PART I DATABASES AND BIOINFORMATICS TOOLS

Chapter 1 Online Sequence Database	3
1.1 Nucleic Acid Sequence Database	3
1.2 Protein Database	14
1.3 Protein Three-Dimensional Structure Database PDB	20
1.4 Genome Browser	20
References	28
Chapter 2 Sequence Alignment	30
2.1 Pairwise Sequence Alignment	30
2.2 Multiple Sequence Alignment	37
2.3 Basic Local Alignment Search Tool	41
References	50
Chapter 3 Molecular Phylogeny and Evolution	52
3.1 Introduction to Molecular Evolution	52
3.2 Models of DNA and Amino Acid Substitution	55
3.3 Tree-Building Method	61
3.4 Evaluating Tree	73
3.5 Perspectives	74
References	74
Chapter 4 Predicting DNA and Protein Function from Sequence	79
4.1 DNA Sequence Analysis	80
4.2 Protein Sequence Analysis	88
References	92
