

Contents

PART - I INTRODUCTION AND ESSENTIAL TECHNIQUES

1. Laboratory Organization	1.1
2. Equipments and Instruments	2.1
3. Sterilization	3.1
4. Tissue Culture Media	4.1
5. Squash Preparation of Callus Tissue	5.1
6. Histological Technique	6.1
7. <i>Ex Vitro</i> Rooting	7.1
8. Hardening and Acclimatization	8.1
9. Statistical Analysis	9.1
10. Photographic Methods for Plant Tissue Culture	10.1

PART - II PROPAGATION TECHNIQUES

11. Selection of Material and Explants	11.1
12. Seed Culture	12.1
13. Micropropagation	13.1
14. Apical Bud Culture	14.1
15. Meristem Culture	15.1
16. Axillary Bud Culture	16.1
17. Adventitious Bud Culture	17.1
18. Induction of Callus	18.1

19. Initiation and Establishment of Cell Suspension Cultures	19.1
20. Organogenesis from Callus	20.1
21. Somatic Embryogenesis	21.1
22. Production of Synthetic Seeds	22.1
23. Regeneration of Plants from Synthetic Seeds	23.1
24. Embryo Culture	24.1

PART - III CROP IMPROVEMENT TECHNIQUES

25. Somaclonal Variations	25.1
26. Isolation and Culture Protoplast	26.1
27. Anther and Pollen Culture	27.1
28. Ovary or Ovule Culture	28.1
29. Confirmation of Ploidy Level	29.1

PART - IV COMMERCIAL TISSUE CULTURE TECHNIQUE

30. Cost Reduction	30.1
--------------------	------
