

Contents

➤ Chapter 1 DNA Isolation	1
Section 1 DNA in a Bottle	2
Section 2 Isolation and Purification of Genomic DNA from Cheek Cells	4
Section 3 DNA Isolation from Chicken Embryonic Allantoic Fluid	6
Section 4 Know More	10
➤ Chapter 2 DNA Analysis	12
Section 1 Do You Have Jumping Alu in Your Genome?	12
Section 2 Boy or Girl?	22
Section 3 Know More	24
➤ Chapter 3 RNA Extraction and RT-PCR	29
Section 1 RNA Extraction and Purification	29
Section 2 RT-PCR	32
Section 3 TA Cloning	34
➤ Chapter 4 Bacterial Transformation and Plasmid Purification	38
Section 1 Bacterial Transformation and Culture	38
Section 2 Colony PCR Screening for the Reconstructed Plasmids	42
Section 3 Purification of Plasmid DNA	43
Section 4 Know More	47
➤ Chapter 5 Protein Extraction	50
Section 1 Preparation of Protein	54

Section 2	Know More	55
Chapter 6	Protein Analysis	60
Section 1	SDS-PAGE and Western Blotting	66
Section 2	Know More	72
Chapter 7	Animal Cell Culture	75
Section 1	Subculturing Cells	87
Section 2	Cryopreservation	92
Section 3	Recovery of Cryopreserved Cells	96
Section 4	Know More	97
Chapter 8	Cell Transfection	100
Section 1	Transient Transfection	111
Section 2	Detecting Transfection Efficiency by Flow Cytometry	112
Chapter 9	Cell Contamination	115
Section 1	Types of Cell Contamination	115
Section 2	Detection of Contamination	118
Section 3	Removal of Contamination	120
Section 4	Know More	122
Chapter 10	Genome Editing by CRISPR/Cas9	124
Section 1	CRISPR/Cas9 System	125
Section 2	Cloning a gRNA into a Vector	133
Section 3	Purification of Cas9/sgRNA Coexpression Vectors	136
Section 4	Cotransfection of Cas9/sgRNA Coexpression Vectors into the Cells	139
Section 5	PCR Analysis of Targeted Deletion in the Genome	142
Section 6	Know More	144
Chapter 11	Biosafety in Laboratory	148
Section 1	General Laboratory Safety	148

Section 2	Biosafety	152
Chapter 12	The Laboratory Report	160
Appendix		164
Section 1	Experimental Instruments	164
Section 2	Preparation of Commonly—Used Solutions	177
