

Contents

Chapter 1

Basic Plant Chemistry Concepts

	1
1.1 Introduction	1
1.2 Plants and their Elements	3
1.2.1 Elements and Atoms	9
1.2.2 Chemical Bonding to Form Molecules	13
1.3 Life-Giving Water	15
1.4 Nutrients from the Soil	23
1.5 Plants and Chemical Reactions	27
1.6 Photosynthesis, Key to Life	28
1.6.1 Light Reactions and Calvin Cycle	30
1.6.2 Special Mechanisms in Plants from Hot Climates	31
1.6.3 Chlorophyll <i>a</i> , Main Photosynthetic Pigment	33
1.7 Respiration to Provide Energy	36
1.8 Organic Molecules, an Introduction	39
1.9 Conclusion	45
Bibliography and Further Reading	45
References	46

Chapter 2

The Molecular Building Blocks

	48
2.1 Introduction	48
2.2 Carbohydrates for Energy and Structure	49
2.3 Structures that Keep Plants Upright	56

The Chemistry of Plants: Perfumes, Pigments, and Poisons

Margareta Séquin

© Margareta Séquin 2012

Published by the Royal Society of Chemistry, www.rsc.org

2.4	Fats and Oils for Energy and Protection	59
2.5	Proteins with Many Functions	65
2.5.1	Amino Acids, the Building Blocks of Proteins	65
2.5.2	Peptides and Proteins	68
2.6	Nucleic Acids and Genetic Information	70
2.7	Reaction Pathways that Link Plant Molecules	74
2.8	Conclusion	76
	References	77

Chapter 3

Perfumes, Fragrant or Foul 79

3.1	Introduction	79
3.2	Fragrant Terpenes	81
3.3	Sweet Vanilla and Other Aromatics	84
3.4	Pleasant-Smelling Esters	85
3.5	Malodorous Amines and Sulfurous Compounds	86
3.6	Analyzing Plant Odors	88
3.7	Conclusion	90
	References	91

Chapter 4

Colorful Plant Pigments 93

4.1	Introduction	93
4.2	The Chlorophylls	95
4.3	Yellow, Orange, and Red Carotenoids	97
4.4	White and Pale-Yellow Flavones	100
4.5	Purple, Pink, and Blue Anthocyanins	102
4.6	Purple Betalains	105
4.7	Brown Tannins	108
4.8	Conclusion	112
	References	112

Chapter 5

Poisons and Other Defenses 114

5.1	Introduction	114
5.2	Strong Scents in Leaves	116
5.3	Sticky Resins	119

5.4	Defensive Sulfurous Smells and Tastes	121
5.5	Sour Acids	123
5.6	Bitter Tastes	126
5.7	Milky Saps	128
5.8	Irritants	130
5.9	Growth-Repressing Allelopaths	132
5.10	Harmful Cyanides	133
5.11	Soapy Saponins	135
5.12	Defensive Cardiac Glycosides	137
5.13	Potent Alkaloids	140
5.14	Conclusion	142
	References	143

Chapter 6

Plants and People	145
6.1 Introduction	145
6.2 Foods from Plants	146
6.2.1 Essential Primary Metabolites	146
6.2.2 Vitamins	148
6.2.3 Flavors, Herbs, and Spices	152
6.3 Plant Medicines	155
6.3.1 History and Introduction	155
6.3.2 Classic Medicines from Plants	157
6.3.3 Newer Discoveries	161
6.4 Psychoactive Plants	163
6.5 Fibers and Dyes from Plants	168
6.5.1 Plant Fibers	168
6.5.2 Plant Dyes, an Introduction	171
6.5.3 Classic Plant Dyes	172
6.5.4 Plant Dyes and Contemporary Colorants	175
6.6 Perfumes for People	176
6.6.1 Introduction and History	176
6.6.2 Classic and Modern Perfume Ingredients	178
6.7 Genetically Modified Plants	181
6.7.1 Introduction	181
6.7.2 Producing Genetically Modified Plants	182
6.7.3 Impacts of Genetically Modified Plants	184
6.8 Conclusion	184
References	185

Epilogue	188
Glossary	189
How to Understand Plant Names	189
Glossary of Terms	189
Photo Credits	197
Subject Index	198
