<i>Foreword</i>	ix
<i>Acknowledgments</i>	xi
<i>About the Editors</i>	xiii
<i>List of Contributors</i>	xvii
Opening and General Aspects	1
1. Symbiosis Involving Photosynthetic Organisms <i>John A. Raven</i>	3
2. Origin and Spread of Plastids by Endosymbiosis <i>Ugo Cenci, Daniel Moog and John M. Archibald</i>	43
Section 1: Aerion-Terrestrial Symbioses	83
3. Symbioses of Lichen-Forming Fungi with Trentepohlialean Algae <i>Martin Grube, Lucia Muggia, Elisabeth Baloch, Christina Hametner and Elfriede Stocker-Wörgötter</i>	85

4.	The Lichen Photobiont <i>Trebouxia</i> : Towards and Appreciation of Species Diversity and Molecular Studies	111
	<i>Lucia Muggia, Fabio Candotto-Carniel and Martin Grube</i>	
5.	Symbiotic Cyanobacteria in Lichens	147
	<i>Jouko Rikkinen</i>	
6.	Symbioses of the Green Algal Genera <i>Coccomyxa</i> and <i>Elliptochloris</i> (Trebouxiophyceae, Chlorophyta)	169
	<i>Lydia Gustavs, Ulf Schiefelbein, Tatyana Darienko, and Thomas Pröschold</i>	
7.	Investigating Mechanisms of Algal Entry into Salamander Cells	209
	<i>Ryan Kerney, John Burns and Eunsoo Kim</i>	
8.	Trade-Offs of Symbiotic Relationships between Aquatic Hosts and Algae in a Changing World	241
	<i>Daniel P. Small and Cory D. Bishop</i>	
	Section 2: Freshwater Symbioses	277
9.	Cyanobacterial Endosymbionts of <i>Paulinella chromatophora</i> Shed New Light on the Birth of Cellular Organelles	279
	<i>Andrzej Bodył, Jakub Cieřla, Paweł Mackiewicz and Przemysław Gagat</i>	
10.	The <i>Azolla</i> – <i>Anabaena</i> –Bacteria Association: A Case of Symbiotic Abduction?	329
	<i>Francisco Carrapiço</i>	
11.	Symbiosis between Green Algae and Hydra	347
	<i>Yoshitaka Kobayakawa</i>	
12.	Diatoms: By, with and as Endosymbionts	371
	<i>Patrick J. Kociolek and Sarah E. Hamsher</i>	
13.	Symbiosis between Testate Amoebae and Photosynthetic Organisms	399
	<i>Enrique Lara and Fatma Gomaa</i>	

Section 3: Marine Symbioses	421
14. The Zooxanthellae–Hard-Coral Symbiosis	423
<i>Noga Stambler</i>	
15. Embracing Complexity in Coral–Algal Symbioses	467
<i>Danielle C. Claar, Nicholas S. Fabina,</i>	
<i>Hollie M. Putnam, Ross Cuning, Emilia Sogin,</i>	
<i>Julia K. Baum and Ruth D. Gates</i>	
16. Microbial Diversity and Symbiotic Interactions with Macroalgae	493
<i>Suhelen Egan, Vipra Kumar, Jadranka Nappi</i>	
<i>and Melissa Gardiner</i>	
17. <i>Ascomycellum</i> and its Symbionts — A Complex Symbiotic Community on North Atlantic Shores	547
<i>David J. Garbary, Norah E. Brown,</i>	
<i>Hillary J. MacDonell and Jantina Toxopeus</i>	
Section 4: Stress Tolerance and Secondary Metabolism	573
18. The Resistance of Lichen Photobionts to Extreme Abiotic Stressors on Earth, in Space and in Simulations	575
<i>Andreas Sadowsky and Joachim Meeßen</i>	
19. Secondary Metabolites Produced by Cyanobacteria in Symbiotic Associations	611
<i>Pavel Hrouzek</i>	
Final Remarks	627
20. Overview to Algal Symbioses	629
<i>Joseph Seckbach</i>	
<i>Index</i>	637
