

Contents

Section 1: Fuel and Building Supplies

Chapter 1	
The Chemistry of Space Travel	3
1.1 Is it in Our Nature?	4
1.2 A Reaction of Self-replication	5
1.3 A Risky Strategy	8
1.3.1 Eating	8
1.3.2 Reproduction	9
1.3.3 Status	10
1.3.4 Free Will	12
1.4 Chemistry Fundamentals—A Possible Way Back	16
References	23

Chapter 2	
The Chemistry of Taste	25
2.1 How Muscles Work	30
2.2 How Taste Buds Work	40
2.2.1 Ion Channel Taste Receptors	41
2.2.2 G-Protein Coupled Taste Receptors	43
2.2.3 What Happens Next?	45
2.3 What They All Have in Common	47
References	49

The Chemistry of Human Nature

Chapter 3	
The Chemistry of Pleasure	51
3.1 The Pleasure Circuit	52
3.1.1 Ions and Potential	53
3.1.2 How Neurons in the Gustatory Nerve Transmit Sweet Signals	54
3.1.3 Tasting Chocolate: The Next Step	60
3.2 The Case for Food Addiction	68
3.2.1 Where Next for Dopamine and Food Addiction?	73
References	75
Chapter 4	
The Chemistry of Life's Origins	79
4.1 Where Did RNA Come From?	90
4.2 Chemical Evolution	95
4.3 Cosmic Origins	98
References	100
Chapter 5	
The Chemistry of Evolution	102
5.1 From Self-replicators to Organisms	103
5.1.1 Cell Membranes	103
5.1.2 Proteins	104
5.2 From Replication to Reproduction	110
5.2.1 Single-celled Organisms	111
5.2.2 Multicellular Organisms	111
5.2.3 Sexual Reproduction	113
5.3 Developing Choice	120
5.4 Introducing Pleasure	125
References	130
Section 1: Concluding Remarks	134
References	136

Section 2: Love and Relationships

Chapter 6

The Chemistry of Lust 141

6.1 Androgens and Women 147

6.2 How Testosterone Works 148

6.3 A Radical Transmitter 157

6.4 Priming Genitals 159

6.5 The Lust Hypothesis 164

References 164

Chapter 7

The Chemistry of Romantic Love 169

7.1 Monoamines 172

7.1.1 Getting Rid of Monoamines 175

7.2 The Hypothesis Develops 177

7.3 Duping Dopamine Receptors 179

7.4 What about Humans? 181

7.5 Which Neurotransmitter? 183

7.6 Why Does My Heart Go Boom? 186

7.7 Another Role for Noradrenaline 189

References 194

Chapter 8

The Chemistry of Attachment 198

8.1 The Puppet Masters of Mammalian Attachment 203

8.2 Oxytocin—the Cuddle Hormone? 206

8.3 The Role of Temperature 208

8.4 Cheating the Sensors 209

8.5 Not a Cuddle Hormone 218

8.6 The Neuromodulator 218

8.7 Reward 221

References 225

Chapter 9	
The Chemistry of Baby Making	229
9.1 Epigenetics	230
9.2 Foetal Development	236
9.2.1 The Three Hypotheses	239
9.2.2 Mechanism	242
9.2.3 Merging Hypotheses	244
9.3 Epigenetic Inheritance	248
9.4 Conclusion	249
References	249
Section 2: Concluding Remarks	252
Section 3: The Chemistry of Character	
Chapter 10	
The Chemistry of Creative Intelligence	259
10.1 The Birth of a Paradigm	261
10.2 How Heritable is Creativity?	266
10.3 The Validity of Heritability Studies	268
10.4 The Price of Creativity	270
10.5 Nature-Nurture Duality	276
10.6 A Role for the Reward Network?	280
References	281
Chapter 11	
The Chemistry of Violence	287
11.1 Foetal Alcohol Spectrum Disorder	288
11.2 What is a Gene Anyway?	290
11.3 Brunner Syndrome	292
11.4 Other Problems with the MAO A Gene	294
11.5 A Role for the Epigenome	296
11.6 A Role for the Reward Network	297
11.7 Conclusion	299
References	300

Chapter 12

The Chemistry of Dominance 303

12.1 What is Dominance? 305

12.2 Dominance and Status 308

12.3 Heritability of Status 310

12.4 Findings from Neuroscience 314

12.4.1 Processing Information 316

12.5 Cocaine Studies 318

12.6 Serotonin 321

12.7 The Winner Effect 323

12.7.1 Nobel Legacies Boosting the Hypothesis for
Reward Mediation of the Winner Effect 325

12.8 Conclusion 331

References 332

Section 3: Concluding Remarks 336**Section 4: So What?**

Chapter 13

The Chemistry of Free Will 341

13.1 Unease around Emerging Biology 341

13.1.1 Dennett's Position 343

13.2 Indeterminacy 347

13.3 Pleasure and the Three Directives 348

13.4 Breaking the Rules 351

13.4.1 Sex and Drugs 351

13.4.2 Buddhism 352

13.4.3 So, Can We Break the Rules or Not? 354

13.5 A Healthy Balance? 355

13.6 More Answers from Buddhism 357

13.7 What Should We Change? 359
