

CONTENTS

FROM THE AUTHOR v

BIOLOGY IN THE NEWS 1

CELLS

Cells 2

Variety of cells 3

Levels of organisation 4

How substances enter a cell 5

Osmosis 6

Osmosis in action 7

Osmosis and plant cells 8

The importance of volume and surface area 9

Surface area to volume ratio 10

BIOLOGICAL MOLECULES

Proteins 11

Carbohydrates 12

Lipids 13

Food tests 14

Enzymes 15

Commercial uses of enzymes 16

VARIATION AND INHERITANCE

Variation 17

Causes of genetic variation 18

DNA (deoxyribonucleic acid) 19

Cells and chromosomes 20

Dominant and recessive features 21

Genetic crosses (I) 22

Genetic crosses (II) 23

Cystic fibrosis and Huntington's disease 24

Sickle cell anaemia 25

Sex chromosomes 26

Sex-linked characteristics 27

Haemophilia 28

Codominance 29

APPLICATIONS OF GENETICS

Genetic engineering 30

Genetic fingerprinting 31

Industrial fermenter 32

Selective breeding 34

CELL DIVISION AND EVOLUTION

Cell division 35

Cell division and the human life cycle 36

Mitosis and meiosis 37

Growth 38

Asexual reproduction in plants (natural) 39

Asexual reproduction in plants (artificial) 40

Cloning by tissue culture 41

Plant hormones – auxins 42

Evolution 43

Evidence for evolution 44

Species 45

Fossils 46

Classification of living things 47

ECOLOGY

Food chains and food webs 48

Woodland habitat 49

Pond habitat 50

Animal adaptations 51

Estimating population size 52

Populations 53

Pyramids of numbers 54

Pyramids of biomass 55

Pyramids of energy 56

Energy losses and food production 57

Water cycle 58

Carbon cycle 59

Nitrogen cycle 60

HUMAN EFFECTS ON THE ENVIRONMENT

Importance of tropical rain forests 61

The greenhouse effect 62

Air pollution 63

Pollution in a river 64

Eutrophication 65

Fish farming 66

Farmed salmon 67

Pesticides 68

MICROBES

Useful and harmful microbes 69

Decomposers 70

Treatment of sewage 71

Food preservation 72

How diseases spread 73

Defences of the body to pathogens 74

Antibodies and immunity 75

THE HUMAN BODY 76

NUTRITION AND CIRCULATION

- Human teeth 77
- Tooth decay 78
- The human digestive system (I) 79
- The human digestive system (II) 80
- Duodenum 81
- Absorption 82
- Structure of blood 83
- Blood cells 84
- Movement of blood around the body 85
- Heart (I) 86
- Heart (II) 87
- Blood vessels 88
- Capillaries 89

GAS EXCHANGE AND RESPIRATION

- The human thorax 90
- Gas exchange in the alveoli 91
- Breathing (I) 92
- Breathing (II) 93
- Respiration 94
- Drugs 95

HOMEOSTASIS

- The endocrine system 96
- Adrenal glands 97
- Control of blood sugar level 98
- Homeostasis and the liver 99
- The skin 100
- Temperature regulation 101
- Homeostasis 102
- Excretion in humans 103
- The kidneys 104
- A nephron 105
- Control of water in the blood 106
- Hormonal control of water level 107

REPRODUCTION

- Human reproductive systems 108
- The menstrual cycle 109
- Hormonal control of the menstrual cycle 110
- The placenta 111

COORDINATION

- The nervous system 112
- The spinal cord 113
- The eye 114
- Vision – how we see 115
- Skeleton and movement 116

PLANTS

- Leaves and photosynthesis 117
- Transport in plants 118
- Uses of sugar made in photosynthesis 119
- Limiting factors in photosynthesis 120
- Minerals and plants 121
- Water movement through a plant 122
- Transpiration 123
- Opening and closing of stomata 124
- Leaves 125
- Life cycle of a Plum Tree 126
- Flowers and reproduction 127
- Methods of pollination 128
- Germination 129

WORDS TO REMEMBER 130

INDEX 135
