

Contents

1	Introduction — 1
2	Membrane structure and composition — 4
2.1	Lipid phases — 4
2.2	Lipid constituents of membranes — 13
2.2.1	Phospholipids and sphingolipids — 13
2.2.2	Cholesterol — 17
2.2.3	Glycolipids — 18
2.2.4	Lipopolysaccharides — 21
2.3	Membrane domains and compartments — 21
2.3.1	Lipid rafts — 22
2.3.2	Caveolae — 25
2.3.3	Extracellular vesicles — 28
2.3.4	Lipoproteins — 31
2.4	Membrane-associated proteins — 33
2.4.1	Peripheral membrane proteins — 35
2.4.2	Integral membrane proteins — 38
2.4.2.1	Channel proteins — 43
2.4.3	Pore-forming proteins — 54
3	Membranes of intracellular organelles — 59
3.1	Mitochondrial membranes — 59
3.2	The nuclear membrane — 60
3.3	The endoplasmic reticulum (ER) membrane — 62
3.4	The Golgi membrane — 63
3.5	Lysosomes — 64
4	Membranes in different microorganisms — 66
4.1	Mammalian cells — 66
4.2	Bacterial cells — 67
4.3	Archaea — 69
4.4	Viral membranes — 70
5	Other physiological membranes — 72
6	Membrane analysis: biomimetic models and experimental techniques — 74
6.1	Membrane models — 74
6.1.1	Isolation and reconstitution of cellular membranes — 75

6.1.2	Lipid vesicles — 77
6.1.3	Other biomimetic membrane assemblies in aqueous solutions — 81
6.1.4	Planar membrane models — 83
6.1.5	Non-biological biomimetic membranes — 92
6.2	Experimental techniques in membrane studies — 96
6.2.1	Fluorescence spectroscopy — 97
6.2.2	Nuclear magnetic resonance (NMR) — 108
6.2.3	Electron paramagnetic resonance (EPR) — 120
6.2.4	Thermodynamics in biomimetic membranes — 122
6.2.5	Light and particle scattering — 124
6.2.6	Langmuir monolayer techniques — 129
6.2.7	Microscopy — 131
6.2.8	Surface interactions — 133
6.2.9	Electrical measurements — 135
7	Membrane processes — 141
7.1	Membrane trafficking — 141
7.1.1	Endocytosis — 141
7.1.2	Intracellular vesicle trafficking — 150
7.1.3	Exocytosis — 153
7.2	Neuronal membranes — 154
7.3	Interactions of peptides and proteins with membranes — 160
7.3.1	Antimicrobial peptides — 160
7.3.2	Cell-penetrating peptides — 171
7.3.3	Protein-membrane interactions — 178
7.4	Membranes and amyloid diseases — 188
7.4.1	Alzheimer's disease — 190
7.4.2	Parkinson's disease — 200
7.4.3	Prion diseases — 203
7.4.4	Membrane interactions of other amyloid proteins — 205
7.5	Membrane interactions of viruses and viral proteins — 208
7.6	Membrane interactions of nanoparticles — 221
7.7	Other membrane processes — 227
7.7.1	Membrane biogenesis — 227
7.7.2	Membranes in signaling and regulation — 228
7.7.3	Membrane oxidation damage — 233
7.7.4	Membrane remodeling and reorganization — 235
7.7.5	Membrane fusion — 241
8	Membranes and biomedicine — 245
8.1	Membrane transformations in disease — 245
8.2	Membrane targeting in therapeutics — 251

8.2.1	Drug-membrane interactions —	252
8.2.2	Liposome drug carriers —	261
8.2.3	DNA translocation across membranes —	269
9	Membrane-inspired technologies and applications —	278
10	Membrane research: past, present, and future —	290
