

TABLE OF CONTENTS

Glossary of Selected Terms	vii
Preface	xi

CHAPTER 1 THE CELL

Overview of Cell	1
Overview of Cell and Cell Theory	2
Properties of Cells	6
Cell Structure and Functions	10
The Molecular Composition of Cells	26
References	40

CHAPTER 2 PROKARYOTIC AND EUKARYOTIC CHROMOSOME STRUCTURE

Introduction	41
Overview of Chromosomes	42
Genome Complexity	66
DNA, RNA, and the Flow of Genetic Information	68
References	72

CHAPTER 3 CELLULAR ORGANELLES AND STRUCTURE

Introduction	73
Cellular Organelles and Structure	74
Organelles for Energy Production and Detoxification	87
References	97

CHAPTER 4 ORGANIZATION OF CHLOROPLAST

Introduction	99
Chloroplast Genome Organization	101
Organization of Mitochondria	116
Protein Targeting and Import	121
Chloroplasts and Other Plastids	128

Chloroplast Vector Systems for Biotechnology Applications	134
References	143

CHAPTER 5 CELLULAR COMMUNICATION

Introduction.....	145
Elements of Cell Signaling Systems	146
G Protein-Coupled Receptors	155
Cell Surface Proteins Mediate Cell-cell Interactions	164
Components of an Enzyme	170
Factors affecting Enzyme Activity	175
References	179

CHAPTER 6 CELL CYCLE AND REGULATION

Introduction.....	181
Cellular Activities and Checkpoints: Introduction	182
Stages of Interphase	186
Transcriptional and Posttranscriptional Controls	191
RNA Splicing.....	203
RNA Editing.....	209
Negative Translational Control Mechanisms.....	212
References.....	216

CHAPTER 7 MICROSCOPES AND MICROSCOPY

Introduction.....	219
Microscopic	220
Electron Microscopy (EM).....	247
Mass spectrometry	263
Affinity and High-Performance Liquid Chromatography (HPLC).....	271
References.....	273

CHAPTER 8 CYTOSKELETON MOLECULAR MOTORS: STRUCTURES

Introduction.....	275
Molecular Motors	283
Cell Motility	295
References.....	302

Index	305
