

Contents

<i>Preface</i>	(vii)
1. Plant Molecular Physiology	1
• Plant Cells • Water and Plant Cells • Mineral Nutrition • Observing Roots below Ground • Solute Transport	
2. Techniques of Molecular Biology	51
• Expression Cloning • The Cell • Anatomy • Subcellular Components • Genetic Material • Structures Outside the Cell Wall • Functions • Cell Size • Comparison of the Three Types of Cell Division	
3. Molecular Marker	72
• Molecular Markers in Plant Genome Analysis • Types and Description of DNA Markers • Minisatellite and Microsatellite Sequences Converted into PCR-based Markers • Genetic Marker • An Introduction to Genetic Data Analysis • Genetics and Education	
4. Micropropagation in Plants	98
• Low Cost Options in Tissue Culture • Physical Components of Tissue Culture Technology • Control of Growing Conditions • Washing and Sterilising Operations • Use of Liquid Media and Physical Matrices • Low Cost Option for Media making	
5. Recent Advances in Plant Biotechnology	126
• Gene and Genome Analysis • Recombinant DNA Technology • Legal and Regulatory Issues • Abiotic and Biotic Resistance • Anti-HIV Agents among Desert Plants • Metagenomics • Longer Sequences from Environmental Samples • Stem Cell • Embryonic Stem Cell • Potential Clinical Use • Adult • Types • Adult Stem Cell Therapies • Induced Pluripotent Stem Cell • Stem Cell Line • Stem Cell Treatments • Haematopoiesis (Blood Cell Formation) • Stem Cell use in Animals • Embryonic Stem Cell Controversy • Stem Cell Treatments Around the World • Industrial Microbiology • Secretome: Clues into Pathogen Infection and Clinical Applications • Approaches for Secretome Analysis • Clinical Applications • Methanogen	

6. Plant Genetic Diversity	201
• Novel Technologies for Biodiversity Assessment and Monitoring	
• Bioprospecting for Novel Genes • Types of Questions, Markers and Marker Assays • Guidelines for Selecting Marker Assays	
• Future Dimensions of Genetic Analysis	
7. Tissue Culture	232
• Tissue Culture in Cotton • Transgenic Technology • Tissue Culture of Banana • Tissue Culture of Medicinal Plant	
• Traditional Chinese Medicinal Plants	
8. Plant Reproduction	253
• Making More Mosses • Reproduction in Plants • Sexual Reproduction • Plant Reproduction • Genetic Variations in Plants	
• Describing and Observing Phenotypic Variation • Genetic Diversity • The Quest for the Hardy Cedar-of-Lebanon • Cedrus Libani in Asia Minor • Breeding Methods in Crop Plants • Cross Pollinated Crops • Mutation Breeding • Bulk Population Method	
• US Patent 5332408-Methods and Reagents for Backcross Breeding of Plants • Selection Methods in Plant Breeding based on Mode of Reproduction • Backcross Versus Forward Breeding in the Development of Transgenic Maize Hybrids: Theory and Practice • Factors Affecting the Choice of Breeding Method	
• Molecular Biology
