Preface to the third edition

Preface to the second edition

Preface to the first edition

Section A Cells and macromolecules

- A1 Cellular classification
- A2 Subcellular organelles
- A3 Macromolecules
- A4 Large macromolecular assemblies

Section B Protein structure

- B1 Amino acids
- B2 Protein structure and function
- B3 Protein analysis

Section C Properties of nucleic acids

- C1 Nucleic acid structure
- C2 Chemical and physical properties of nucleic acids
- C3 Spectroscopic and thermal properties of nucleic acids
- C4 DNA supercoiling

Section D Prokaryotic and eukaryotic chromosome structure

- D1 Prokaryotic chromosome structure
- D2 Chromatin structure
- D3 Eukaryotic chromosome structure
- D4 Genome complexity
- D5 The flow of genetic information

Section E DNA replication

- E1 DNA replication: an overview
- E2 Bacterial DNA replication
- E3 The cell cycle
- E4 Eukaryotic DNA replication

Section F DNA damage, repair and recombination

- F1 Mutagenesis
- F2 DNA damage
- F3 DNA repair
- F4 Recombination

Section G Gene manipulation

- G1 DNA cloning: an overview
- G2 Preparation of plasmid DNA
- G3 Restriction enzymes and electrophoresis
- G4 Ligation, transformation and analysis of recombinants

Section H Cloning vectors

- H1 Design of plasmid vectors
- H2 Bacteriophage vectors
- H3 Cosmids, YACs and BACs
- H4 Eukaryotic vectors

Section I Gene libraries and screening

- I1 Genomic libraries
- I2 cDNA libraries
- I3 Screening procedures

Section J Analysis and use of cloned DNA

- J1 Characterization of clones
- J2 Nucleic acid sequencing
- J3 Polymerase chain reaction
- J4 Organization of cloned genes
- J5 Mutagenesis of cloned genes
- J6 Applications of cloning

Section K Transcription in prokaryotes

- K1 Basic principles of transcription
- K2 Eukaryotic RNA polymerases
- K3 The E. coli promoter
- K4 Transcription: initiation, elongation and termination

Section L Regulation of transcription in prokaryotes

- L1 The lac operon
- L2 The trp operon
- L3 Transcriptional regulation by alternative factors

Section M Transcription in eukaryotes

- M1 The three RNA polymerases: characteristics and functions
- M2 RNA Pol I genes: the ribosomal repeat
- M3 RNA Pol II genes: 5S and rRNA transcription
- M4 RNA Pol II genes: promoters and enhancers
- M5 General transcription factors and RNA Pol II initiation

Section N Regulation of transcription in eukaryotes

- N1 Eukaryotic transcription factors
- N2 Examples of transcriptional regulation
- N3 RNA processing and RNP

Section O RNA processing and ribosomes

- O1 RNA processing and other small RNAs
- O2 mRNA processing: hnRNPs and snRNPs
- O3 Alternative mRNA processing
- O4 The genetic code and tRNA

Section P The genetic code

- P1 The genetic code
- P2 tRNA structure and function
- P3 Protein synthesis

Section Q Aspects of protein synthesis

- Q1 Aspects of protein synthesis
- Q2 Mechanisms of protein synthesis

Section H	Cloning vectors	125
H1	Design of plasmid vectors	125
H2	Bacteriophage vectors	129
H3	Cosmids, YACs and BACs	134
H4	Eukaryotic vectors	139
Section I	Gene libraries and screening	145
I1	Genomic libraries	145
I2	cDNA libraries	148
I3	Screening procedures	153
Section J	Analysis and uses of cloned DNA	157
J1	Characterization of clones	157
J2	Nucleic acid sequencing	162
J3	Polymerase chain reaction	167
J4	Organization of cloned genes	172
J5	Mutagenesis of cloned genes	176
J6	Applications of cloning	180
Section K	Transcription in prokaryotes	185
K1	Basic principles of transcription	185
K2	<i>Escherichia coli</i> RNA polymerase	188
K3	The <i>E. coli</i> σ^{70} promoter	190
K4	Transcription, initiation, elongation and termination	193
Section L	Regulation of transcription in prokaryotes	199
L1	The <i>lac</i> operon	199
L2	The <i>trp</i> operon	203
L3	Transcriptional regulation by alternative σ factors	207
Section M	Transcription in eukaryotes	211
M1	The three RNA polymerases: characterization and function	211
M2	RNA Pol I genes: the ribosomal repeat	213
M3	RNA Pol III genes: 5S and tRNA transcription	217
M4	RNA Pol II genes: promoters and enhancers	221
M5	General transcription factors and RNA Pol II initiation	223
Section N	Regulation of transcription in eukaryotes	227
N1	Eukaryotic transcription factors	227
N2	Examples of transcriptional regulation	233
Section O	RNA processing and RNPs	239
O1	rRNA processing and ribosomes	239
O2	tRNA processing and other small RNAs	245
O3	mRNA processing, hnRNPs and snRNPs	249
O4	Alternative mRNA processing	255
Section P	The genetic code and tRNA	259
P1	The genetic code	259
P2	tRNA structure and function	263
Section Q	Protein synthesis	269
Q1	Aspects of protein synthesis	269
Q2	Mechanism of protein synthesis	273

Q3	Initiation in eukaryotes	279
Q4	Translational control and post-translational events	283
Section R	Bacteriophages and eukaryotic viruses^a	289
R1	Introduction to viruses	289
R2	Bacteriophages	293
R3	DNA viruses	298
R4	RNA viruses	302
Section S	Tumor viruses and oncogenes^b	307
S1	Oncogenes found in tumor viruses	307
S2	Categories of oncogenes	311
S3	Tumor suppressor genes	314
S4	Apoptosis	318
Section T	Functional genomics and new technologies	323
T1	Introduction to the 'omics	323
T2	Global gene expression analysis	327
T3	Proteomics	332
T4	Cell and molecular imaging	337
T5	Transgenics and stem cell technology	342
Section U	Bioinformatics	347
U1	Introduction to bioinformatics	347
Further reading		357
Index		362
