Foreword 1

Foreword 2

Preface

Chapter 1 Concept, Classification, and Research Method of Soil Fauna

Section 1	Concept and classification of soil fauna.....	2
Section 2	Research methods of soil fauna	6

Chapter 2 Effects of Desertification and the Stabilization of Sand Dunes on Soil Faunal Community Distribution

Section 1	Effects of desertification on macroinvertebrate diversity in grassland soils.....	14
Section 2	Effects of the stabilization of sand dunes on soil macrofaunal community distribution	23

Chapter 3 Effects of Restored Management on Soil Faunal Community Distribution

Section 1	Influences of exclusion management <i>versus</i> livestock grazing on soil macrofaunal diversity	35
Section 2	Effect of naturally <i>versus</i> manually restored management practices on ground-active arthropod communities.....	45

Chapter 4 Effect of Grassland Cultivation on Soil Faunal Community Distribution

Section 1	Effect of grassland cultivation <i>versus</i> grazing exclusion on soil macrofaunal community	60
Section 2	Changes of soil macrofaunal communities along a cultivated cropland chronosequences	73

Chapter 5 Effect of Land Use/Cover Changes on Soil Faunal Community Distribution

Section 1	Effect of selective afforestation on soil macrofaunal community in shifting sandy lands	87
-----------	---	----

Section 2	Soil arthropod communities associated with local land use/cover changes	98
Chapter 6	Shrub Cover Acted as a Stimulus of Soil Arthropod Community in Sandy Land	
Section 1	Facilitative effects of shrub canopy in shifting sand on soil macrofaunal community	114
Section 2	Effectiveness of afforested shrub plantation on ground-active arthropod community structure	125
Chapter 7	Temporal-spatial Distribution of Ground-active Arthropods in Relation to Shrub Cover	
Section 1	Ground-active arthropod diversity response to the proximity of shrub cover	141
Section 2	Seasonal diversity of ground-active arthropods in age-related shrub microhabitats	155
Chapter 8	"Arthropod Island" Formation and Its Relation to Grazing Management	
Section 1	"Arthropod Island" acted by shrub cover and its formation mechanism	186
Section 2	"Arthropod Island" contributed by shrub canopy associated with livestock grazing management	197
