<i>Preface</i>	v
<i>About the Author</i>	vii
Chapter 1 DNA, Genes, Genomes and Plant Breeding	1
1.1. A Brief History of Genetics	1
1.2. Deoxyribonucleic Acid (DNA)	3
1.3. Genes	7
1.4. Gene Expression	7
1.5. Genomes	9
1.6. Genetic Change	11
1.7. Plant Breeding	11
1.8. Modern Plant Breeding	15
1.8.1. Wide and forced crossing and embryo rescue	18
1.8.2. Radiation and chemical mutagenesis	19
1.9. The Advent of Genetic Modification and Genome Editing	20
Chapter 2 The Techniques of Plant Genetic Modification and Genome Editing	23
2.1. A Brief History of the Development of Recombinant DNA Technology	24

2.2.	<i>Agrobacterium Tumefaciens</i>	26
2.3.	Use of <i>A. Tumefaciens</i> in Plant Genetic Modification	28
2.4.	Transformation of Protoplasts	31
2.5.	Particle Bombardment	32
2.6.	Other Direct Gene Transfer Methods	34
2.7.	<i>Agrobacterium</i> -mediated Transformation Without Tissue Culture	34
2.8.	Selectable Marker Genes	35
2.9.	Visual/Scoreable Marker Genes	39
2.10.	Design and Construction of Genes for Introduction into Plants	42
2.11.	Promoter Types	43
2.11.1.	The use of GM to characterise gene promoters	46
2.12.	Gene Over-expression and Silencing	48
2.13.	Genome Editing	50
2.13.1.	Oligonucleotide-directed mutagenesis (ODM)	51
2.13.2.	Sequence-specific nucleases: Meganucleases, zinc finger nucleases, TALENS and CRISPR-Cas9	53
Chapter 3	The Use of Genetically Modified (GM) and Genome-edited Crops in Agriculture	57
3.1.	Why Use Genetic Modification (GM) or Genome Editing in Plant Breeding?	57
3.2.	Global Adoption Rates of GM Crops	59
3.3.	First- and Second-generation GM Varieties	60
3.4.	Slow-ripening Fruit	62
3.5.	Herbicide Tolerance	65
3.5.1.	Glyphosate tolerance	66
3.5.2.	Gluphosinate tolerance	70
3.5.3.	Bromoxynil tolerance	70

3.5.4. Combined glyphosate and dicamba tolerance	71
3.5.5. Herbicide tolerance through genome editing	72
3.6. Insect Resistance	73
3.6.1. Bt cotton	74
3.6.2. Bt maize	76
3.6.3. Bt potato	79
3.7. Virus Resistance	80
3.8. Modified Oil Content	82
3.8.1. High lauric acid oilseed rape	90
3.8.2. High oleic acid soybean	91
3.8.3. Long-chain polyunsaturated fatty acids (LC-PUFAs)	92
3.8.3.1. Engineering components of fish oils into crop plants	93
3.9. Modified Starch for Industrial Uses: The Amflora Potato	95
3.9.1. Modified starch through genome editing	97
3.10. GM Crops for Biofuel	98
3.10.1. High lysine maize	101
3.11. Vitamin Content: Golden Rice and Other Crops with Elevated Levels of β -Carotene	102
3.12. Fungal and Oomycete Resistance	106
3.13. Food Safety: Reducing the Potential for Acrylamide Formation During Cooking and Processing	109
3.13.1. Targeting vacuolar invertase by genome editing	112
3.14. Non-browning Apples and Mushrooms	113
3.15. Drought, Heat and Cold Tolerance; Climate Change	114
3.16. Salt Tolerance	119
3.17. Biopharming	122
3.18. Removal of Allergens	128
3.19. Conclusions	130

Chapter 4	Legislation Covering Genetically Modified (GM) Crops and Foods	131
4.1.	Safety of Genetically Modified (GM) Plants Grown in Containment	131
4.2.	Safety of Field Releases of GM Plants	135
4.3.	Safety of GM Foods	140
4.4.	European Union Regulations	142
4.4.1.	Devolution of decision-making to Member States	145
4.4.2.	Risk assessment of GM crops with deliberately altered composition	146
4.5.	Safety Assessment of GM Crops in the USA	148
4.6.	Regulating Genome Editing	150
4.7.	Labelling and Traceability Regulations	152
Chapter 5	Issues that Have Arisen in the GM Crop and Food Debate	157
5.1.	Are GM Foods Safe?	164
5.2.	Will Genetic Modification Produce New Food Allergens?	165
5.3.	Is it Ethical to Transfer Genes Between Different Species? Are Cisgenics More Acceptable than Transgenics?	167
5.4.	Animal Studies	169
5.5.	GM Crops 'Do Not Work'	170
5.6.	Did Tryptophan Produced by Genetic Modification Kill People?	171
5.7.	The Monarch Butterfly	172
5.8.	The Pusztai Affair	173
5.9.	Alarm Caused by Contradictory Results of Biosafety Studies	175
5.10.	'Superweeds'	178
5.11.	Insect Resistance to Bt Crops	179
5.12.	Segregation of GM and Non-GM Crops: Co-existence of GM and Organic Farming	181
5.13.	Antibiotic Resistance Marker Genes	182

5.14. Patenting	184
5.15. Loss of Genetic Diversity	186
5.16. The Dominance of Multinational Companies	186
5.17. The StarLink and ProdiGene Affairs	187
5.18. The <i>Cauliflower Mosaic Virus</i> 35S RNA Gene Promoter	189
5.19. Implications for Developing Countries	190
5.20. 'Terminator' Technology	192
5.21. Unintentional Releases	192
5.22. Asynchronous Approvals	194
5.23. The UK Farm-Scale Evaluations	194
5.24. Conclusions	196

<i>Index</i>	201
