

CONTENTS

<i>Preface</i>		vii
Part I Basic Definitions and Principles		1
Chapter 1 Introduction		3
<i>Thierry VandenDriessche</i>		
Chapter 2 Basic Definitions and General Principles		7
<i>Daniel Scherman</i>		
Chapter 3 History of Gene Therapy		17
<i>Serge Braun</i>		
Chapter 4 Genetic Pharmacology Using Synthetic Deoxyribonucleotides		31
<i>Jean-Christophe François and Carine Giovannangeli</i>		
Chapter 5 Principles of RNAi Trigger Expression for Gene Therapy		53
<i>Lisa J. Scherer and John J. Rossi</i>		
Chapter 6 On Demand Alternative Splicing for Gene Rescue		73
<i>Stéphanie Lorain and Luis Garcia</i>		
Chapter 7 Nuclease-Mediated Targeted Genetic Correction		85
<i>Dieter C. Gruenert, Hamid Enamekhoo and R. Geoffrey Sargent</i>		
Part II Vectors and Gene Delivery Techniques		115
Chapter 8 γ -Retrovirus- and Lentivirus-Derived Vectors for Gene Transfer and Therapy		117
<i>Caroline Duros and Odile Cohen-Haguenaer</i>		
Chapter 9 Adenovirus Vectors		143
<i>Stefan Kochanek</i>		

Chapter 10	Adeno-Associated Virus (AAV) Vectors <i>Aur�lie Ploquin, Hildegard B�ning and Anna Salvetti</i>	151
Chapter 11	Herpes Simplex Virus (HSV-1)-Based Vectors: Applications for Gene Transfer, Gene Therapy, Cancer Virotherapy and Vaccination <i>Matias E. Melendez, Aldo Pourchet, Anna Greco and Alberto L. Epstein</i>	165
Chapter 12	Non-Viral DNA Vectors <i>Martin Schleef</i>	183
Chapter 13	Macromolecular Conjugates for Non-Viral Nucleic Acid Delivery <i>Mark Ericson, Kevin Rice and Guy Zuber</i>	207
Chapter 14	Auto-Associative Lipid-Based Systems for Non-Viral Nucleic Acid Delivery <i>Virginie Escriou, Nathalie Mignet and Andrew Miller</i>	221
Chapter 15	Hydrodynamic-Pressure-Based Non-Viral Nucleic Acid Delivery <i>Takeshi Suda, Kenya Kamimura, Guisheng Zhang and Dexi Liu</i>	255
Chapter 16	Electrotransfer/Electroporation for Non-Viral Nucleic Acid Delivery <i>Pascal Bigey, Richard Heller and Daniel Scherman</i>	265
Chapter 17	Imaging of Gene Delivery <i>Georges Vassaux, Peggy Richard-Fiardo, B�atrice Cambien and Philippe Franken</i>	287
Part III	Therapeutic Applications	305
Chapter 18	Oncolytic Adenoviruses for Cancer Gene Therapy <i>Gunnel Hallden, Yaohe Wang, Han-Hsi Wong and Nick R. Lemoine</i>	307
Chapter 19	Progress in DNA Vaccine Approaches for Cancer Immunotherapy <i>Geoffrey D. Hannigan and David B. Weiner</i>	331
Chapter 20	Gene Therapy of the Beta-Hemoglobinopathies <i>Emmanuel Payen, Charlotte Colomb, Olivier Negre, Marina Cavazzana-Calvo, Salima Hacein-Bey-Abina, Yves Beuzard and Philippe Leboulch</i>	361

Chapter 21	Gene Therapy for Hemophilia A and B <i>Nisha Nair, Marinee Chuah and Thierry VandenDriessche</i>	391
Chapter 22	Experimental and Clinical Ocular Gene Therapy <i>Alexis-Pierre Bemelmans and José-Alain Sahel</i>	403
Chapter 23	Gene Therapy of Neurological Diseases <i>Lisa M. Stanek, Lamya S. Shihabuddin and Seng H. Cheng</i>	421
Chapter 24	Genetic Therapy of Muscle Diseases: Duchenne Muscular Dystrophy <i>Takis Athanasopoulos, Susan Jarmin, Helen Foster, Keith Foster, Jagjeet Kang, Taeyoung Koo, Alberto Malerba, Linda Popplewell, Daniel Scherman and George Dickson</i>	453
Chapter 25	Induced Pluripotent Stem Cells and Gene Targeting for Regenerative Medicine <i>Jizhong Zou and Linzhao Cheng</i>	477
Part IV	Gene Vector Production	491
Chapter 26	Production and Purification of Viral Vectors and Safety Considerations Related to Their Use <i>Otto-Wilhelm Merten, Matthias Schweizer, Parminder Chahal and Amine Kamen</i>	493
Chapter 27	Production and Purification of Plasmid Vectors <i>Martin Schleef</i>	517
	<i>Index</i>	527
