

Contents

<i>Information about the Society for Experimental Biology</i>	vii
<i>List of Contributors</i>	xi
Chapter 1	1
An introduction to human <i>N</i> - and <i>O</i> -linked protein glycosylation <i>Susan A. Brooks</i>	
Chapter 2	25
Structural and functional aspects of glycosyltransferases <i>Anne Imberty, Magali Audry, Sara Fasmer Hansen and Christelle Breton</i>	
Chapter 3	45
Plant lectins and their role in intracellular signalling events <i>Dieter Schoupe and Els J. M. Van Damme</i>	
Chapter 4	73
Species differences in protein glycosylation and their implications for biotechnology <i>Susan A. Brooks</i>	
Chapter 5	93
Plant <i>N</i> -glycosylation: an engineered pathway for the production of therapeutical plant-derived glycoproteins <i>Muriel Bardor, Carole Burel, Arsénio Villajero, Jean Paul Cadoret, Aude Carlier and Patrice Lerouge</i>	
Chapter 6	119
Exploring the fungal wall glycoproteome <i>Piet W. J. De Groot, Stanley Brul and Frans M. Klis</i>	
Chapter 7	139
Interaction of surface glycans of <i>Mycobacterium tuberculosis</i> with DC-SIGN <i>Ben J. Appelmek, Nicole N. Driessen, Jeroen Geurtsen and Christina M. J. E. Vandenbroucke-Grauls</i>	

Chapter 8	163
Glycosylation in breast cancer metastasis	
<i>Hannah J. Lomax-Browne and Susan A. Brooks</i>	
Chapter 9	183
Introduction to tools for the analysis of protein glycosylation	
<i>Louise Royle and Daniel I. R. Spencer</i>	
Chapter 10	197
Glycan arrays	
<i>Tim Horlacher and Peter H. Seeberger</i>	
Chapter 11	213
Glycoproteins – bioinformatics and molecular modelling	
<i>Martin Frank</i>	
Chapter 12	237
Automated solid phase oligosaccharide synthesis	
<i>Bastien Castagner, Davide Esposito, Peter H. Seeberger</i>	
Index	271
