

Contents

Preface

Chapter One Introduction	1
1.1 Evolutionary History and Adaptations of Colobine Monkey	1
1.1.1 Evolutionary history of colobine monkeys	1
1.1.2 Adaptations of colobine monkeys	3
1.2 Classification of Asian Colobines	5
1.2.1 Brief review	5
1.2.2 Classification of Asian langur species	6
1.2.3 Classification of the <i>francoisi</i> group	7
1.3 Distribution of Asian Colobines	8
1.3.1 Brief review	8
1.3.2 Distribution of <i>Trachypithecus</i> species	10
1.3.3 Distribution of the limestone langurs	11
1.3.4 Distribution of <i>T. francoisi</i>	11
1.4 Ecological Studies of <i>Trachypithecus</i> Species	12
1.4.1 Ecological studies of the <i>T. vetulus</i> group	12
1.4.2 Ecological studies of the <i>T. cristatus</i> group	13
1.4.3 Ecological studies of the <i>T. obscurus</i> group	13
1.4.4 Ecological studies of the <i>T. pileatus</i> group	14
1.4.5 Ecological studies of the <i>T. francoisi</i> group	15
1.5 Studies on Primate Behavioural Constraints	16
1.6 Conservation Issues	19
1.6.1 Brief review	19
1.6.2 Conservation of "limestone langurs"	20
1.7 Purpose of This book	21
Chapter Two Study Area and Methods	23
2.1 Location of MNR and Human Pressure	23
2.1.1 MNR in general	23
2.1.2 Main study area	24
2.2 Climate and Vegetation Characteristic at MNR	25
2.2.1 Climate Characteristic	25
2.2.2 Vegetation	26

2.3	The Study Langur Groups	26
2.4	Methods	28
2.4.1	Climate	28
2.4.2	Methods on vegetation and phenology	28
2.4.3	Methods on behavioral data	31
2.4.4	Ranging behavior	38
2.4.5	Data on local community	38
	Chapter Three Climatic, Phenological Patterns, and Conservation	39
3.1	Climate and Seasonality	39
3.1.1	Temperature	39
3.1.2	Rainfall	39
3.2	Plant Species Richness and Vegetation Composition	41
3.2.1	Species richness in the main study area	41
3.2.2	Comparison between LYY and XGB	43
3.3	Phenology of Food Species	45
3.3.1	Food species	45
3.3.2	Phenological pattern	46
3.4	Human Pressure in the Main Study Area	48
3.5	Discussion	49
3.5.1	Species richness and dominance	49
3.5.2	Seasonal variations of climate and phenological pattern	50
3.5.3	Human disturbance and its consequence for the langurs	53
3.6	Summary	55
	Chapter Four Feeding Ecology	56
4.1	Introduction	56
4.2	Method Review	61
4.2.1	Data recording in the field	61
4.2.2	Data analysis	61
4.3	Results	63
4.3.1	Food species	63
4.3.2	Food items	70
4.3.3	Habitat effects on diet	76
4.3.4	Crop raiding	83
4.3.5	Rock lapping	84
4.3.6	Water drinking	85
4.4	Discussion	86
4.5	Summary	93

Chapter Five Range Use and Territoriality	95
5.1 Introduction	95
5.2 Review of field processes	100
5.3 Results	102
5.3.1 DTD	102
5.3.2 Home range	105
5.3.3 Range overlap and territoriality	111
5.3.4 Group leadership	115
5.3.5 Choice of sleeping site	117
5.4 Discussion	122
5.4.1 Daily travel distance	122
5.4.2 Range size	124
5.4.3 Range overlap & territoriality	125
5.4.4 Group leading	126
5.4.5 Choice of sleeping site	126
5.5 Summary	128
Chapter Six Activity Pattern and Time Budget	130
6.1 Introduction	130
6.2 Methods	134
6.2.1 Techniques review	134
6.2.2 Field procedure	136
6.2.3 Data pool and analysis	136
6.3 Results	137
6.3.1 Daily activity pattern	137
6.3.2 General time budget pattern and seasonal change	139
6.3.3 Habitat effects on time budget	144
6.3.4 Sex-age class differences	147
6.4 Discussion	149
6.4.1 Daily activity pattern	149
6.4.2 General time budget pattern and seasonal change	150
6.4.3 Habitat effect on time budget	152
6.4.4 Sex-age class differences	153
6.5 Summary	154
Chapter Seven Group Structure and Social Behavior	156
7.1 Introduction	156
7.1.1 Social organization	156
7.1.2 Dispersal	158

7.1.3	Group size	159
7.1.4	Sexual behavior, birth season and birth interval	160
7.1.5	Group takeover and infanticide	162
7.1.6	Social behavior	164
7.2	Methods	165
7.3	Results	166
7.3.1	Dynamic of target groups	166
7.3.2	Social structure and individual dispersal	168
7.3.3	Sexual behavior and birth	168
7.3.4	Group takeover and infanticide	172
7.3.5	Social behaviors	175
7.4	Discussion	176
7.4.1	Social structure and individual dispersal	176
7.4.2	Sexual behavior, breeding season and birth interval	179
7.4.3	Group takeover and infanticide	180
7.4.4	Social behavior	182
7.5	Summary	182
Chapter Eight Infant Behavioral Development and Pelage Coloration Change		184
8.1	Introduction	184
8.1.1	Dependent to independent feeding	184
8.1.2	Dependent to independent locomotion	185
8.1.3	Mother-infant physical proximity to socialization & allomothering	186
8.1.4	Coloration of natal pelage	187
8.2	Methods	189
8.3	Results	190
8.3.1	Dependent to independent feeding	190
8.3.2	Dependent to independent locomotion	192
8.3.3	Mother-infant physical proximity to socialization & allomothering	194
8.3.4	Coloration of natal pelage	195
8.4	Discussion	201
8.4.1	Dependent to independent feeding	201
8.4.2	Dependent to independent locomotion	202
8.4.3	Mother-infant physical proximity to socialization & allomothering	202
8.4.4	Coloration of natal pelage	204
8.5	Summary	205
Chapter Nine Conclusions		207
9.1	Socioecology of François' Langur at MNR	207

9.1.1	Climatic and Phenology.....	207
9.1.2	Feeding ecology.....	207
9.1.3	Ranging behavior.....	208
9.1.4	Daytime activity time budget	209
9.1.5	Group structure and social behavior.....	210
9.2	Behavioral Flexibility in Response to Different Habitats	211
9.3	Infant Behavioral Development and Color Change of Natal Coat	213
9.3.1	Infant behavioral development.....	213
9.3.2	Color change of natal pelage.....	214
9.4	Threats to the Langurs at MNR and Conservation Recommendation	214
9.5	Final Conclusions	216
9.5.1	How does the food availability change throughout the year?	216
9.5.2	How does crop-raiding influence the langur?	216
9.5.3	Which area of MNR contains most langurs and what are the habitat characteristics of this area?....	216
9.5.4	How does the social organization and behavior respond to ecological variables?.....	216
9.5.5	How does habitat destruction influence the survival of François' langur?.....	217
References		218
Appendix I	List of woody plant species in the main study area at MNR	245
Appendix II	Transect sampling record in the main study area	251
Appendix III	Overall feeding records of food species at Mayanghe (Listed according to Hutchinson's System)	258
Appendix IV	Food species (as families) contribution to feeding record	266
Appendix V	Comparison of relative utilization intensity and annual feeding percentage of 74 common food species between LYY and XGB (Unit: %)	268
Appendix VI	Comparison of feeding record seasonality of 74 common food species between LYY and XGB*(Unit:%)	272
Appendix XII	Comparison of feeding item seasonality of 74 common food species between LYY and XGB.....	276
Plates		281
Plate 4-1	Seasonality of food species utilization and contribution at Mayanghe	286
Plate 4-2	Comparison of the top food 25 species in the form of feeding percentage, dominance index and selection index at MNR	287
Plate 4-3	Correlation test among feeding percentage, dominance index, and selection index of food species at Mayanghe	288
Plate 4-4	Annual diet of François' langur and its seasonal change at MNR	289
Plate 4-5	Oneway ANOVA test of seasonal 3% of food items at MNR (Based on daily feeding record)	293
