
Contents

	Contributors	v
	Preface	ix
1	Chloroplast Lipids	1
	Yonghong Zhou, Katharina vom Dorp, Peter Dörmann and Georg Hölzl	
2	Assembly and Degradation of Pigment-binding Proteins	25
	Tania Tibiletti, Miguel A. Hernández-Prieto, Trudi A. Semeniuk and Christiane Funk	
3	Structural and Functional Dynamics of the Thylakoid Membrane System	59
	Sujith Puthiyaveetil, Helmut Kirchhoff and Ricarda Höhner	
4	Distinct Energetics and Regulatory Functions of the Two Major Cyclic Electron Flow Pathways in Chloroplasts	89
	Deserah D. Strand, Nicholas Fisher and David M. Kramer	
5	Modelling Electron and Proton Transport in Chloroplasts	101
	Alexander N. Tikhonov	
6	New Players for Photoprotection and Light Acclimation	135
	Denis Jallet, Michael Cantrell and Graham Peers	
7	Photoinhibition and the Damage Repair Cycle of Photosystem II	161
	Yasusi Yamamoto and Miho Yoshioka-Nishimura	
8	Plastoglobules: Lipid Droplets at the Thylakoid Membrane	171
	Thibaut Pralon and Felix Kessler	
9	Redox Regulation in Chloroplasts	187
	Monica Balsera, Peter Schürmann and Bob B. Buchanan	
10	The Transporters of Plastids – New Insights into an Old Field	209
	Karsten Fischer, Andreas P.M. Weber and Hans-Henning Kunz	
11	The GreenCut – Functions and Relationships of Proteins Conserved in Green Lineage Organisms	241
	Tyler M. Wittkopp, Shai Saroussi, Wenqiang Yang and Arthur R. Grossman	
	Index	279
