List of Contributors XV

Preface XXIII

1	The Sampling and Sample Preparation Problem in Microbial Metabolomics 1
	<i>Walter M. van Gulik, André B. Canelas, Reza M. Seifar, and Joseph J. Heijnen</i>
1.1	Introduction 1
1.2	Microorganisms and Their Properties 1
1.3	Sampling Methods 2
1.3.1	The Need for Rapid Sampling 2
1.3.2	Sampling Systems 3
1.4	Quenching 4
1.4.1	Quenching Procedures and Their Properties 4
1.4.2	Validation of the Quenching Procedure and Minimization of Metabolite Leakage 5
1.4.3	Quenching Procedure for Determination of Intracellular Metabolites in the Presence of Extracellular Abundance 6
1.4.4	Quenching of Bacteria 7
1.5	Metabolite Extraction 9
1.5.1	Extraction Methods and Their Properties 9
1.5.2	Validation of Extraction Methods for Yeast Metabolomics 9
1.6	Application of ^{13}C -Labeled Internal Standards 13
1.7	Conclusions 17
	References 18
2	Tandem Mass Spectrometry Hyphenated with HPLC and UHPLC for Targeted Metabolomics 21
	<i>Gérard Hopfgartner and Emmanuel Varesio</i>
2.1	Introduction 21
2.2	LC-MS-Based Targeted Metabolomics 22
2.3	Liquid Chromatography 22

2.4	Mass Spectrometry	27
2.4.1	Ionization Techniques	27
2.4.2	Mass Analyzers	28
2.5	Sample Preparation	30
2.6	Relative and Absolute Quantification	31
2.7	Applications	32
2.8	Synopsis	34
	References	35
3	Uncertainty of Measurement in Quantitative Metabolomics	39
	<i>Raffaele Guerrasio, Christina Haberhauer-Troyer, Stefan Neubauer, Kristaps Klavins, Madeleine Werneth, Gunda Koellensperger, and Stephen Hann</i>	
3.1	Introduction	39
3.1.1	MS-Based Techniques in Metabolomics	39
3.1.2	Uncertainty of Measurement in Quantitative Analysis	41
3.1.2.1	Definition	41
3.1.2.2	Uncertainty Calculation According to the Bottom-Up Approach	42
3.2	Uncertainties of Quantitative MS Experiments	48
3.2.1	Uncertainties in Sample Preparation	48
3.2.1.1	Sampling and Sample Preparation in Metabolite Profiling in Fermentations	49
3.2.1.2	Calculation of Sample Preparation Uncertainty for Intracellular Metabolite Quantitation in Yeast: A Practical Example	53
3.2.1.3	LC-MS	59
3.2.2	Uncertainty of Mass Spectrometric Assays (LC-MS and GC-MS Measurements)	61
3.2.2.1	GC-MS	61
3.2.2.2	Calculation of Uncertainty for LC-MS Measurements of Cell Extracts: A Practical Example	63
3.3	Concluding Remarks	66
	Abbreviations	66
	Acknowledgment	67
	References	67
4	Gas Chromatography and Comprehensive Two-Dimensional Gas Chromatography Hyphenated with Mass Spectrometry for Targeted and Nontargeted Metabolomics	69
	<i>Song Yang, Jamin C. Hoggard, Mary E. Lidstrom, and Robert E. Synovec</i>	
4.1	Introduction and Scope	69
4.2	Sample Preparation for GC-Based Metabolite Profiling	71
4.3	GC-MS and GC $\times$ GC-TOFMS Instrumentation for Metabolomics	74
4.4	Data Analysis Strategies and Software	82

4.5	Illustrative Examples and Concluding Remarks	88
	References	89
5	LC-MS-Based Nontargeted Metabolomics	93
	<i>Georgios A. Theodoridis, Helen G. Gika, and Ian D. Wilson</i>	
5.1	Introduction	93
5.2	LC-MS-Based Untargeted Metabolomics	94
5.2.1	LC Issues	94
5.2.2	Mass Spectrometry	97
5.3	Study Design	98
5.4	Sample Preparation	100
5.5	Analytical Strategies	103
5.6	Data Analysis	104
5.7	Metabolite Identification	107
5.8	Applications	109
5.9	Synopsis	112
	References	113
6	The Potential of Ultrahigh Resolution MS (FTICR-MS) in Metabolomics	117
	<i>Franco Moritz, Sara Forcisi, Mourad Harir, Basem Kanawati, Marianna Lucio, Dimitrios Tziotis, and Philippe Schmitt-Kopplin</i>	
6.1	Introduction	117
6.2	Metabolomics Technologies	118
6.3	Principles of FTICR-MS	121
6.3.1	Natural Ion Movement Inside an ICR Cell Subjected to Magnetic and Electric Fields	121
6.3.2	Applied Physical Techniques in FTICR-MS	123
6.3.3	Practical Advantages of FTICR-MS	124
6.4	Proceeding in Metabolomics	126
6.4.1	Network Analysis and NetCalc Composition Assignment	126
6.4.2	Statistics on FTICR-MS Datasets	127
6.5	Application Example in Metabolomics Using FTICR-MS Exhaled Breath Condensate	128
6.5.1	The Experiment	128
6.5.2	FT-ICR/MS Measurement	129
6.5.3	Data Preprocessing	129
6.5.4	C-H-N-O-S-P Formula Annotation	130
6.5.5	Statistical Analysis	130
6.5.5.1	Statistical Preprocessing	130
6.5.6	Synthesis of Biochemical Mass Difference Networking and Statistical Results	131
6.6	Conclusion and Remarks	134
	References	134

7	The Art and Practice of Lipidomics	137
	<i>Koen Sandra, Ruben t'Kindt, Lucie Jorge, and Pat Sandra</i>	
	Abbreviations	137
7.1	Introduction	139
7.2	Lipid Diversity	140
7.3	Tackling the Lipidome: State-of-the-Art	141
7.4	LC-MS-Based Lipidomics	146
7.4.1	Lipid Extraction	146
7.4.1.1	Biological Fluids and Cellular Material	146
7.4.1.2	Skin (Stratum Corneum)	148
7.4.1.3	Solid-Phase Extraction (SPE)	148
7.4.2	LC-MS(/MS)	151
7.4.2.1	Retention Time Characteristics	151
7.4.2.2	Ionization Characteristics	155
7.4.2.3	Identification of Lipids	156
7.4.3	Data Processing and Analysis	161
7.5	GC-MS-Based Lipidomics	165
7.5.1	Sample Preparation	165
7.5.2	GC-MS	166
7.5.3	Data Processing and Analysis	170
7.6	Conclusion	172
	References	173
8	The Role of CE-MS in Metabolomics	177
	<i>Rawi Ramautar, Govert W. Somsen, and Gerhardus J. de Jong</i>	
	Abbreviations	177
8.1	Introduction	177
8.2	CE-MS	179
8.2.1	CE Separation Conditions	179
8.2.2	CE-MS Coupling	180
8.2.2.1	Interfacing	180
8.2.2.2	Mass Analyzers	184
8.3	Sample Pretreatment	185
8.4	Data Analysis	187
8.5	Applications	190
8.5.1	Targeted Approaches	190
8.5.2	Nontargeted Approaches	202
8.6	Conclusions and Perspectives	203
	References	206
9	NMR-Based Metabolomics Analysis	209
	<i>Andrea Lubbe, Kashif Ali, Robert Verpoorte, and Young Hae Choi</i>	
9.1	Introduction	209
9.2	Platforms for Metabolomics	210
9.2.1	Mass Spectrometry (MS)	210

9.2.1.1	Gas Chromatography–Mass Spectrometry (GC-MS)	210
9.2.1.2	Liquid Chromatography–Mass Spectrometry (LC-MS)	211
9.2.1.3	Capillary Electrophoresis–Mass Spectrometry (CE-MS)	211
9.2.1.4	Fourier Transform-Ion Cyclotron Resonance-Mass Spectrometry (FT-ICR-MS)	212
9.2.2	Fourier Transform–Infrared Spectroscopy (FT-IR)	212
9.2.3	Nuclear Magnetic Resonance Spectroscopy: Principles and Techniques	212
9.2.3.1	One-Dimensional Nuclear Magnetic Resonance (^1H and ^{13}C NMR)	213
9.2.3.2	J-Resolved Spectroscopy (JRES)	215
9.2.3.3	Correlation Spectroscopy (COSY)	215
9.2.3.4	Total Correlation Spectroscopy (TOCSY)	217
9.2.3.5	Heteronuclear Two-Dimensional Methods	217
9.2.3.6	Combined Two-Dimensional Methods	217
9.3	NMR for Metabolomics	219
9.3.1	Sample Preparation	220
9.3.2	Metabolite Identification	221
9.3.3	Data Analysis: Turning Data into Information, Possibly Knowledge	223
9.3.3.1	Data Preprocessing	223
9.3.3.2	Principal Component Analysis (PCA)	225
9.3.3.3	Partial Least Squares (PLS) Projections to Latent Structures	226
9.3.3.4	Bidirectional Orthogonal-PLS (O2PLS)	227
9.3.3.5	Validation	227
9.4	Applications of NMR-Based Metabolomics	228
9.4.1	Understanding Stress Response	228
9.4.2	Application to Bioactivity Screening	230
9.4.3	Quality Control of Herbal Medicines	231
9.4.4	Chemotaxonomy	232
9.4.5	Agricultural Applications	233
9.5	Future Prospects and Conclusions	233
	References	234
10	Potential of Microfluidics and Single Cell Analysis in Metabolomics (Micrometabolomics)	239
	<i>Meghan M. Mensack, Ryan E. Holcomb, and Charles S. Henry</i>	
10.1	Introduction	239
10.2	Sample Processing for Metabolomics	240
10.2.1	Solid Phase Extraction	240
10.2.2	Laminar Diffusion	241
10.2.3	Fluidic Pumping for On-Chip Mixing	242
10.3	Microfluidic Separations for Metabolic Analysis	243

10.3.1	Microchip Capillary Electrophoresis	243
10.3.1.1	MCE Systems	243
10.3.1.2	Sample Injection	244
10.3.1.3	Electrophoretic Separations	244
10.3.2	Analyte Detection	245
10.3.2.1	Optical Detection	245
10.3.2.2	Electrochemical Detection	246
10.4	Microfluidics for Cellular Analysis	247
10.4.1	Requirements for Single Cell Metabolomics	247
10.4.2	Types of Microfluidic Instrumentation	248
10.4.3	Biological Questions	249
10.4.3.1	Monitoring Metabolic Response to Stimulation and Cell-to-Cell Signaling	249
10.4.3.2	Pharmacokinetics/Pharmacodynamics	252
10.4.3.3	Clinical Diagnostics	254
10.5	A Look Forward	254
	References	256
11	Data Processing in Metabolomics	261
	<i>Age K. Smilde, Margriet M.W.B. Hendriks, Johan A. Westerhuis, and Huub C.J. Hoefsloot</i>	
11.1	Introduction and Scope	261
11.2	Characteristics of Metabolomics Data	261
11.2.1	Correlation Structure of Metabolomics Data	261
11.2.2	Informative versus Noninformative Variation	262
11.2.3	Low Samples-to-Variables Ratio	263
11.2.4	Measurement Error	263
11.2.5	Dynamics	263
11.2.6	Nonlinear Relations	264
11.3	Types of Biological Questions Asked	264
11.3.1	Methods Should Follow the Questions	264
11.3.2	Biomarkers	264
11.3.3	Treatment Effects	264
11.3.4	Networks and Mechanistic Insight	265
11.4	Validation	265
11.4.1	Several Levels of Validation	265
11.4.2	Curse of Dimensionality	266
11.4.3	Cross-Validation and Permutations	267
11.5	Overview of Methods	272
11.5.1	Exploratory Analysis	272
11.5.2	ANOVA and Other Univariate Methods	273
11.5.3	Advanced Exploratory Analysis	275
11.5.4	Regression Methods	277
11.5.5	Discriminant Analysis	280
11.5.6	Multilevel Approaches	281

11.5.7	Network Inference	282
	References	283
12	Metabolic Flux Analysis	285
	<i>Christoph Wittmann and Jean-Charles Portais</i>	
12.1	Introduction	285
12.2	Prerequisites for Flux Studies	287
12.2.1	Network Topology and Cellular Composition	287
12.2.2	Network Formulation and Condensation	287
12.2.3	Metabolic and Isotopic Steady State	288
12.2.4	Definition of Isotope Labeling Patterns	289
12.3	Stoichiometric Flux Analysis	290
12.4	Labeling Studies Using Isotopes	292
12.4.1	Radiolabeled Isotopes	293
12.4.2	Stable Isotopes	295
12.5	State-of-Art ^{13}C Flux Analysis	296
12.5.1	Modeling of Carbon Transitions	298
12.5.2	Experimental Design	299
12.5.3	Flux Calculation and Statistical Evaluation of Flux Data	300
12.5.4	Labeling Analysis by Mass Spectrometry	301
12.5.5	Labeling Analysis by Nuclear Magnetic Resonance Spectroscopy	302
12.6	Application of Metabolic Flux Analysis	303
12.6.1	Improvement of Industrial Production Strains	303
12.6.2	Integration into Systems Biology Approaches	306
12.7	Recent Advances in the Field	307
12.7.1	High-Throughput Flux Screening	307
12.7.2	Flux Dynamics	307
12.8	Concluding Remarks	308
	Acknowledgments	308
	References	308
13	Metabolomics: Application in Plant Sciences	313
	<i>Gaëtan Glauser, Julien Boccard, Jean-Luc Wolfender, and Serge Rudaz</i>	
13.1	Introduction	313
13.2	Sample Preparation	314
13.2.1	Culture and Harvesting	314
13.2.2	Storage and Drying	315
13.2.3	Extraction	315
13.3	Analytical Methods	316
13.3.1	NMR-Based Methods	317
13.3.1.1	Direct NMR Fingerprinting	317
13.3.1.2	Applications	318
13.3.1.3	Hyphenation of NMR to Separating Techniques	323
13.3.1.4	Future Trends	323
13.3.2	MS-Based Methods	323

13.3.2.1	Direct MS Methods	324
13.3.2.2	Hyphenation of MS to Separating Techniques	324
13.3.2.3	Applications	326
13.3.3	Combined Approaches	329
13.4	Metabolite Identification	330
13.4.1	Interpreting Mass Spectra	330
13.4.2	Databases	332
13.5	Structural Elucidation of Novel Metabolites and Validation of Model	334
13.6	Conclusion and Perspectives	336
