

RNA Polymerase II Elongation Control in**Eukaryotes**

David H. Price

RNA Polymerase II Structure in Eukaryotes

Patrick Cramer

RNA Polymerase Reaction in Bacteria

Arkady A. Mustaev and Alexander D. Goldfarb

RNA Polymerase Structure, Bacterial

Michael Anikin, Dmitri Temiakov and William T. McAllister

Contents of Volume 4**Secondary Structure in Protein Analysis**

George D. Rose

Secretases

Robert L. Heinrikson

Secretory Pathway

Karen J. Colley

Selenoprotein Synthesis

August Böck

Septins and Cytokinesis

Makoto Kinoshita and Christine M. Field

Serine/Threonine Phosphatases

Thomas S. Ingber

Serotonin Receptor Signaling

Paul J. Gresch and Elaine Sanders-Bush

Siglecs

Ajit Varki

Sigma Factors

John D. Helmann

Sliding Clamps in DNA Replication: *E. coli* **β -Clamp and PCNA Structure**

Eric R. Goedken and John Kuriyan

Small GTPases

Adam Shutes and Channing J. Der

Somatostatin Receptors

Agnes Schonbrunn

Spastic Paraplegia

Elena Irene Rugarli and Andrea Ballabio

Spectrophotometric Assays

Britton Chance

Sphingolipid Biosynthesis

Martina Leipelt and Alfred H. Merrill

Sphingolipid Catabolism

Akira Abe and James A. Shayman

Spliceosome

Timothy W. Nilsen

Src Family of Protein Tyrosine Kinases

Jonathan A. Cooper

Starvation

Oliver E. Owen and Richard W. Hanson

Steroid/Thyroid Hormone Receptors

Ramesh Narayanan and Nancy L. Weigel

Store-Operated Membrane Channels: Calcium

Indu S. Ambudkar

Substrate Binding, Catalysis, and**Product Release**

W. Wallace Cleland

Sugar Nucleotide Transporters

Carlos B. Hirschberg

SUMO Modification

Frauke Melchior and Andrea Pichler

Superoxide Dismutase

Irwin Fridovich

Syk Family of Protein Tyrosine Kinases

Andrew C. Chan

T7 RNA Polymerase

Rui Sousa

Tachykinin/Substance P Receptors

Mark D. Richardson and Madan M. Kwatra

Taste Receptors

John D. Boughter and Steven D. Munger

T-Cell Antigen Receptor

Andrea L. Szymczak and Dario A. A. Vignali

Tec/Btk Family Tyrosine Kinases

Shuling Guo and Owen N. Witte

Telomeres: Maintenance and Replication

Alessandro Bianchi and David Shore

Thyroid-Stimulating Hormone/Luteinizing**Hormone/Follicle-Stimulating Hormone****Receptors**

Deborah L. Segaloff, Dario Mizrahi and Mario Ascoli

Tight Junctions

Shoichiro Tsukita

Toll-Like Receptors

Himanshu Kumar, Kiyoshi Takeda and Shizuo Akira

Transcription Termination

Thomas J. Santangelo and Jeffrey W. Roberts

Transcriptional Silencing

Ann Sutton and Rolf Sternglanz

Transcription-Coupled DNA Repair, Overview

Isabel Mellon

Transforming Growth Factor- β Receptor Superfamily

Mark de Caestecker

Translation Elongation in Bacteria

Oliver Vesper and Knud H. Nierhaus

Translation Elongation in Eukaryotes

William C. Merrick and Anton A. Komar

Translation Initiation in Bacteria: Factors and Mechanisms

Cynthia L. Pon and Claudio O. Gualerzi

Translation Initiation in Eukaryotes: Factors and Mechanisms

Tatyana V. Pestova and Christopher U.T. Hellen

Translation Termination and Ribosome Recycling

Nadja Koloteva-Levin and Mick F. Tuite

Translesion DNA Polymerases, Eukaryotic

Alexandra Vaisman and Roger Woodgate

Trehalose Metabolism

Alan D. Elbein

Tricarboxylic Acid Cycle

Richard L. Veech

tRNA Synthetases

Karla L. Ewalt and Paul Schimmel

trp Operon and Attenuation

Paul Gollnick

Tubulin and its Isoforms

Eva Nogales

Tumor Necrosis Factor Receptors

Karen G. Potter and Carl F. Ware

Two-Dimensional Gel Electrophoresis

Gerhard Schmid, Denis Hochstrasser and Jean-Charles Sanchez

Two-Hybrid Protein-Protein Interactions

Ilya Serebriiskii and Erica A. Golemis

Tyrosine Sulfation

Denis Corbeil and Wieland B. Huttner

Ubiquitin System

Aaron Ciechanover and Michael H. Glickman

Ubiquitin-Like Proteins

Edward T. H. Yeh

UmuC, D Lesion Bypass DNA Polymerase V

Zvi Livneh

Uncoupling Proteins

Daniel Ricquier and Frédéric Bouillaud

Unfolded Protein Responses

David Ron

Urea Cycle, Inborn Defects of

Marsha K. Fearing and Vivian E. Shih

Vacuoles

Christopher J. Stefan and Scott D. Emr

Vascular Endothelial Growth Factor Receptors

Kenneth A. Thomas

Vasopressin/Oxytocin Receptor Family

Michael J. Brownstein

V-ATPases

Michael Forgac

Vitamin A (Retinoids)

Joseph L. Napoli

Vitamin B₁₂ and B₁₂-Proteins

Bernhard Kräutler

Vitamin C

Robert B. Rucker and Francene Steinberg

Vitamin D

Hector F. DeLuca and Margaret Claggett-Dame

Vitamin D Receptor

Diane R. Dowd and Paul N. MacDonald

Vitamin E

Ute C. Obermuller-Jevic and Lester Packer

Vitamin K: Biochemistry, Metabolism, and Nutritional Aspects

J. W. Suttie

Vitamin K: Blood Coagulation and Use in Therapy

Matthew D. Stone and Gary L. Nelsestuen

Voltage-Dependent K⁺ Channels

Ramón Latorre and Francisco J. Morera

Voltage-Sensitive Ca²⁺ Channels

Harald Reuter

Voltage-Sensitive Na⁺ Channels

William J. Brammar

Von Hippel-Lindau (VHL) Protein

Ronald C. Conaway and Joan Weliky Conaway

XPV DNA Polymerase and Ultraviolet Damage Bypass

Alan R. Lehmann

X-Ray Determination of 3-D Structure in Proteins

Martha L. Ludwig

Yeast GAL1-GAL10 System

Dennis Lohr and Ralph Bash

Zinc Fingers

Mark Isalan
