

Contents

<i>Preface</i>	vii
1. An Introduction to Photosynthesis and Its Applications	1
2. Photosynthetic Antennas and Reaction Centres: Current Understanding and Prospects for Improvement	21
3. The Photosynthetic Process	37
4. Significance of Photosynthesis	63
5. New Understanding of Photosynthesis Energy Conversion	73
6. Photosynthesis Tag and Plant Food-Making Lesson	89
7. The Light Reactions of Photosynthesis	119
8. A Primer on Photosynthesis and the Functioning of Cells	139
9. Photosynthetic Environment	161
10. Ph-ocusing on Photosynthesis in and out of the Garden	173
11. Effects of Radiation Quality, Intensity, and Duration on Photosynthesis and Growth	205
12. Phytochrome-mediated Responses	225
<i>Bibliography</i>	245
<i>Index</i>	253
