

Contents

Preface

vii

1. Introduction

1.1

1.1 History of Microbiology

1.2

1.2 Some Important Contributors in Microbiology

1.7

1.3 Scope of Microbiology

1.10

PART I: TOOLS AND TECHNIQUES IN MICROBIOLOGY

2. Microscopy

2.1

2.1 Principles of Microscope

2.1

2.2 Types of Microscopes

2.3

2.3 New Techniques in Microscope

2.13

Summary

2.15

Exercise

2.16

3. Staining and Staining Techniques

3.1

3.1 Acid Dyes

3.1

3.2 Basic Dyes

3.2

3.3 Neutral Dyes

3.2

3.4 Mechanism of Staining

3.2

3.5 Preparation for Staining

3.3

3.6 Staining Procedures

3.3

3.7 Special Structural Staining Techniques

3.6

Summary

3.8

Exercise

3.8

PART II: MICROBIAL WORLD

4. Classification of Microorganisms

4.1

4.1 History of Classification

4.1

4.2 Levels of Classification (Taxonomic Hierarchy)

4.2

4.3	Classification of Microorganisms	4.2
4.4	The Five Kingdom Classification	4.3
4.5	The Three Domain System	4.5
4.6	Classification of Prokaryotes	4.8
4.7	Methods of Classifying Microorganisms	4.10
	<i>Summary</i>	4.12
	<i>Exercise</i>	4.13
5.	Bacteria	5.1
5.1	Occurrence	5.1
5.2	Size, Shape and Arrangement	5.1
5.3	Structure of a Bacterial Cell	5.3
5.4	Endospores	5.12
5.5	Mycoplasmas	5.13
	<i>Summary</i>	5.14
	<i>Exercise</i>	5.15
6.	Virus	6.1
6.1	Structure of Viruses	6.1
6.2	Shape and Size	6.3
6.3	Classification of Viruses	6.4
6.4	Some Important DNA Viruses	6.5
6.5	Some Important RNA Viruses	6.6
6.6	Viral Multiplication	6.7
6.7	Prions	6.14
6.8	Viroids	6.14
6.9	Virusoids	6.15
	<i>Summary</i>	6.15
	<i>Exercise</i>	6.17
7.	Fungi	7.1
7.1	Occurrence	7.2
7.2	Nutrition	7.2
7.3	Structure	7.2
7.4	Classification	7.4
7.5	Reproduction in Fungi	7.5
7.6	Importance of Fungi	7.9
7.7	Some Important Fungi	7.10

7.8	Lichens	7.13
	<i>Summary</i>	7.15
	<i>Exercise</i>	7.16
8.	Algae	8.1
8.1	Occurrence	8.1
8.2	Morphology	8.2
8.3	Nutrition	8.3
8.4	Reproduction	8.3
8.5	Classification of Algae	8.5
8.6	Economic Importance of Algae	8.9
	<i>Summary</i>	8.11
	<i>Exercise</i>	8.12
9.	Protozoa	9.1
9.1	Occurrence	9.2
9.2	Size and Shape	9.2
9.3	Morphology	9.3
9.4	Encystment	9.3
9.5	Locomotion	9.4
9.6	Nutrition	9.4
9.7	Reproduction	9.5
9.8	Classification	9.7
9.9	Important Groups of Protozoa	9.7
	<i>Summary</i>	9.12
	<i>Exercise</i>	9.12
PART III: MICROBIAL GROWTH, METABOLISM AND GENETICS		
10.	Growth of Microorganisms	10.1
10.1	Bacterial Reproduction	10.1
10.2	The Rate of Bacterial Growth	10.2
10.3	Exponential Growth	10.2
10.4	Normal Growth Curve	10.4
10.5	Synchronous Culture	10.6
10.6	Continuous Culture	10.7
10.7	Factors Affecting Bacterial Growth	10.8

10.8	Measurement of Microbial Growth	10.12
	<i>Summary</i>	10.15
	<i>Exercise</i>	10.16
11.	Culture of Microorganisms	11.1
11.1	Culture of Microorganisms	11.2
11.2	Culture Media	11.3
11.3	Isolation of Pure Culture	11.5
11.4	Maintenance and Preservation of Pure Culture	11.7
	<i>Summary</i>	11.8
	<i>Exercise</i>	11.10
12.	Microbial Metabolism	12.1
12.1	Enzymes	12.2
12.2	Carbohydrate Metabolism	12.8
12.3	Electron Transport Chain	12.15
12.4	Fermentation	12.16
12.5	Glyoxylate Cycle	12.18
12.6	Metabolism of Fats and Proteins	12.19
12.7	Photosynthesis	12.20
12.8	Nutritional Types in Microorganisms	12.22
	<i>Summary</i>	12.23
	<i>Exercise</i>	12.24
PART IV: ENVIRONMENTAL AND APPLIED MICROBIOLOGY		
13.	Microbial Genetics	13.1
13.1	Flow of Genetic Information	13.1
13.2	DNA Structure	13.2
13.3	DNA Replication	13.3
13.4	Transcription	13.5
13.5	Regulation of Gene Expression	13.7
13.6	The Genetic Code	13.10
13.7	Translation	13.12
13.8	Mutations	13.16
13.9	DNA Repair	13.19
13.10	Genetic Transfer	13.20
	<i>Summary</i>	13.24
	<i>Exercise</i>	13.25

14. Microbiology of Soil	14.1
14.1 Structure of Soil	14.1
14.2 Microorganisms in Soil	14.3
14.3 Factors Affecting Soil Microorganisms	14.4
14.4 Interactions Among Soil Microorganisms	14.4
14.5 Rhizosphere	14.6
14.6 Biogeochemical Cycles	14.7
14.7 Bioremediation	14.13
Summary	14.14
Exercise	14.15
15. Microbiology of Water	15.1
15.1 Properties of Water Affecting Microbial Population	15.2
15.2 Microorganisms in Water	15.3
15.3 Water Pollution	15.6
15.4 Water Quality Tests	15.8
15.5 Water Purification	15.10
Summary	15.15
Exercise	15.15
16. Microbiology of Food	16.1
16.1 Microorganisms in Food	16.1
16.2 Factors Affecting Microbial Growth	16.5
16.3 Preservation of Food	16.7
16.4 Microbial Examination of Food	16.10
16.5 Microbial Food Spoilage	16.11
16.6 Food-Borne Diseases	16.12
16.7 Microbiological Production of Food	16.13
16.8 Single-Cell Protein	16.21
16.9 Probiotics and Prebiotics	16.22
Summary	16.23
Exercise	16.25
17. Industrial Microbiology	17.1
17.1 Selection of Industrial Microorganism	17.1
17.2 Development of Production Process	17.2
17.3 Fermentor	17.2
17.4 Commercial Production of Substances	17.3
17.5 Commercial Production of some Important Products	17.3

17.6	Immobilized Enzyme	17.11
17.7	Biodeterioration	17.12
17.8	Biomining	17.13
17.9	Oil Recovery	17.14
	<i>Summary</i>	17.15
	<i>Exercise</i>	17.16
PART V: MICROBIOLOGY AND HEALTH		
18.	Basic Concepts of Immunology	18.1
18.1	Immune Response	18.1
18.2	Innate Immunity	18.2
18.3	Adaptive Immune Response	18.9
18.4	Primary and Secondary Immune Response	18.10
18.5	Organs of Immune System	18.12
18.6	Cells of the Immune System	18.14
18.7	Antigen	18.19
18.8	Immunoglobulin	18.20
18.9	Types of Adaptive Immunity	18.28
	<i>Summary</i>	18.30
	<i>Exercise</i>	18.31
19.	Antigen–Antibody Reaction	19.1
19.1	Affinity and Avidity	19.1
19.2	Cross-Reactivity	19.2
19.3	Types of Ag–Ab Reactions	19.2
19.4	Complement–Fixation Test	19.8
19.5	Radioimmunoassay	19.9
19.6	Enzyme Linked Immunosorbent Assay (ELISA)	19.11
	<i>Summary</i>	19.12
	<i>Exercise</i>	19.13
20.	Vaccines	20.1
20.1	Characteristics of an Ideal Vaccine	20.4
20.2	Types of Vaccines	20.4
20.3	Development of New Vaccines	20.11
20.4	Challenges Before New Approaches to Vaccination	20.12
	<i>Summary</i>	20.13
	<i>Exercise</i>	20.13

21. Microorganisms and Diseases	21.1
21.1 Infectious and Noninfectious Diseases	21.1
21.2 Types of Infectious Diseases	21.2
21.3 Transmission of Diseases	21.3
21.4 The Progress of a Disease	21.3
21.5 Nosocomial Infections	21.5
21.6 Bacterial Diseases	21.6
21.7 Viral Diseases	21.25
21.8 Fungal Diseases	21.44
21.9 Protozoan Diseases	21.50
21.10 Helminthic Infections	21.56
<i>Summary</i>	21.59
<i>Exercise</i>	21.67

PART VI: CONTROL OF MICROORGANISMS

22. Control of Microorganisms	22.1
22.1 Microbial Death	22.2
22.2 Antimicrobial Agents	22.2
22.3 Effectiveness of an Antimicrobial Agent	22.3
22.4 Mode of Action of Antimicrobial Agents	22.4
<i>Summary</i>	22.5
<i>Exercise</i>	22.6
23. Physical Methods of Microbial Control	23.1
23.1 Temperature	23.1
23.2 Osmotic Pressure	23.6
23.3 Desiccation	23.6
23.4 High Pressure	23.6
23.5 Filtration	23.6
23.6 Radiations	23.8
<i>Summary</i>	23.10
<i>Exercise</i>	23.11
24. Chemical Methods of Microbial Control	24.1
24.1 Selection of a Chemical Agent	24.1
24.2 Classification of Chemical Antimicrobial Agents	24.2
24.3 Evaluation of Chemical Methods	24.7
<i>Summary</i>	24.9
<i>Exercise</i>	24.10

25. Antimicrobial Drugs	25.1
25.1 History of Chemotherapy	25.1
25.2 Classification of Antibiotics	25.2
25.3 Characteristics of an Ideal Antibiotic	25.4
25.4 Mechanism of Action of Antimicrobial Drugs	25.5
25.5 Antibacterial Agents	25.6
25.6 Antiprotozoan Agents	25.17
25.7 Antifungal Agents	25.19
25.8 Antiviral Agents	25.22
25.9 Anthelmintic Agents	25.24
25.10 Drug Resistance in Microorganisms	25.26
25.11 Determination of Drug Susceptibility of Microorganisms	25.28
Summary	25.30
Exercise	25.32
Glossary	G.1
Index	I.1
