

Contents

List of Contributors	vii
Preface	xi
Section I: Ecophysiology	1
1. Defining Halophytes: a Conceptual and Historical Approach in an Ecological Frame	3
<i>Marius-Nicușor Grigore</i>	
2. Habitats of Halophytes	19
<i>Adam Kapler</i>	
3. Intra-habitat Variability of Halophytic Flora of North-west India	38
<i>Sarita Devi, Ashwani Kumar, Anita Mann, Sunder Singh Arya, Gurdev Chand, Neeraj Kumar, Anita Kumari, Pooja, Babita Rani and Arvind Kumar</i>	
4. Halophytic Vegetation in South-east Europe: Classification, Conservation and Ecogeographical Patterns	55
<i>Zora Dajč Stevanović, Svetlana Ačić, Danijela Stešević, Milica Luković and Urban Šilc</i>	
5. South African Salt Marshes: Ecophysiology and Ecology in the Context of Climate Change	69
<i>Pascal Tabi Tabot and Janine Barbara Adams</i>	
6. Seagrasses, the Unique Adaptation of Angiosperms to the Marine Environment: Effect of High Carbon and Ocean Acidification on Energetics and Ion Homeostasis	89
<i>Lourdes Rubio and José A. Fernández</i>	
7. Ecophysiology of Seed Heteromorphism in Halophytes: an Overview	104
<i>Aysha Rasheed, Farah Nisar, Bilquees Gul, M. Ajmal Khan and Abdul Hameed</i>	
8. Salt Marsh Plants: Biological Overview and Vulnerability to Climate Change	115
<i>Brant W. Touchette, Mariana K. Kneppers and Chloe M. Eggert</i>	

Section II: Mechanisms of Adaptation	135
9. Ion Accumulation Pattern of Halophytes	137
<i>Doongar R. Chaudhary</i>	
10. Morpho-anatomical Traits of Halophytic Species	152
<i>Dragana Rančić, Ilinka Pečinar, Svetlana Aćić and Zora Dajić Stevanović</i>	
11. ROS Signalling, and Antioxidant Defence Network in Halophytes	179
<i>Ewa Surówka, Dariusz Latowski, Marta Libik-Konieczny and Zbigniew Miszalski</i>	
12. Antioxidant Defence in Halophytes under High Salinity	196
<i>Neeraj Kumar, Shubham Lamba, Ashwani Kumar, Pratima Kumar, Anita Mann, Sarita Devi, Pooja, Anita Kumari and Babita Rani</i>	
13. Soil Chemical Composition Modifies the Morpho-physiological Responses of <i>Prosopis strombulifera</i>, a Halophyte Native to South America	209
<i>Mariana Reginato, Analía Llanes and Virginia Luna</i>	
14. Elimination of Salt by Recretion: Salt Glands and Gland-supported Bladders in Recretohalophytes	223
<i>Ulrich Lüttge</i>	
15. Synergic Effects of Rhizobacteria: Increasing Use of Halophytes in a Changing World	240
<i>Jennifer Mesa-Marín, Enrique Mateos-Naranjo, Ignacio D. Rodríguez-Llorente, Eloisa Pajuelo and Susana Redondo-Gómez</i>	
16. Arsenic Tolerance Mechanisms in Halophytes: the Case of <i>Tamarix gallica</i>	255
<i>Dhouha Belhadj Sghaier, Silvia Pedro, Bernardo Duarte, Isabel Caçador and Noomene Sleimi</i>	
17. Thylakoid Electron Transfer in <i>Salicornia veneta</i> under Different Salinity Levels: a Fluorescence-based Study	266
<i>Romina Camata and Roberto Barbato</i>	
Section III: Practical Uses	273
18. Introgression of Halophytic Salt Stress-responsive Genes for Developing Stress Tolerance in Crop Plants	275
<i>Rajesh Kumar Jha, Jaykumar Patel, Avinash Mishra and Bhavanath Jha</i>	
19. Halophytes: Potential Resources of Coastal Ecosystems and their Economic, Ecological and Bioprospecting Significance	287
<i>Asish Kumar Parida, Asha Kumari, Jaykumar Rangani and Monika Patel</i>	
20. Practical Uses of Halophytic Plants as Sources of Food and Fodder	324
<i>Tiziana Centofanti and Gary Bañuelos</i>	
21. Use of Halophytes as Medicinal Plants: Phytochemical Diversity and Biological Activity	343
<i>Zora Dajić Stevanović, Milan S. Stanković, Jovana Stanković, Pedja Janačković and Miroslava Stanković</i>	
22. Lipids in Halophytes: Stress Physiology Relevance and Potential Future Applications	359
<i>Bernardo Duarte, Ana Rita Matos, João Carlos Marques and Isabel Caçador</i>	
Index	373
