical issues in developing a fuel crop <i>Yogendra N. Shastri, Alan C. Hansen, Luis F. Rodríguez and K.C. Ting</i>	179

15. Toxicity of <i>Jatropha curcas</i> L. as a biofuel crop and options for management <i>M. Baldini, S. Raranciuc and M. Vischi</i>	193
16. Using metabolomics to improve the quality of harvested fruit <i>G. Oms-Oliu, I. Odriozola-Serrano and O. Martin-Belloso</i>	207
17. Soybean sudden death syndrome – advances in knowledge and disease management <i>L. F. Leandro, N. Tatalovic and A. Luckew</i>	215
18. High-value horticulture in developing countries: barriers and opportunities <i>Errol W. Hewett</i>	229
19. The tomato borer <i>Tuta absoluta</i>: insecticide resistance and control failure <i>R. N. C. Guedes and H. A. A. Siqueira</i>	245
20. Genetic diversity in the <i>Jatropha</i> genus and its potential application <i>Wei Xu, Sujatha Mulpuri and Aizhong Liu</i>	253
