

TABLE OF CONTENTS

Preface

xv

Chapter 1 Introduction to Ecology

1

Introduction

2

Definitions of Ecology

3

Importance of Ecology

4

Examples of Ecology

5

History of Ecology

5

Why and How to Study of Ecology

6

Classification of Ecology

6

Levels of Ecology

15

Subdivisions of Ecology

16

Principles of Ecology

17

Need for Ecological Balance

19

Scientific Method

21

Observations and Questions

21

Hypothesis

22

Experiment

22

Interpret Results and Make Conclusions

22

The Effect of Scale

23

Components of Scale

23

Clarification of Scale Term

26

Why Is Scale Important?

28

Characteristic Scale

34

Scaling Techniques

35

Why Use Scaling Techniques?

36

General Rules and Reflections

40

Dealing with Scale

40

Evolutionary Ecology

43

How Variation Originates

44

How Variation Is Maintained

46

How Much Variation Exists in Nature

46

Reduction in Variation	48
Summary	54
Multiple Choice Questions	56
Review Questions	57
References	58

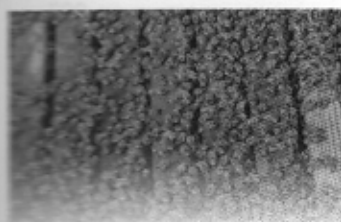

Chapter 2 Natural Selection and Speciation 59

Introduction	60
Phylogenetics	60
History of Phylogenetics	61
Phylogeny	61
The "Tree Of Life"	64
Estimating Relatedness	64
The Fossil Records	65
Fossil Record Examples	65
Definition of Fossils	67
Types of Fossils	68
How are Fossils Formed?	73
Frequency of Fossilization	74
Diversity	74
Collection	74
Debate and the Search for New Information	75
Extinction: Cause and Patterns	75
Examples of Extinction	76
Causes of Extinction	78
Patterns of Extinction	80
KT Extinction	81
Mass Extinction	83
Five Mass Extinction Events	84
6th Mass Extinction	86
Summary	91
Multiple Choice Questions	92
Review Questions	93
References	94

Chapter 3 Behavioral Ecology 97

Introduction	98
Group Selection	98
Social Behaviors	100
Altruism	106
Altruism and Conflict in Social Insects	106

Conflicts in Social Insects	108
The Monogamy Hypothesis	109
Living in Groups	110
A More Stable Body Temperature	110
Improved Locomotion Capabilities	111
Enhanced Reproductive Capacity	111
Protection against Predators	112
Efficient Food Search	114
Common Examples of Animals Who Live in Groups	114
What Animals Live in Groups?	116
Animal Communication	116
Modes of Communication	117
Autocommunication	127
Functions of Animal Communication	127
Interpretation of Animal Behavior	128
Interspecific Communication	129
Human/Animal Communication	131
Foraging Behavior and Optimality in Individuals	131
Factors Influencing Foraging Behavior	132
Types of Foraging	135
Sexual Selection	140
Mate Choice by Resources	142
Mate Choice by Genes	143
Sensory Bias	144
Mating Systems	145
Female Mate Choice	147
Consequences of Sexual Selection	147
Summary	152
Multiple Choice Questions	153
Review Questions	154
References	155

Chapter 4 Population Ecology Recombination 157

Introduction	158
Physiological Ecology	158
Adaptions to Cold	159
Adaptations to Heat and Dryness	160
Adaptations to Marine Environments	161
Adaptations to Low Oxygen Concentration	161
Abiotic Factors	161
Temperature and Light	162
Water	163

801	Atmosphere	163
907	Chemical Elements	164
110	Wind	164
110	Examples of Abiotic Factors	165
111	Abiotic Factors in the Savanna	168
111	Biotic and Abiotic Factors	169
111	Population Growth	172
111	Population Growth Basics and the American Bison	174
111	After the Boom: Limits to Growing Out of Control	176
111	What about Human Population Growth?	179
111	Mutualism Definition	182
111	Types of Mutualism	182
111	Examples of Mutualisms	185
111	Commensalism Definition	187
111	Types of Commensalism	188
111	Examples of Commensalism	188
111	Domesticated Animals and Commensalism	191
111	Competition	191
111	Examples of Competition	192
111	Outcomes of Competition	194
111	Historical Background and Scientific Foundations	195
111	Predation	196
111	Prey Defenses	197
111	Predator-Prey Models	198
111	Carnivory	200
111	Types of Predators	202
111	Morphology of a Predator	202
111	Predator Strategies	203
111	Trophic Levels	204
111	Hervivory and Parasitism	205
111	Herbivory	205
111	Modeling Herbivory	207
111	Evolution of Herbivory	207
111	Plant Defenses	208
111	Parasitism	209
111	Parasitism Definition	210
111	Types of Parasitism	210
111	Examples of Parasitism	212
111	Cause of Population Change	214
111	Factors Affecting the Population Change	215
111	Summary	219
111	Multiple Choice Questions	220

Review Questions	221
References	222

Chapter 5 Community Ecology 225

Introduction	226
Definition of Community Ecology	226
Types of Community	226
Characteristics of a Community	227
Species Diversity and Community Stability	233
Definition of Species Diversity	233
Species Diversity of Earth	234
Importance of Species Diversity	234
Community Stability	237
Stability Diversity Hypothesis	237
Biodiversity and the Stability of Communities	239
Disturbance	240
Problems Determining Stability	242
Island Biogeography	242
Community Change	246
Ecological Succession	247
Sequences of Succession	247
Types of Ecological Succession	248
Causes of Succession:	249
Role of Reactions	250
Examples of Ecological Succession	251
Ecosystem	252
Basic Structural Components of Ecosystems	253
Characteristics of Ecosystems	254
Basic Functional Components of Ecosystems	255
Types of Ecosystem	258
Importance of Ecosystem	261
Function of Ecosystem	263
Summary	268
Multiple Choice Questions	269
Review Questions	270
References	271

Chapter 6 Applied Ecology 273

Introduction	274
The Effects of Humans	275

	Effects of Agriculture Activities on Environment	276
	Effects of Housing Activities on Environment	282
	Effects of Mining Activities on Environment	284
	Effects of Transportation Activities on Environment	287
	Human Population Growth	290
	Age Structure, Population Growth, and Economic Development	292
	Long-Term Consequences of Exponential Human Population Growth	293
	Loss of Wildlife through Human Activity	294
	Wildlife Destruction	295
	How to Solve Ecological Problems	298
	Solutions to Pollution	299
	Solutions for Deforestation	300
	Solutions for Desertification	301
	Global Warming Prevention	302
	Patterns of Resource Use	302
	Water Catchment Areas	303
	Forestry	304
	Agricultural Land	310
	Waste and Pollution	316
	Types of Pollution	317
	History of Pollution	323
	Causes of Pollution	323
	Effects of Pollution	323
	Controlling Pollution	324
	Economic Poisons	325
	Eutrophication	325
	Factors Causing Eutrophication	326
	The Eutrophication Process	326
	Effects of Eutrophication	327
	Prevention and Control of Eutrophication	327
	Summary	328
	Multiple Choice Questions	330
	Review Questions	331
	References	332

Chapter 7 Introduction to Exotic Species, Epilogue 335

Introduction	336
Exotic Species	336
Environmental Impact	337

PREFACE

How Do They Get Here?	338
Extent of the Problem	338
Well Known Invaders	347
Invasive Species	350
Characteristics of Invasive Species	351
Impact	352
Economic Factors	353
Solutions	353
Similarities between Exotic and Invasive Species	353
Difference between Exotic and Invasive Species	353
Plants	354
Brazilian Pepper, <i>Schinus terebinthifolius</i>	354
Melaleuca, <i>Melaleuca Quinquenervia</i>	355
Australian Pine, <i>Casuarina equisetifolia</i>	356
Latherleaf, <i>Colubrina Asiatica</i>	357
Seaside Mahoe, <i>Thespesia populnea</i>	357
Old World Climbing Fern, <i>Lygodium Microphyllum</i>	358
Mammals	359
Goats (<i>Capra hircus</i>)	359
Red Deer (<i>Cervus elaphus</i>)	360
Feral Cats (<i>Felis Catus</i>)	360
Mongoose (<i>Herpestes javanicus</i>)	361
Crab-eating Macaque (<i>Macaca Fascicularis</i>)	361
Mice (<i>Mus musculus</i>)	361
Short-tailed Weasels (<i>Mustela erminea</i>)	362
Nutria (<i>Myocastor coypus</i>)	362
Rabbits (<i>Oryctolagus cuniculus</i>)	363
Black Rats (<i>Rattus rattus</i>)	364
Grey Squirrels (<i>Sciurus carolinensis</i>)	364
Wild Boar (<i>Sus scrofa</i>)	365
Brush-tail Possum (<i>Trichosurus vulpecula</i>)	365
Red Fox (<i>Vulpes vulpes</i>)	366
Summary	369
Multiple Choice Questions	370
Review Questions	371
References	372
Index	373
