Biosketch	xi
Preface	xiii
1 Foundations for Insect Conservation	1
1.1 A Myriad of Insects	1
1.2 Rise and Fall of Insects	3
1.3 Insects, Extinctions, and Food Webs	10
1.4 Philosophical Foundations for Insect Conservation	13
1.5 Challenges for Insect Conservation	15
1.6 Setting Insect Conservation Goals	17
1.7 Insect Conservation and Ecosystem Services	20
1.8 Contingency Planning in Insect Conservation	22
1.9 The Pervasive Effect of Global Climate Change	25
1.10 Global Versus Local Issues	27
1.11 Operational Scales for Insect Conservation	28
1.12 Ecological and Evolutionary Dimensions	29
1.13 Rescuing the Extinction of Experience	31
Key Points	32
2 Landscape-scale Insect Conservation in Three Dimensions	34
2.1 The Dynamic Landscape	34
2.2 Historic Versus Transformed States	34
2.3 Land Sparing and Sharing for Insect Conservation	37
2.4 Conceptual Framework for Landscape-scale Insect Conservation	37
2.5 Graded Intensity of the Land-sparing–Land-sharing Spectrum: Biosphere Reserves	39
2.6 Future Landscape Planning for Insect Conservation	39
2.7 The Important Third Dimension of Landscapes – Topography	42
2.8 Insect Conservation on Isolated Topographies – Oceanic and Land Islands	46
Key Points	54
3 Landscape Descriptors and Insect Conservation Dynamics	56
3.1 Landscape Descriptors	56
3.2 Quality of Descriptors and Changes with Time	57
3.3 Patch Size Distribution and Dynamics in Insect Conservation	58
3.4 Connectivity and Insect Conservation	63
3.5 Functions of Corridors	65
3.6 Eco-evolutionary Island Biogeography	69
3.7 Patch Perimeter-to-Area Ratio and Insect Conservation	72
3.8 Boundary Form and Insect Conservation	73
3.9 Patch Orientation and Insect Conservation	75
3.10 Landscape Element Contrast and Insect Conservation	76
3.11 Landscape Context and Insect Conservation	79
3.12 Interrelationship Between Landscape Descriptors and Insect Responses	83
Key Points	83

4	Species-level Operational Scale in Insect Conservation	85
4.1	The Operational Scale of the Species	85
4.2	Concepts and Challenges at the Species Level	88
4.3	Categories and Themes in Insect Species Conservation	95
4.4	Revenant Species	95
4.5	Threatened Species	96
4.6	Relict and Endemic Species	98
4.7	Important Ecological Associations Between Insects and Resources	103
4.8	Ecosystem Engineers and Functionally Important Species	106
4.9	Flagship Species	107
4.10	Phenomenon Species	109
4.11	The Operational Scale of Landscape Features for Insect Species Conservation	109
	Key Points	109
5	Approaches and Perspectives in Insect Species Conservation	113
5.1	Insect Species Level Conservation in Context	113
5.2	Global Bias in Insect Species Conservation	113
5.3	Feedback Loop Between Species and the Landscape	113
5.4	Prioritizing for Insect Species Conservation	114
5.5	Multi-species Insect Conservation	120
5.6	Defining Conservation Units at the Insect Species Level	121
5.7	'Knowing Our Insect'	125
5.8	Strategic Planning for Insect Species Conservation	132
5.9	Maintaining Genetic Viability	134
5.10	Demographic Rescue	137
5.11	Building in Resilience to Global Climate Change	140
5.12	Citizen Science and Insect Conservation	146
5.13	Edible Insect Species	147
	Key Points	149
6	Agroecology and Insect Conservation	152
6.1	The Enormous Production Footprint	152
6.2	Comparisons and Contrasts	152
6.3	The Land-sharing–Land-sparing Spectrum	159
6.4	Climate and Weather, and Resilience of Insect Populations	160
6.5	Linking Biodiversity Conservation to Ecosystem Function	162
6.6	Agri-environment Schemes	164
6.7	Organic Farming	166
6.8	Spatial Aspects of Agroecology for Pollination Services	169
6.9	Spatial Aspects of Agroecology for Various Insects	172
6.10	Integrated Pest Management	175
6.11	Opportunities and Risks of Biological Control	178
6.12	Genetically Modified Organisms	181
	Key Points	182
7	Insect Conservation in Forest, Grassland, and Cave Systems	185
7.1	Tropical Forest Insect Diversity	185
7.2	Threats to Tropical Forest Insects	188
7.3	Plantation Forestry in the Tropics	192
7.4	Forest Insect Diversity at Higher Latitudes	194
7.5	Plantation Forestry at Higher Latitudes	203

7.6	Fragmentation of Grassland Systems	204
7.7	Indigenous Mammal Grazing and Insect Conservation	208
7.8	Livestock Grazing and Insect Conservation	209
7.9	Insect Species, Traits, Management, and Diversity	212
7.10	Other Disturbance Factors and Grassland Insects	214
7.11	The Paradox Around Insect Conservation in Grassland	215
7.12	Fire and Insect Conservation	216
7.13	Cave Ecosystems	220
	Key Points	222
8	Conservation of Freshwater Insects	226
8.1	Freshwater Systems and Insects	226
8.2	General Threats to Aquatic Insects	233
8.3	General Approaches to Aquatic Insect Conservation	239
8.4	Insect Conservation in Running Water	241
8.5	Insect Conservation Along Riparian Zones	246
8.6	Floodplains and Alluvial Gravel Bars	248
8.7	Insect Conservation in Still Water	248
8.8	Artificial Water Bodies in Other Contexts	254
8.9	Boggy and Moist Areas	256
8.10	Epiphytes	257
8.11	Saline Systems	258
8.12	Creating Wetlands and Conservation Ponds	259
8.13	People, Awareness, and Aquatic Insects	259
	Key Points	262
9	Insect Conservation in Towns and Cities	265
9.1	The Process of Urbanization	265
9.2	Threats to Insects in Urban Environments	267
9.3	Natural/Rural–Urban Gradients	275
9.4	Insect Extinctions Over Time in Urban Environments	280
9.5	Opportunities for Insect Conservation in Urban Environments	281
9.6	The Psychological and Educational Benefits of Urban Insects	293
9.7	Insights for Developing Better Insect-friendly Cities	294
	Key Points	296
10	Restoration of Insect Habitats	298
10.1	Principles of Restoration Ecology	298
10.2	Persistent and Emerging Themes in Restoration Ecology	303
10.3	Related Approaches to Restoration Ecology	306
10.4	The Major Issue of Invasive Alien Organisms	307
10.5	Restoring Insect Services	309
10.6	Restoring Forest Insects	313
10.7	Restoring Grassland Insects	314
10.8	Restoring Freshwater Insects	321
10.9	Restoration and Climate Change	324
	Key Points	325
11	Ecological Assessment, Inventorying, and Mapping in Insect Conservation	329
11.1	Global Level Assessments	329
11.2	Principles of Regional and Local Assessment	337

11.3	Inventorying Insects	341
11.4	Mapping Insect Distributions	345
	Key Points	350
12	Surrogacy, Bioindication, and Monitoring in Insect Conservation	353
12.1	Surrogacy and Insect Conservation	353
12.2	Bioindication in Insect Conservation	370
12.3	Monitoring Insects	378
	Key Points	385
13	Future-proofing the World of Insects	388
13.1	Global Insect Population Decline and Loss	388
13.2	Valuing Nature and its Insects	389
13.3	The Process of Insect Conservation: from Philosophy to Practice	390
13.4	Actioning Insect Conservation	390
	Key Points	393
	Glossary	395
	References	421
	Index	533
