Chapter 1	Introduction	1
	V. Zagorij	
	References	15
Chapter 2	Introduction to Mass Spectrometry Instrumentation and Methods Used in Chemical Biology	17
	P. Herrero, A. Delpino-Rius, M. R. Ras-Mallorquí, L. Arola and N. Canela	
2.1	Introduction to Mass Spectrometry (MS)	17
2.1.1	The MS	18
2.2	Sample Introduction and Separation Methods for Coupling to MS	19
2.2.1	LC	19
2.2.2	GC	21
2.2.3	Capillary Electrophoresis (CE)	23
2.3	Ionization Methods	23
2.3.1	EI	24
2.3.2	CI	25
2.3.3	ESI	26
2.3.4	APCI	28
2.3.5	MALDI	29
2.3.6	Other Ionization Techniques	30
2.4	Mass Analysers	30
2.4.1	TOF Mass Analysers	31

Chemical Biology No. 4

Mass Spectrometry in Chemical Biology: Evolving Applications

Edited by Norberto Pepporine Lopes and Ricardo Roberto da Silva

Published by the Royal Society of Chemistry, www.rsc.org

2.4.2	Magnetic Sector Mass Analysers	33
2.4.3	Quadrupole	34
2.4.4	Ion Traps (ITs)	34
2.4.5	Orbitrap	35
2.4.6	Ion Cyclotron Resonance (ICR)	36
2.5	Detectors	36
2.5.1	Faraday Cup	36
2.5.2	EM Detectors	37
2.5.3	Scintillator Detectors	37
2.5.4	FT	38
2.6	Tandem MS (MS/MS)	38
2.6.1	Hybrid Instruments	39
2.6.2	Fragmentation Devices	42
2.7	Application of MS to Chemical Biology	44
2.7.1	Types of Biomolecules Analysed by MS	44
2.7.2	Other MS Applications: Imaging MS and Microorganism Identification	48
	Abbreviations	48
	Acknowledgements	49
	References	50
Chapter 3	Metabolomics	57
	<i>Ricardo R. da Silva, Norberto Pepporine Lopes and Denise Brentan Silva</i>	
3.1	Introduction	57
3.2	Experimental Design	59
3.3	Sample Preparation	63
3.4	Analytical Platforms—Hyphenated Methods	66
3.5	Data Acquisition	68
3.6	Data Processing	70
	References	75
Chapter 4	Proteomics	82
	<i>Swati Varshney, Trayambak Basak, Mainak Dutta and Shantanu Sengupta</i>	
4.1	Introduction to Proteomics	82
4.2	Sample Preparation for Proteomics Studies and Proteolysis	85
4.3	Approaches for Protein Separation	87
4.3.1	Gel-based Proteomics Approaches	87
4.3.2	Gel-free Proteomics Approaches	89
4.4	Multidimensional Protein Identification Technology (MudPIT)	92
4.5	MS for Proteomics	93
4.5.1	Ionization	93

4.5.2 Mass Analyzers	94
4.6 Tandem MS (MS/MS)	95
4.7 Approaches in Proteomics	95
4.7.1 Top-down Proteomics Approach	95
4.7.2 Bottom-up Proteomics Approach	98
4.7.3 Directed Proteomics Approach	99
4.7.4 Targeted Proteomics Approach	100
4.8 Quantitative Proteomics	100
4.8.1 2D Difference GE (2D-DIGE)	101
4.8.2 Labeled Quantification or Stable Isotope Labeling	102
4.8.3 Label-free Quantification	108
4.8.4 Absolute Quantification	111
4.9 Computational Methods of Proteomics Data Analysis	113
4.10 Applications of Proteomics	118
Acknowledgement	119
References	119
Chapter 5 Mass Spectrometry for Discovering Natural Products	144
<i>Paulo C. Vieira, Ana Carolina A. Santos and Taynara L. Silva</i>	
5.1 Introduction	144
5.2 GC-MS	146
5.3 Dereplication	149
5.4 Imaging MS	152
5.5 MS and Quality Control of Herbal Medicines	154
Acknowledgements	155
References	155
Chapter 6 Applications of Mass Spectrometry in Synthetic Biology	159
<i>Zaira Bruna Hoffmam, Viviane Cristina Heinzen da Silva, Marina C. M. Martins and Camila Caldana</i>	
6.1 Introduction	159
6.2 MS as Emerging Tool for Synthetic Biology	161
6.2.1 Prospecting for Target Molecules	161
6.2.2 Pathway Design and Optimization	163
6.3 MS Contribution to the Classic Example of the Semi-synthesis of the Anti-malarial Drug Artemisinin	168
6.4 Conclusion	170
Acknowledgements	171
References	171

Chapter 7 Studying Enzyme Mechanisms Using Mass Spectrometry, Part 1: Introduction	173
<i>Cristina Lento, Peter Liuni and Derek J. Wilson</i>	
7.1 Introduction	173
7.2 Methods for Studying Enzyme Mechanisms	177
7.2.1 X-Ray Crystallography	177
7.2.2 Site-directed Mutagenesis	178
7.2.3 Optical Methods	178
7.2.4 Isothermal Titration Calorimetry (ITC)	179
7.2.5 Two-dimensional Nuclear Magnetic Resonance (2D NMR) Spectroscopy	180
7.2.6 Mass Spectrometry (MS)	181
7.3 Conclusion and Future Directions	188
References	189
Chapter 8 Studying Enzyme Mechanisms Using Mass Spectrometry, Part 2: Applications	197
<i>Peter Liuni, Cristina Lento and Derek J. Wilson</i>	
8.1 Introduction	197
8.2 Enzyme Mechanisms	198
8.2.1 Complex, Multistep Enzymatic Mechanisms	198
8.2.2 Time-resolved Electrospray Ionization (TRESI) for the Detection of Enzymatic Intermediates	198
8.2.3 Combination With Isotopic Labeling	201
8.2.4 Pre-steady-state Kinetic Isotope Effects (KIEs) Using TRESI-MS	202
8.3 Steady-state Kinetics	204
8.3.1 Steady-state Kinetics for Drug Development Assays	204
8.3.2 Quantitative Assays on Challenging Analytes	205
8.4 Pre-steady-state Kinetics	208
8.5 Binding Constants	208
8.6 Allosteric Regulation	211
8.7 Catalysis-linked Dynamics	212
8.8 Conclusions and Future Directions (MS: Is It One-size Fits All for Studying Enzyme Mechanisms?)	212
References	216

Chapter 9 Chemical Biology Databases 221

*Alan C. Pilon, Ana Paez-Garcia, Daniel Petinatti
Pavarini and Marcus Tullius Scotti*

9.1 Introduction	221
9.2 General Biological Databases	224
9.3 Databases in Proteomics	226
9.3.1 Integrating the Omics Cascade from Transcripts to Proteins: A Successful Case in Plant Science	229
9.4 Databases in Metabolomics	231
9.4.1 Spectral Reference Databases	233
9.4.2 Compound-centric Databases (Metabolic Class-, Species- and Tissue-specific)	241
9.4.3 Databases of Metabolic Pathways	243
9.4.4 Metabolomics Laboratory Information Management System (LIMS) Databases	245
9.5 Databases for Drug Discovery and Natural Products	247
9.5.1 Databases for Drug Discovery	248
9.5.2 Natural Product Databases	250
9.6 Conclusions	254
References	254

Chapter 10 Perspectives for the Future 264

*Anelize bauermeister, Larissa A. Rolim, Ricardo Silva,
Paul J. Gates and Norberto Peporine Lopes*

10.1 Introduction	264
10.2 MS Imaging (MSI)	266
10.3 Ion Mobility	267
10.4 Microfluidics	268
10.5 Single-cell Metabolomics	272
10.6 Mass Spectrometry in Surgery	277
10.7 Synthetic Ecology	280
10.8 Final Considerations	281
Acknowledgements	281
References	282
Subject Index	288
