

Table of Contents

CONTENTS, VOLUME II

Preface to the Third Edition

vii

Preface to the First Edition

xi

1. Multi-Species Waves and Practical Applications

1

1.1	Intuitive Expectations	1
1.2	Waves of Pursuit and Evasion in Predator-Prey Systems	5
1.3	Competition Model for the Spatial Spread of the Grey Squirrel in Britain	12
1.4	Spread of Genetically Engineered Organisms	18
1.5	Travelling Fronts in the Belousov-Zhabotinskii Reaction	35
1.6	Waves in Excitable Media	41
1.7	Travelling Wave Trains in Reaction Diffusion Systems with Oscillatory Kinetics	49
1.8	Spiral Waves	54
1.9	Spiral Wave Solutions of λ - ω Reaction Diffusion Systems	61
	Exercises	67

2. Spatial Pattern Formation with Reaction Diffusion Systems

71

2.1	Role of Pattern in Biology	71
2.2	Reaction Diffusion (Turing) Mechanisms	75
2.3	General Conditions for Diffusion-Driven Instability: Linear Stability Analysis and Evolution of Spatial Pattern	82
2.4	Detailed Analysis of Pattern Initiation in a Reaction Diffusion Mechanism	90
2.5	Dispersion Relation, Turing Space, Scale and Geometry Effects in Pattern Formation Models	103
2.6	Mode Selection and the Dispersion Relation	113
2.7	Pattern Generation with Single-Species Models: Spatial Heterogeneity with the Spruce Budworm Model	120

2.8	Spatial Patterns in Scalar Population Interaction Diffusion Equations with Convection: Ecological Control Strategies	125
2.9	Nonexistence of Spatial Patterns in Reaction Diffusion Systems: General and Particular Results	130
	Exercises	135
3.	Animal Coat Patterns and Other Practical Applications of Reaction Diffusion Mechanisms	141
3.1	Mammalian Coat Patterns—'How the Leopard Got Its Spots'	142
3.2	Teratologies: Examples of Animal Coat Pattern Abnormalities	156
3.3	A Pattern Formation Mechanism for Butterfly Wing Patterns	161
3.4	Modelling Hair Patterns in a Whorl in <i>Acetabularia</i>	180
4.	Pattern Formation on Growing Domains: Alligators and Snakes	192
4.1	Stripe Pattern Formation in the Alligator: Experiments	193
4.2	Modelling Concepts: Determining the Time of Stripe Formation	196
4.3	Stripes and Shadow Stripes on the Alligator	200
4.4	Spatial Patterning of Teeth Primordia in the Alligator: Background and Relevance	205
4.5	Biology of Tooth Initiation	207
4.6	Modelling Tooth Primordium Initiation: Background	213
4.7	Model Mechanism for Alligator Teeth Patterning	215
4.8	Results and Comparison with Experimental Data	224
4.9	Prediction Experiments	228
4.10	Concluding Remarks on Alligator Tooth Spatial Patterning	232
4.11	Pigmentation Pattern Formation on Snakes	234
4.12	Cell-Chemotaxis Model Mechanism	238
4.13	Simple and Complex Snake Pattern Elements	241
4.14	Propagating Pattern Generation with the Cell-Chemotaxis System	248
5.	Bacterial Patterns and Chemotaxis	253
5.1	Background and Experimental Results	253
5.2	Model Mechanism for <i>E. coli</i> in the Semi-Solid Experiments	260
5.3	Liquid Phase Model: Intuitive Analysis of Pattern Formation	267
5.4	Interpretation of the Analytical Results and Numerical Solutions	274
5.5	Semi-Solid Phase Model Mechanism for <i>S. typhimurium</i>	279
5.6	Linear Analysis of the Basic Semi-Solid Model	281
5.7	Brief Outline and Results of the Nonlinear Analysis	287
5.8	Simulation Results, Parameter Spaces and Basic Patterns	292
5.9	Numerical Results with Initial Conditions from the Experiments	297
5.10	Swarm Ring Patterns with the Semi-Solid Phase Model Mechanism	299
5.11	Branching Patterns in <i>Bacillus subtilis</i>	306
6.	Mechanical Theory for Generating Pattern and Form in Development	311
6.1	Introduction, Motivation and Background Biology	311

6.2	Mechanical Model for Mesenchymal Morphogenesis	319
6.3	Linear Analysis, Dispersion Relation and Pattern Formation Potential	330
6.4	Simple Mechanical Models Which Generate Spatial Patterns with Complex Dispersion Relations	334
6.5	Periodic Patterns of Feather Germs	345
6.6	Cartilage Condensations in Limb Morphogenesis and Morphogenetic Rules	350
6.7	Embryonic Fingerprint Formation	358
6.8	Mechanochemical Model for the Epidermis	367
6.9	Formation of Microvilli	374
6.10	Complex Pattern Formation and Tissue Interaction Models	381
	Exercises	394
7.	Evolution, Morphogenetic Laws, Developmental Constraints and Teratologies	396
7.1	Evolution and Morphogenesis	396
7.2	Evolution and Morphogenetic Rules in Cartilage Formation in the Vertebrate Limb	402
7.3	Teratologies (Monsters)	407
7.4	Developmental Constraints, Morphogenetic Rules and the Consequences for Evolution	411
8.	A Mechanical Theory of Vascular Network Formation	416
8.1	Biological Background and Motivation	416
8.2	Cell–Extracellular Matrix Interactions for Vasculogenesis	417
8.3	Parameter Values	425
8.4	Analysis of the Model Equations	427
8.5	Network Patterns: Numerical Simulations and Conclusions	433
9.	Epidermal Wound Healing	441
9.1	Brief History of Wound Healing	441
9.2	Biological Background: Epidermal Wounds	444
9.3	Model for Epidermal Wound Healing	447
9.4	Nondimensional Form, Linear Stability and Parameter Values	450
9.5	Numerical Solution for the Epidermal Wound Repair Model	451
9.6	Travelling Wave Solutions for the Epidermal Model	454
9.7	Clinical Implications of the Epidermal Wound Model	461
9.8	Mechanisms of Epidermal Repair in Embryos	468
9.9	Actin Alignment in Embryonic Wounds: A Mechanical Model	471
9.10	Mechanical Model with Stress Alignment of the Actin Filaments in Two Dimensions	482
10.	Dermal Wound Healing	491
10.1	Background and Motivation—General and Biological	491

10.2	Logic of Wound Healing and Initial Models	495
10.3	Brief Review of Subsequent Developments	500
10.4	Model for Fibroblast-Driven Wound Healing: Residual Strain and Tissue Remodelling	503
10.5	Solutions of the Model Equations and Comparison with Experiment	507
10.6	Wound Healing Model of Cook (1995)	511
10.7	Matrix Secretion and Degradation	515
10.8	Cell Movement in an Oriented Environment	518
10.9	Model System for Dermal Wound Healing with Tissue Structure	521
10.10	One-Dimensional Model for the Structure of Pathological Scars	526
10.11	Open Problems in Wound Healing	530
10.12	Concluding Remarks on Wound Healing	533
11.	Growth and Control of Brain Tumours	536
11.1	Medical Background	538
11.2	Basic Mathematical Model of Glioma Growth and Invasion	542
11.3	Tumour Spread <i>In Vitro</i> : Parameter Estimation	550
11.4	Tumour Invasion in the Rat Brain	559
11.5	Tumour Invasion in the Human Brain	563
11.6	Modelling Treatment Scenarios: General Comments	579
11.7	Modelling Tumour Resection in Homogeneous Tissue	580
11.8	Analytical Solution for Tumour Recurrence After Resection	584
11.9	Modelling Surgical Resection with Brain Tissue Heterogeneity	588
11.10	Modelling the Effect of Chemotherapy on Tumour Growth	594
11.11	Modelling Tumour Polyclonality and Cell Mutation	605
12.	Neural Models of Pattern Formation	614
12.1	Spatial Patterning in Neural Firing with a Simple Activation-Inhibition Model	614
12.2	A Mechanism for Stripe Formation in the Visual Cortex	622
12.3	A Model for the Brain Mechanism Underlying Visual Hallucination Patterns	627
12.4	Neural Activity Model for Shell Patterns	638
12.5	Shamanism and Rock Art	655
	Exercises	659
13.	Geographic Spread and Control of Epidemics	661
13.1	Simple Model for the Spatial Spread of an Epidemic	661
13.2	Spread of the Black Death in Europe 1347-1350	664
13.3	Brief History of Rabies: Facts and Myths	669
13.4	The Spatial Spread of Rabies Among Foxes I: Background and Simple Model	673
13.5	The Spatial Spread of Rabies Among Foxes II: Three-Species (<i>SIR</i>) Model	681

13.6	Control Strategy Based on Wave Propagation into a Nonepidemic Region: Estimate of Width of a Rabies Barrier	696
13.7	Analytic Approximation for the Width of the Rabies Control Break	700
13.8	Two-Dimensional Epizootic Fronts and Effects of Variable Fox Densities: Quantitative Predictions for a Rabies Outbreak in England	704
13.9	Effect of Fox Immunity on the Spatial Spread of Rabies	710
	Exercises	720
14.	Wolf Territoriality, Wolf-Deer Interaction and Survival	722
14.1	Introduction and Wolf Ecology	722
14.2	Models for Wolf Pack Territory Formation: Single Pack—Home Range Model	729
14.3	Multi-Wolf Pack Territorial Model	734
14.4	Wolf-Deer Predator-Prey Model	745
14.5	Concluding Remarks on Wolf Territoriality and Deer Survival	751
14.6	Coyote Home Range Patterns	753
14.7	Chippewa and Sioux Intertribal Conflict c1750-1850	754
Appendix		
A.	General Results for the Laplacian Operator in Bounded Domains	757
Bibliography		
		761
