

CONTENTS

<i>Preface</i>	v
<i>Contributors</i>	ix
<i>C.P. Malik—The Ideal Researcher and an Accomplished Educationist of all Time</i>	xiii
1. Salt Tolerance in <i>Brassicas</i> : Present Status and Future Thrust Areas —Parbodh Chander Sharma, Jogendra Singh and T.V. Vineeth	1
2. Salt Stress Tolerance in Plants: Physiological and Molecular Perspectives —A. Hemantaranjan, A. Nishant Bhanu, M.N. Singh, Dinesh K. Yadav and Deepmala Katiyar	28
3. Genetic Transformation of Oilseed Brassicas for Abiotic Stresses Tolerance/Resistance: A Comprehensive Review —Vandana Verma, Ajay Kumar Thakur and Hirday N. Verma	60
4. Molecular Breeding for Waterlogging Tolerance in Maize (<i>Zea mays</i>) —Ajaz A Lone, Mudasir H. Khan, Zahoor A. Dar, Shabir. H. Wani	76
5. Emerging Roles of Brassinosteroids in Temperature Stress Tolerance in Crops —Kalpna Bhandari and Harsh Nayyar	93
6. Physiological basis as Coping Mechanism in Crop Plants under Drought Prone Environment —Pushp Sharma, Virender Sardana, Rajni Sharma and Parvender Sheoran	103

7.	RNA Silencing : A Novel Tool for Crop Protection Against Biotic and Abiotic Stresses	147
	— <i>B. Mamta, Bir Bahadur and Manchikatta V. Rajam</i>	
8.	Stress Mechanisms and Adaptations in Plant	164
	— <i>Navita Ghai, Nirmaljit Kaur and Seema Bedi</i>	
9.	Abiotic Stress Induced Proteins in Plants	173
	— <i>Bhuwnesh Goswami, Premrata Singariya, Krishan Kumar Mourya and B.R. Gadi</i>	
10.	Physiological and Antioxidative-Induced Changes by Magnetic Field in <i>Hyssopus officinalis</i> Under Drought	194
	— <i>Rezvan Mohammadi, Parto Roshandel and Ali Tadayon</i>	
11.	Phenological Responses of Plants in Relation to Changing Climate	208
	— <i>Ardeep Mukherjee and Madhoolika Agrawal</i>	
	<i>Index</i>	222
